

MainStay Floating Rate Fund

A: MXFAX | C: MXFCX | I: MXFIX R6: MXFEX

All data as of 03/31/24

A conservative, long term approach to floating rate loans

Seeks: High current income.

Morningstar Category: Bank Loan

Benchmark: Morningstar LSTA US Leveraged Loan Index⁵

Conservative approach

The investment team focuses on higher-quality floating rate loans, and maintains a substantially underweight position in the riskiest portion of the market.

Deep credit research

The team's value-oriented process uses fundamental credit research to identify issues with positive free cash flow, solid collateral, and proven management.

Depth and breadth of experience

New York Life Investors entered the institutional loan market in 1994. The team averages over 20 years of investment experience through a variety of credit cycles.

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. No initial sales charge applies on investments of \$250,000 or more (and certain other qualified purchases). However, a contingent deferred sales charge of 1.00% may be imposed on certain redemptions made within 18 months of the date of purchase on shares that were purchased without an initial sales charge. Visit www.newyorklifeinvestments.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

Morningstar Ratings⁴

as of 03/31/24

Class A

Class I

Overall Morningstar Rating™ based on the risk-adjusted returns from among 214 Bank Loan funds.

		Stars	# of Funds
Class A	3Yr	3	214
	5Yr	3	206
	10Yr	3	169
Class I	3Yr	3	214
	5Yr	4	206
	10Yr	4	169

Fund Statistics³

Fund Inception	5/3/04	
Total Net Assets (all classes)	\$1.6 B	
Distribution Frequency	Monthly*	
Number of Issuers	425	
Annual Turnover Rate (%)	11	
<i>*Accrued daily.</i>		
	Fund	Benchmark
Avg. Price. (\$)	98.55	96.80
Avg. Loan Size (\$mil)	3.18	1,343.63
Avg. Loan Size (% of TNA)	0.20	0.07
Avg. Weighted Time to Reset	38 Days	n/a

Yields and Distributions	Class A	Class I
SEC 30-Day Yield	8.02	8.53
Unsubsidized 30-Day Yield	8.02	8.53
Last Distribution: Mar 2024 (\$)	0.0619	0.0638

SEC 30-Day Yield is based on net investment income for the 30-day period ended 03/31/24 divided by the offering price per share on that date. Yields for other share classes will vary.

Unsubsidized 30-Day Yield reflects what the yield would have been without the effect of waivers and/or reimbursements.

Please note that there was no reimbursement for this time period.

MainStay Floating Rate Fund

Credit Quality Breakdown (%)

Percentages are based on fixed-income securities held in the Fund's investment portfolio and exclude any equity or convertible securities and cash or cash equivalents. Ratings apply to the underlying portfolio of debt securities held by the Fund and are rated by an independent rating agency, such as Standard and Poor's or Moody's. If ratings are provided by the rating agencies, but differ, the higher rating will be utilized. If only one rating is provided, the available rating will be utilized. Securities that are unrated by the rating agencies are reflected as such in the breakdown. Unrated securities do not necessarily indicate low quality. S&P rates borrowers on a scale from AAA to D. AAA through BBB represent investment grade, while BB through D represent non-investment grade.

Top Industries (%)

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

Floating rate funds are generally considered to have speculative characteristics that involve default risk of principal and interest, collateral impairment, non-diversification, borrower industry concentration, and limited liquidity. Liquidity risk may also refer to the risk that the Fund may not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, unusually high volume of redemptions, or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions.

Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. These risks may be greater for emerging markets. Funds that invest in bonds are subject to interest-rate risk and can lose principal value when interest rates rise. Bonds are also subject to credit risk, in which the bond issuer may fail to pay interest and principal in a timely manner.

1. Average annual total returns include the change in share price and reinvestment of dividends and capital gain distributions. Class I shares are generally only available to corporate and institutional investors. Class R shares are available only through corporate-sponsored retirement plans. **2.** The Morningstar LSTA U.S. Leveraged Loan Index is a broad index designed to reflect the performance of U.S. dollar facilities in the leveraged loan market. Index results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index. **3. Floating rate loans** feature rates that reset regularly, maintaining a fixed spread over the London Interbank Offered Rate (LIBOR) or the prime rate of large money-center banks. The **Annual Turnover Rate** measures how quickly securities in the Fund are either bought or sold during the 12 months as of the most recent annual shareholder report. **Average Price** is based on market value and is the market weighted average of all bonds held in the Fund's portfolio, including any zero coupon bonds. **4.** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance (this does not include the effects of sales charges, loads, and redemption fees). The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. **5.** The Morningstar LSTA U.S. Leveraged Loan Index is generally representative of the market sectors or types of investments in which the Fund invests.
