

IndexIQ Active ETF Trust

Prospectus

April 27, 2023

IQ CBRE Real Assets ETF (IQRA)

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

Not FDIC Insured | May Lose Value | No Bank Guarantee

IndexIQ Active ETF Trust (the “Trust”) is a registered investment company that consists of separate investment portfolios, each of which is called a “Fund.” This Prospectus relates to the following Fund:

<u>Name</u>	<u>CUSIP</u>	<u>Symbol</u>	<u>Exchange</u>
IQ CBRE Real Assets ETF	45409F710	IQRA	NYSE Arca

The Fund is an exchange-traded fund. This means that shares of the Fund are listed on a national securities exchange (the “Exchange”) and trade at market prices. The market price for the Fund’s shares may be different from its net asset value per share (the “NAV”). The Fund has its own CUSIP number and exchange trading symbol.

Summary Information

IQ CBRE Real Assets ETF

Investment Objective

The IQ CBRE Real Assets ETF (the "Fund") seeks total return through capital growth and current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund ("Shares"). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Shareholder Fees (fees paid directly from your investment):

None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fee	0.65%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ^(a)	0.27%
Total Annual Fund Operating Expenses^(b)	0.92%
Expense Waiver/Reimbursement ^(b)	0.27%
Total Annual Fund Operating Expenses After Expense Waiver/Reimbursement	0.65%

(a) The Fund has not yet commenced operations and Other Expenses are based on estimated amounts for the current fiscal year.

(b) IndexIQ Advisors LLC (the "Advisor") has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.65% of the average daily net assets of the Fund. The agreement will remain in effect permanently unless terminated by the Board of Trustees of the Fund.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$66	\$265

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. The Fund is newly organized and, as of the date of the Prospectus, has not yet commenced operations.

Principal Investment Strategies

The Fund will normally invest at least 80% of its assets (net assets plus borrowings for investment purposes) in securities issued by real assets companies. The Fund's Subadvisor, CBRE Investment Management Listed Real Assets LLC ("CBRE" or the "Subadvisor") defines a real assets company, as a company that derives a majority of its revenues from activities related to the ownership, operation, and development of infrastructure assets (an "infrastructure company") and real estate (a "real estate company").

The Fund's Subadvisor defines an infrastructure company as a company that derives at least 50% of its revenues or profits from, or devotes at least 50% of its assets to, the ownership, management, development, construction, renovation, enhancement, or operation of infrastructure assets or the provision of services to companies engaged in such activities. Examples of infrastructure assets include transportation assets (such as toll roads,

bridges, railroads, airports, and seaports), utility assets (such as electric transmission and distribution lines, gas distribution pipelines, water pipelines and treatment facilities, and sewer facilities), energy assets (such as oil and gas pipelines, storage facilities, and other facilities used for gathering, processing, or transporting hydrocarbon products as well as contracted renewable power assets), and communications assets (such as communications towers, data centers, fiber networks, and satellites). The Subadvisor defines a real estate company as a company that derives at least 50% of its total revenue or earnings from owning, operating, leasing, developing, managing, brokering and/or selling real estate, or has at least 50% of its assets invested in real estate. Companies principally engaged in the real estate industry may include real estate investment trusts ("REITs"), real estate owners, real estate managers, real estate brokers, real estate dealers, and companies with substantial real estate holdings.

Under normal circumstances, the Fund invests primarily in common stock, but may also invest in other equity securities including preferred stock, convertible securities, rights or warrants to buy common stocks, master limited partnerships ("MLPs"), and depositary receipts with characteristics similar to common stock. The Fund may invest up to 10% of its total assets in exchange-traded funds or exchange-traded investment products. The Fund may invest in initial public offerings and Rule 144A securities. The Subadvisor may invest in companies with any market capitalization. However, the Subadvisor will generally not invest in companies with a market capitalization of less than \$100 million at the time of purchase. Under normal market conditions, the Fund will invest more than 25% of its total assets in securities of issuers conducting their business activities in the infrastructure group of industries and more than 25% of its total assets in securities issued by companies principally engaged in the real estate industry.

The Fund may invest in companies located throughout the world and there is no limit on the Fund's investments in international securities. The Fund may invest up to 30% of its assets in securities of issuers in emerging markets countries. The Subadvisor defines emerging market countries as those countries that are included in the MSCI Emerging Markets Index. The Fund's investments may be denominated in U.S. dollars, non-U.S. currencies, or multinational currency units. The Fund may hedge its currency exposure to securities denominated in non-U.S. currencies.

The Investment Process: The Subadvisor focuses on investments that generally provide the potential for attractive income growth, protection against inflation, and long-term capital appreciation. The Subadvisor uses systematic, top-down research to evaluate macroeconomic conditions, private market, and capital market trends to identify the relative value of different sectors within infrastructure companies and real estate companies and judge which market sectors offer potentially attractive returns. The Subadvisor uses proprietary analytical techniques to conduct fundamental company analysis, which provides a framework for bottom-up security selection. This approach incorporates several quantitative and qualitative factors, as well as portfolio risk management tools, that aid in evaluating performance characteristics of individual securities independently and relative to each other. The Subadvisor's in-house valuation process examines several factors, including the company's management and strategy, the stability and growth potential of cash flows and dividends, the location of the company's assets, the company's capital structure, and risk factors including regulatory environment and environmental, social and governance ("ESG") considerations.

The Subadvisor includes ESG considerations in its analysis to help identify companies that balance the needs of all stakeholders in their communities and address ESG issues. ESG factors are assessed based on internal research and information from an independent global provider of ESG and corporate governance research. The Subadvisor includes ESG considerations in its analysis to help identify companies that balance the needs of all stakeholders in their communities and address ESG issues. ESG factors are assessed based on internal research and information from an independent global provider of ESG and corporate governance research. ESG considerations evaluated by the manager include environmental considerations such as carbon emissions reduction pathways, renewable energy targets, climate risk approach, and green building certifications. Social considerations including engagement with key stakeholders such as regulators, customers, and legislators, as well as employee satisfaction, turnover, diversity and inclusion, and development of human capital. Governance factors include board independence and structure, ownership and shareholder alignment, proxy access, takeover defenses and executive compensation.

The Subadvisor may sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into opportunities believed to be more promising, among others.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, the Advisor or any of its affiliates. You should consider carefully the following risks before investing in the Fund.

Authorized Participant Concentration Risk

Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an "Authorized Participant"). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Convertible Securities Risk

A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. Convertible securities are typically subordinate to an issuer's other debt obligations. Issuers of convertible securities may be more vulnerable to changes in the economy, such as a recession or a sustained period of rising interest rates, which could affect their ability to make interest and principal payments. If an issuer stops making interest and/or principal payments, the Fund could lose its entire investment.

Currency Risk

Investments directly in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund's third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Depository Receipts Risk

Sponsored depository receipts involve risk not experienced when investing directly in the equity securities of an issuer. Depository receipts may be less liquid than the underlying shares in their primary trading market. Any distributions paid to the holders of depository receipts are usually subject to a fee charged by the depository. Holders of depository receipts may have limited voting rights, and investment restrictions in certain countries may adversely impact the value of depository receipts.

Emerging Markets Securities Risk

Securities of issuers based in countries with developing economies (emerging market countries) may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed market countries and are generally considered speculative in nature. Emerging market countries are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets, rapid inflation, possible repatriation of investment income and capital, currency convertibility issues, less uniform accounting standards and more governmental limitations on foreign investment than more developed markets. Laws regarding foreign investment in emerging market securities, securities regulation, title to securities, and shareholder rights may change quickly and unpredictably. In addition, the enforcement of systems of taxation at federal, regional and local levels in emerging market countries may be inconsistent and subject to sudden change.

Equity Securities Risk

Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Exchange Traded Products Risk

Unlike an investment in a mutual fund, the value of the Fund's investment in other exchange-traded funds or exchange-traded investment products ("ETPs") is based on its market price (rather than NAV) and the Fund could lose money due to premiums/discounts of the ETP (which could cause the Fund to buy shares at market prices that are higher than their value or sell shares at market prices that are lower than their value); the failure of an active trading market to develop; or exchange trading halts or delistings. An investment in the Fund will entail more costs and expenses than a direct investment in any Underlying ETP. As the Fund's allocations to Underlying ETPs changes, or the expense ratio of Underlying ETPs change, the operating expenses borne by the Fund from such investments may increase or decrease.

Focused Investment Risk

To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. The less developed a country's securities market is, the greater the likelihood of custody problems.

Foreign Securities Valuation Risk

The Fund's value may be impacted by events that cause the fair value of foreign securities to materially change between the close of the local exchange on which they trade and the time at which the Fund prices its Shares. Additionally, because foreign exchanges on which securities held by the Fund may be open on days when the Fund does not price its Shares, the potential exists for the value of the securities in the Fund's portfolio to change on days when shareholders will not be able to purchase or sell Shares.

Industry/Sector Concentration Risk

The Fund's investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated. The Fund will concentrate in the securities of issuers in the resources-related industries or sectors so identified.

Infrastructure Companies Risk

The Fund's investments in infrastructure companies expose the Fund to potential adverse economic, regulatory, political, legal, and other changes affecting such investments. Issuers of securities in infrastructure-related

businesses are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high degrees of leverage; economic slowdowns; surplus capacity; difficulty in raising capital; costs associated with changes in government regulations or policies; adverse changes in tax laws; increased competition from other service providers; evolving technological developments; environmental problems; labor relations tensions; and possible corruption in publicly funded projects. Rising interest rates could lead to higher financing costs and reduced earnings for infrastructure companies/issuers.

Initial Public Offering ("IPO") Risk

The volume of IPOs and the levels at which the newly issued stocks trade in the secondary market are affected by the performance of the stock market overall. Shares issued by companies that have recently conducted an IPO may be subject to price volatility and speculative trading due to various factors, including the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer's business model, quality of management, earnings growth potential and other criteria used to evaluate its investment prospects. The prices of securities involved in IPOs are often subject to greater and more unpredictable price changes than more established stocks. Additionally, the market for IPO shares can be speculative and/or inactive for extended periods of time. The limited number of shares available for trading in some IPOs may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Investors in IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

Large-Capitalization Companies Risk

Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

Market Risk

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund's value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on a Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Master Limited Partnerships ("MLPs") Risk

MLPs carry many of the risks inherent in investing in a partnership. State law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded investors in a MLP. Limited partners may also have more limited control and limited rights to vote on matters affecting the MLP.

New Fund Risk

As a new fund, there can be no assurance that the Fund will grow to or maintain an economically viable size. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result or, while it may be the desired result, may underperform other types of investment strategies. The Subadvisor may give consideration to certain ESG criteria when evaluating an investment opportunity. The application of ESG criteria may result in the Fund (i) having exposure to certain securities or industry sectors that are significantly different than the composition of the Fund's benchmark; and (ii) performing differently than other funds and strategies in its peer group that do not take into account ESG criteria or the Fund's benchmark. There can be no guarantee that the Fund will meet its investment objective(s).

Preferred Securities Risk

Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may obtain limited rights. In certain circumstances, an issuer of preferred securities may defer payment on the securities and, in some cases, redeem the securities prior to a specified date. Preferred securities may also be substantially less liquid than other securities, including common stock.

Private Placement and Restricted Securities Risk

The Fund may invest in privately issued securities, including those which may be resold only in accordance with Rule 144A under the Securities Act of 1933, as amended. Securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no market or a limited market for the resale of such securities. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at the most favorable price. This potential lack of liquidity also may make it more difficult to accurately value these securities.

Real Estate Companies Risk

An investment in companies that invest in real estate (including REITs) exposes the Fund to the risks of the real estate market and the risks associated with the ownership of real estate. These risks can include fluctuations in the value of or destruction of underlying properties; realignment in tenant living and work habits (for example, movements to and from different parts of a nation, a region, a state or a city); tenant or borrower default; market saturation; changes in general and local economic conditions; decreases in market rates for rents; increases in vacancies; competition; property taxes; capital expenditures or operating expenses; other economic or political events affecting the real estate industry including interest rates and government regulation; concentration in a limited number of properties, geographic regions or property types; and low quality and/or conflicted management. Real estate is generally a less liquid asset class and companies that hold real estate may not be able to liquidate or modify their holdings quickly in response to changes in economic or other market conditions. Additionally, such companies may utilize leverage, which increases investment risk and the potential for more volatility in the Fund's returns.

Secondary Market Trading Risk

Although the Fund's Shares are listed for trading on one or more securities exchanges, there can be no assurance that an active trading market for such Shares will develop or be maintained by market makers or Authorized Participants. In general, the trading of Shares on securities exchanges is subject to the risk of irregular trading activity and wide "bid/ask" spreads (which may be especially pronounced for smaller funds). Additionally, market makers are under no obligation to make a market in the Fund's Shares and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund's Shares or Authorized Participants stop submitting purchase or redemption orders for Creation Units, the Fund's Shares may trade at a larger premium or discount to its NAV. Wide bid-ask spreads and large premiums or discounts to NAV are likely to lead to an investor buying his or her shares at a market price that is more than their value, and selling those shares at a market price that is less than their value.

Small- and/or Mid-Capitalization Companies Risk

Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund's portfolio holdings or NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Performance Information

As of the date of this Prospectus, the Fund has not commenced operations and therefore does not report its performance information. The Fund's performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting newyorklifeinvestments.com/etf.

Investment Advisor and Subadvisor

IndexIQ Advisors LLC is the investment advisor to the Fund.

CBRE Investment Management Listed Real Assets LLC is the investment subadvisor to the Fund.

Portfolio Managers

The professionals of the subadvisor that are jointly and primarily responsible for the day-to-day management of the Fund are:

<u>Name & Title of Portfolio Manager</u>	<u>Length of Service as Fund's Portfolio Manager</u>
Jeremy Anagnos, CFA, Chief Investment Officer, Listed Infrastructure	Since inception
Daniel Foley, CFA, Portfolio Manager, Senior Vice President	Since inception
Jonathan Miniman, CFA, Global Portfolio Manager	Since inception
Joseph P. Smith, CFA, Chief Investment Officer, Listed Real Assets Strategies	Since inception

Purchase and Sale of Fund Shares

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called "Creation Units." Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund's Shares may trade at a price greater than (premium) or less than (discount) the Fund's NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the "bid-ask spread"). Recent information, including the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com/etf.

Tax Information

The Fund's distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Overview

The Trust is an investment company consisting of a number of separate investment portfolios (each, a "Fund" and together, the "Funds") that are structured as exchange-traded funds ("ETFs"). Each share of a Fund represents an ownership interest in the securities and other instruments comprising a Fund's portfolio. Unlike shares of a mutual fund, which can be bought and redeemed from the issuing fund by all shareholders at a price based on net asset value ("NAV"), shares of an ETF (such as the Fund) are listed on a national securities exchange and trade in the secondary market at market prices that change throughout the day, and may differ from a Fund's NAV. IndexIQ Advisors LLC (the "Advisor") is the investment advisor to the Fund.

The Fund has a distinct investment objective and policies. Each of the policies described herein, including the investment objective of the Fund, constitutes a non-fundamental policy that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information (the "SAI") under "Investment Restrictions." There can be no assurance that the Fund's objective will be achieved.

Description of the Principal Investment Strategies of the Fund

The Fund is an actively managed ETF and thus does not seek to replicate the performance of a specific index. Instead, the Fund uses an active investment strategy to meet its investment objective. The Subadvisor, subject to the oversight of the Advisor and the Board, has discretion on a daily basis to manage the Fund's portfolio in accordance with the Fund's investment objective and investment policies.

In accordance with Rule 35d-1 under the Investment Company Act of 1940 (the "1940 Act"), the Fund has adopted a policy that it will, under normal circumstances, invest at least 80% of the value of its assets (net assets plus the amount of any borrowings for investment purposes) in securities issued by real assets companies. This policy is "non-fundamental," which means that it may be changed without the vote of a majority of the Fund's outstanding shares as defined in the 1940 Act. This policy generally provides a fund's shareholders with at least 60 days' prior notice of any changes in the Fund's non-fundamental investment policy with respect to investments of the type suggested by its name. The Fund may count investments in underlying funds toward various guideline tests (such as the 80% test required under Rule 35d-1 under the 1940 Act).

Unless otherwise indicated, all of the percentage limitations above and in the section entitled "Principal Investment Strategies" apply only at the time of an acquisition or encumbrance of securities or assets of the Fund, except that any borrowings by the Fund that exceeds applicable limitations must be reduced to meet such limitations within the period required by the 1940 Act. Therefore, a change in the percentage that results from a relative change in values or from a change in the Fund's assets will not be considered a violation of the Fund's policies or restrictions. "Value" for the purposes of all investment restrictions shall mean the value used in determining the Fund's NAV.

To the extent the Fund makes investments on behalf of the Fund that are regulated by the Commodities Futures Trading Commission, it intends to do so in accordance with Rule 4.5 under the Commodity Exchange Act ("CEA"). The Advisor has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with Rule 4.5 and is therefore not subject to registration as a commodity pool operator under the CEA.

The Fund's portfolio holdings will be disclosed on the Trust's website (newyorklifeinvestments.com/etf) daily after the close of trading on the NYSE Arca, Inc. ("NYSE Arca") or the ("Exchange") and prior to the opening of trading on the Exchange the following day.

Additional Investment Strategies

Temporary Defensive Positions

In times of unusual or adverse market, economic or political conditions or abnormal circumstances (such as large cash inflows or anticipated large redemptions), the Fund may, for temporary defensive purposes (which may be for a prolonged period), invest outside the scope of its principal investment strategies. Under such conditions, the Fund may not invest in accordance with its investment objective or principal investment strategies and, as a result, there is no assurance that the Fund will achieve its investment objective. Under such conditions, the Fund may invest without limit in investment grade securities and may invest in U.S. government securities or other high quality money market instruments.

Description of the Principal Risks of the Fund

Investors in the Fund should carefully consider the risks of investing in the Fund as set forth in the Fund's Summary Information section under "Principal Risks."

Authorized Participant Concentration Risk

Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting. This risk may be heightened for ETFs that invest in non-U.S. securities because such securities often involve greater settlement and operational issues for Authorized Participants that may further limit the availability of Authorized Participants.

Convertible Securities Risk

A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. Convertible securities are typically subordinate to an issuer's other debt obligations. Issuers of convertible securities may be more vulnerable to changes in the economy, such as a recession or a sustained period of rising interest rates, which could affect their ability to make interest and principal payments. If an issuer stops making interest and/or principal payments, the Fund could lose its entire investment.

Currency Risk

Investments directly in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. As a result, the Fund's investments in foreign currency denominated securities may reduce the return of the Fund. Because the Fund's NAV is determined on the basis of U.S. dollars, the Fund's NAV may decrease if the value of the non-U.S. currency to which the Fund has exposure depreciates in value relative to the U.S. dollar. This may occur even if the value of the underlying non-U.S. securities increases. Conversely, the Fund's NAV may increase if the value of a non-U.S. currency appreciates relative to the U.S. dollar.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. These risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of security issuers, the Advisor, distributor and other service providers (including, but not limited to, sub-advisors, index providers, fund accountants, custodians, transfer agents and administrators), market makers, Authorized Participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines and other

penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, Authorized Participants or market makers. There is no guarantee that such preventative efforts will succeed, and the Fund and its shareholders could be negatively impacted as a result.

Depository Receipts Risk

The Fund may invest in listed and liquid depository receipts. Depository receipts may be less liquid than the underlying shares in their primary trading market. To the extent the value of a depository receipt held by the Fund fails to track that of the underlying security, the use of the depository receipt may result in tracking error. Any distributions paid to the holders of depository receipts are usually subject to a fee charged by the depository. Holders of depository receipts may have limited voting rights, and investment restrictions in certain countries may adversely impact the value of depository receipts because such restrictions may limit the ability to convert the equity shares into depository receipts and vice versa. Such restrictions may cause the equity shares of the underlying issuer to trade at a discount or premium to the market price of the depository receipts.

Emerging Markets Securities Risk

Securities of issuers based in countries with developing economies (emerging market countries) may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed market countries and are generally considered speculative in nature. Emerging market countries are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets, rapid inflation, possible repatriation of investment income and capital, currency convertibility issues and more governmental limitations on foreign investment than more developed markets. Emerging market countries often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risk associated with the custody of securities than developed market countries. Furthermore, investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. Securities law in many emerging market countries is relatively new and unsettled. Therefore, laws regarding foreign investment in emerging market securities, securities regulation, title to securities, and shareholder rights may change quickly and unpredictably. In addition, the enforcement of systems of taxation at federal, regional and local levels in emerging market countries may be inconsistent and subject to sudden change.

Equity Securities Risk

The value of equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate or factors relating to specific companies in which the Fund invests. For example, an adverse event, such as an unfavorable earnings report, may depress the value of equity securities of an issuer held by the Fund; the price of common stock of an issuer may be particularly sensitive to general movements in the stock market; or a drop in the stock market may depress the price of most or all of the common stocks and other equity securities held by the Fund. In addition, common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. Holders of an issuer's common stock may also be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Exchange Traded Products Risk

Unlike an investment in a mutual fund, the value of the Fund's investment in other exchange-traded funds or exchange-traded investment products ("ETPs") is based on its market price (rather than NAV) and the Fund could lose money due to premiums/discounts of the ETP (which could cause the Fund to buy shares at market prices that are higher than their value or sell shares at market prices that are lower than their value); the failure of an active trading market to develop or exchange trading halts or delistings. An investment in the Fund that holds ETPs will entail more costs and expenses than a direct investment in any Underlying ETPs. As the Fund's allocations to Underlying ETPs changes, or the expense ratio of Underlying ETPs change, the operating expenses borne by the Fund from such investments may increase or decrease. Federal law prohibits the Fund from

acquiring investment company shares, including shares of other registered investment companies (including ETFs), in excess of specific thresholds unless exempted by rule, regulation or exemptive order. These prohibitions may prevent a Fund from allocating its investment in an optimal manner.

Focused Investment Risk

To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, custody, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. Non-U.S. transaction costs, such as brokerage commissions and custody costs, may be higher than in the United States. In some non-U.S. markets, custody arrangements for securities provide significantly less protection than custody arrangements in U.S. markets. Prevailing custody and trade settlement practices (e.g., the requirement to pay for securities prior to receipt) could similarly expose the Fund to credit and other risks it does not have in the United States with respect to participating brokers, custodians, clearing banks or other clearing agents, escrow agents and issuers. In addition, the Fund may not receive shareholder communications or be permitted to vote the securities it holds, as the issuers may be under no legal obligation to distribute them.

Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Low trading volumes and volatile prices in less developed markets make trades harder to complete and settle, and governments or trade groups may compel local agents to hold securities in designated depositories that are not subject to independent evaluation. Local agents are held only to the standards of care of their local markets. The less developed a country's securities market is, the greater the likelihood of custody problems.

Foreign Securities Valuation Risk

The Fund's value may be impacted by events that cause the fair value of foreign securities to materially change between the close of the local exchange on which they trade and the time at which the Fund prices its Shares. Additionally, because foreign exchanges on which securities held by the Fund may be open on days when the Fund does not price its Shares, the potential exists for the value of the securities in the Fund's portfolio to change on days when shareholders will not be able to purchase or sell such Shares.

Industry/Sector Concentration Risk

The Fund's investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated. The Fund will concentrate in the securities of issuers in the resources-related industries or sectors so identified.

Infrastructure Companies Risk

The Fund is particularly exposed to adverse economic, regulatory, political, legal, and other changes affecting the issuers of infrastructure-companies. Infrastructure-related companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, costs associated with environmental and other regulations, the effects of economic

slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors. Additionally, infrastructure-related companies may be subject to regulation by various governmental authorities and may also be affected by governmental regulation of rates charged to customers, service interruption and/or legal challenges due to environmental, operational or other mishaps and the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards. There is also the risk that corruption may negatively affect publicly-funded infrastructure projects, resulting in delays and cost overruns.

Specific infrastructure assets in which the Fund invests may be subject to the following additional risks:

- Communication infrastructure companies/issuers are subject to risks involving changes in government regulation, competition, dependency on patent protection, equipment incompatibility, changing consumer preferences, technological obsolescence and large capital expenditures and debt burdens.
- Energy infrastructure companies/issuers are subject to adverse changes in fuel prices, the effects of energy conservation policies and other risks, such as increased regulation, negative effects of economic slowdowns, reduced demand, cleanup and litigation costs as a result of environmental damage, changing and international politics and regulatory policies of various governments. Natural disasters or terrorist attacks damaging sources of energy supplies will also negatively impact energy infrastructure companies/issuers.
- Social infrastructure companies/issuers are subject to government regulation and the costs of compliance with such regulations and delays or failures in receiving required regulatory approvals. The enactment of new or additional regulatory requirements may negatively affect the business of a social infrastructure company.
- Transportation infrastructure companies/issuers can be significantly affected by economic changes, fuel prices, labor relations, insurance costs and government regulations. Transportation infrastructure companies will also be negatively impacted by natural disasters or terrorist attacks.
- Utilities company revenues and costs are subject to regulation by states and other regulators. Regulatory authorities also may restrict a company's access to new markets. Utilities companies may incur unexpected increases in fuel and other operating costs. Utilities companies are also subject to considerable costs associated with environmental compliance, nuclear waste clean-up and safety regulation.

Initial Public Offering ("IPO") Risk

The volume of IPOs and the levels at which the newly issued stocks trade in the secondary market are affected by the performance of the stock market overall. Shares issued by companies that have recently conducted an IPO may be subject to price volatility and speculative trading due to various factors, including the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer's business model, quality of management, earnings growth potential and other criteria used to evaluate its investment prospects. The prices of securities involved in IPOs are often subject to greater and more unpredictable price changes than more established stocks. Additionally, the market for IPO shares can be speculative and/or inactive for extended periods of time. The limited number of shares available for trading in some IPOs may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Investors in IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

Large-Capitalization Companies Risk

Large-capitalization companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies, especially during periods of economic expansion. Large capitalization companies may go in and out of favor based on market and economic conditions. Although the securities of larger companies may, on average, be less volatile than those of companies with smaller market capitalizations, during different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets and the securities of smaller companies.

Market Risk

The value of the Fund's investments may fluctuate and/or decline because of changes in the markets in which the Fund invests, which could cause the Fund to underperform other funds with similar investment objectives and strategies. Security markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Changes in these markets may be rapid and unpredictable. Fluctuations in the markets generally or in a specific industry or sector may impact the securities in which the Fund invests. From time to time, markets may experience periods of stress for potentially prolonged periods that may result in: (i) increased market volatility; (ii) reduced market liquidity; and (iii) increased redemptions of Fund shares. Such conditions may add significantly to the risk of volatility in the net asset value of the Fund's shares and the market prices at which shares of the Fund trade on a securities exchange. During periods of market stress shares of the Fund may also experience significantly wider "bid/ask" spreads and premiums and discounts between the Fund's net asset value and market price.

Market changes may impact equity and fixed income securities in different and, at times, conflicting manners. The Fund potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations or market closures. Thus, investments that the Subadvisor believes represent an attractive opportunity or in which the Fund seeks to obtain exposure may be unavailable entirely or in the specific quantities sought by the Subadvisor and the Fund may need to obtain the exposure through less advantageous or indirect investments or forgo the investment at the time. Securities and investments held by the Fund may be susceptible to declines in value, including declines in value that are not believed to be representative of the issuer's value or fundamentals, due to investor reactions to such events.

Political and diplomatic events within the United States and abroad, such as the U.S. budget and deficit reduction plans, protectionist measures, trade tensions central bank policy and government intervention in the economy, has in the past resulted, and may in the future result, in developments that present additional risks to the Fund's investments and operations. Geopolitical and other events, such as war, acts of terrorism, natural disasters, the spread of infectious illnesses, epidemics and pandemics, environmental and other public health issues, recessions or other events, and governments' reactions to such events, may lead to increased market volatility and instability in world economies and markets generally and may have adverse effects on the performance of the Fund and its investments. Additional and/or prolonged geopolitical or other events may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Any such market, economic and other disruptions could also prevent the Fund from executing its investment strategies and processes in a timely manner.

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares, they could be worth less than what you paid for them.

Market Disruption Risk and Recent Market Events

Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. For example, pandemic spread of the novel coronavirus disease known as COVID-19 and the ensuing policies enacted by governments and central banks caused significant volatility and great uncertainty in global financial markets, negatively impacting global growth prospects. Market disruptions such as these could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Master Limited Partnerships ("MLPs") Risk

The Fund invests in MLPs that are qualified publicly traded partnerships under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). MLPs are limited partnerships in which ownership interests are publicly traded and are operated under the supervision of one or more general partners. Investments in MLPs carry many of the risks inherent in investing in a partnership. State law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded to investors in an MLP. Limited partners may also have more limited control and limited rights to vote on matters affecting the MLP.

The anticipated benefits to be derived from MLP investments will principally depend on the MLPs being treated as partnerships for U.S. federal income tax purposes. Partnerships generally are not subject to U.S. federal income tax at the partnership level. Rather, each partner is allocated and is generally subject to U.S. federal income tax on its share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or in the underlying business activities of a given MLP could result in the MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being subject to entity-level U.S. federal income tax (as well as state and local taxes) on its taxable income. The classification of an MLP as a corporation for U.S. federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund was treated as a corporation for U.S. federal income tax purposes, it could result in a reduction of the value of an investment in the Fund and lower income earned by the Fund. To the extent a distribution received by the Fund from an MLP equity security is treated as a return of capital, the Fund's adjusted tax basis in the MLP equity security would be reduced by the amount of such distribution, which ultimately could result in an increase in an amount of income or gain (or decrease in the amount of loss) recognized by the Fund for tax purposes upon the sale or other disposition of such MLP equity security. Furthermore, any return of capital distributions received from an MLP equity security may require the Fund to restate the character of distributions made by the Fund as well as amend any previously issued shareholder tax reporting information.

New Fund Risk

As a new fund, there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case it could ultimately liquidate. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. An Authorized Participant, the Advisor or an affiliate of the Advisor may invest in the Fund and hold its investments for a specific period of time in order to facilitate commencement of the Fund's operations or for the Fund to achieve size or scale. There can be no assurance that any such entity would not redeem its investment or that the size of the Fund would be maintained at such levels which could negatively impact the Fund.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result or, while it may be the desired result, may underperform other types of investment strategies. The Subadvisor may give consideration to certain ESG criteria when evaluating an investment opportunity. The application of ESG criteria may result in the Fund (i) having exposure to certain securities or industry sectors that are significantly different than the composition of the Fund's benchmark; and (ii) performing differently than other funds and strategies in its peer group that do not take into account ESG criteria or the Fund's benchmark. There can be no guarantee that the Fund will meet its investment objective(s).

Preferred Securities Risk

Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Preferred securities often include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If a Fund owns a preferred security that is deferring its distributions, the Fund may be required to report income for federal income tax purposes although it has not yet received such income in cash. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board of director. Generally, once the issuer pays all the arrearages, the preferred security holders no longer have voting rights. In certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. For

instance, for certain types of preferred securities, a redemption may be triggered by a change in federal income tax or securities laws or a change in regulatory trademark. As with redemption provisions of debt securities, a special redemption by the issuer may negatively impact the return of the preferred security held by a Fund. Preferred securities may also be substantially less liquid than other securities, including common stock.

Private Placement and Restricted Securities Risk

The Fund may invest in privately issued securities, including those which may be resold only in accordance with Rule 144A under the Securities Act of 1933, as amended. Securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no market or a limited market for the resale of such securities. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at the most favorable price. This potential lack of liquidity also may make it more difficult to accurately value these securities.

Real Estate Companies Risk

An investment in companies that invest in real estate (including REITs) exposes the Fund to the risks of the real estate market and the risks associated with the ownership of real estate. These risks can include fluctuations in the value of or destruction of underlying properties; realignment in tenant living and work habits (for example, movements to and from different parts of a nation, a region, a state or a city); tenant or borrower default; market saturation; changes in general and local economic conditions; decreases in market rates for rents; increases in vacancies; competition; property taxes; capital expenditures or operating expenses; other economic or political events affecting the real estate industry; concentration in a limited number of properties, geographic regions or property types; and low quality and/or conflicted management. In addition, real estate is generally a less liquid asset class and companies that hold real estate may not be able to liquidate or modify their holdings quickly in response to changes in economic or other market conditions. Companies in the real estate sector or in sectors that affect the performance of companies in the real estate sector (such as banking or financial institutions) may be subject to extensive government regulation, which may change unexpectedly and significantly impact the value of the Fund's investments. Changing interest rates and credit quality requirements for borrowers and tenants may also affect the cash flow of companies that invest in real estate, and their ability to meet capital needs. Additionally, such companies may utilize leverage, which increases investment risk and the potential for more volatility in the Fund's returns. A REIT's failure to abide by U.S. federal tax requirements may cause it to be subject to federal income taxation, which would tend to impair the value of the REIT and change the characterization of the REIT's distributions. The U.S. federal tax requirement that a REIT distribute substantially all of its net income to its shareholders may result in the REIT having insufficient capital for future expenditures.

Secondary Market Trading Risk

Although the Fund's Shares are listed for trading on one or more securities exchanges, there can be no assurance that an active trading market for such Shares will develop or be maintained by market makers or Authorized Participants. The trading of Shares on securities exchanges is subject to the risk of irregular trading activity. Additionally, market makers are under no obligation to make a market in the Fund's Shares and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund's Shares or Authorized Participants stop submitting purchase or redemption orders for Creation Units, the Fund's Shares may trade at a larger premium or discount to its NAV. Wide bid-ask spreads and large premiums or discounts to NAV are likely to lead to an investor buying his or her shares at a market price that is more than their value, and selling those shares at a market price that is less than their value.

Buying or selling Shares on an exchange involves two types of costs that apply to all securities transactions. When buying or selling Shares through a broker, you will likely incur a brokerage commission and other charges. In addition, you may incur the cost of the "spread" — the difference between what investors are willing to pay for Shares (the "bid" price) and the price at which they are willing to sell Fund shares (the "ask" price). The spread, which varies over time for Shares based on trading volume and market liquidity, is generally narrower if the Fund has more trading volume and market liquidity and wider if the Fund has less trading volume and market liquidity. The risk of wide bid and ask spreads may be especially pronounced for smaller funds. In addition, increased market volatility may cause wider spreads. There may also be regulatory and other charges that are incurred as a result of trading activity. Because of the costs inherent in buying or selling Shares, frequent trading may detract significantly from investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments through a brokerage account.

Securities exchanges have requirements that must be met in order for Shares to be listed. There can be no assurance that the requirements of an exchange necessary to maintain the listing of Shares will continue to be met. This risk is particularly acute for funds that fail to attract a large number of shareholders. Pursuant to an exchange's "circuit breaker" rules, trading in the Fund's Shares may be halted due to extraordinary market volatility.

Small- and/or Mid-Capitalization Companies Risk

Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including narrower markets for their goods and/or services, more limited managerial and financial resources, limited product lines, services, markets, financial resources or are dependent on a small management group. Because these stocks may not be well known to the investing public, do not have significant institutional ownership and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, can decrease the value and liquidity of securities held by the Fund, resulting in more volatile performance. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the Fund's NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. The market price of the Fund's Shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade the Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that an investor most wants to sell their Shares. Although it is generally expected that the market price of the Fund's Shares will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares. While the creation/redemption feature is designed to make it more likely that the Fund's Shares normally will trade on securities exchanges at prices close to the Fund's next calculated NAV, exchange prices are not expected to correlate exactly with the Fund's NAV due to timing reasons, supply and demand imbalances and other factors. In addition, disruptions to creations and redemptions, including disruptions at market makers, Authorized Participants, or other market participants, and during periods of significant market volatility, may result in trading prices for Shares of the Fund that differ significantly from its NAV. Authorized Participants may be less willing to create or redeem Shares if there is a lack of an active market for such Shares or its underlying investments, which may contribute to the Fund's Shares trading at a premium or discount to NAV. Additionally, similar to shares of other issuers listed on a securities exchange, the Fund's Shares may be sold short and are therefore subject to the risk of increased volatility and price decreases associated with being sold short. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV.

Additional Risks

Large Investments Risk

From time to time, the Fund may receive large purchase or redemption orders from affiliated or unaffiliated funds or other investors. In addition, any third-party investor, investment advisor affiliate, authorized participant, lead market maker or other entity may make a large investment in the Fund and hold its investment for any number of reasons, including to facilitate the Fund's commencement of operations or to facilitate the Fund's achieving a specified size or scale. There can be no assurance that any large shareholder would not sell or redeem its investment at any given time, either in a single transaction or over time. These large transactions, and particularly redemptions, could have adverse effects on the Fund, including: (i) negative impacts to performance if the Fund were required to sell securities, invest cash or hold significant cash at times when it otherwise would not do so; (ii) wider price spreads or greater premiums/discounts that could materialize as a result of lower secondary market volume of shares; and (iii) negative federal income tax consequences if this activity accelerated the realization of capital gains.

U.S. Tax Risks

To qualify for the favorable U.S. federal income tax treatment accorded to regulated investment companies, the Fund must satisfy certain income, asset diversification and distribution requirements. If for any taxable year, the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to its shareholders, and such distributions would be taxable to its shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits. To the extent the Fund engages in derivatives transactions, the tax treatment of such derivatives transactions is unclear for purposes of determining the Fund's tax status. To the extent the Fund engages in transactions in financial instruments, including, but not limited to, options, futures contracts, hedging transactions, forward contracts and swap contracts, the Fund will be subject to special tax rules (which may include mark-to-market, constructive sale, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses. These rules could, therefore, affect the amount, timing and character of distributions to the Fund's shareholders. The Fund's use of such transactions may result in the Fund realizing more short-term capital gains and ordinary income, in each case subject to U.S. federal income tax at higher ordinary income tax rates, than it would if it did not engage in such transactions. Please refer to the SAI for a more complete discussion of the risks of investing in Shares.

Securities Lending Risk

Securities lending involves the risk that the borrower of the loaned securities fails to return the securities in a timely manner or at all. The Fund could also lose money due to a decline in the value of collateral provided for loaned securities or any investments made with cash collateral. These events could also trigger adverse tax consequences for the Fund.

Buying and Selling Shares in the Secondary Market

Most investors will buy and sell Shares of the Fund in Secondary Market transactions through brokers. Shares of the Fund will be listed for trading on the Secondary Market on the NYSE Arca. Shares can be bought and sold throughout the trading day like other publicly-traded shares. Unless imposed by your broker or dealer, there is no minimum dollar amount you must invest and no minimum number of Shares you must buy in the Secondary Market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the Secondary Market on each leg of a round trip (purchase and sale) transaction. In addition, because transactions in the Secondary Market occur at market prices, you may pay more than NAV when you buy Shares and receive less than NAV when you sell those Shares.

Share prices are reported in dollars and cents per Share. For information about buying and selling Shares in the Secondary Market, please contact your broker or dealer.

Book Entry

Shares of the Fund are held in book-entry form and no stock certificates are issued. DTC, through its nominee Cede & Co., is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants.

These procedures are the same as those that apply to any securities that you hold in book entry or "street name" form for any publicly-traded company. Specifically, in the case of a shareholder meeting of the Fund, DTC assigns applicable Cede & Co. voting rights to its participants that have Shares credited to their accounts on the record date, issues an omnibus proxy and forwards the omnibus proxy to the Fund. The omnibus proxy transfers the voting authority from Cede & Co. to the DTC participant. This gives the DTC participant through whom you own Shares (namely, your broker, dealer, bank, trust company or other nominee) authority to vote the shares, and, in turn, the DTC participant is obligated to follow the voting instructions you provide.

Management

The Board is responsible for the general supervision of the Fund. The Board appoints officers who are responsible for the day-to-day operations of the Fund.

Investment Advisor

The Advisor has been registered as an investment advisor with the SEC since August 2007, has provided investment advisory services to registered investment companies since June 2008, and is a wholly-owned indirect subsidiary of New York Life Investment Management Holdings LLC. The Advisor's principal office is located at 51 Madison Avenue, New York, New York 10010. As of December 31, 2022, the Advisor had approximately \$8.9 billion in assets under management.

The Advisor has overall responsibility for the general management and administration of the Trust. The Advisor provides an investment program for the Fund. The Advisor has arranged for custody, fund administration, transfer agency and all other non-distribution related services necessary for the Fund to operate.

As compensation for its services and its assumption of certain expenses, the Fund pays the Advisor a management fee equal to a percentage of the Fund's average daily net assets that is calculated daily and paid monthly, as follows:

<u>Fund Name</u>	<u>Management Fee</u>
IQ CBRE Real Assets ETF	0.65%

The Advisor may voluntarily waive any portion of its advisory fee from time to time, and may discontinue or modify any such voluntary limitations in the future at its discretion.

The Advisor serves as investment advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement") and the Subadvisor serves as investment subadvisor to the Fund pursuant to an Investment Subadvisory Agreement (the "Subadvisory Agreement"). The Advisory Agreement and Subadvisory Agreement were approved by the Independent Trustees of the Trust. A discussion regarding the basis for the Trustees' approval of the Advisory Agreement and Subadvisory Agreement will be available in the Trust's Annual Report to shareholders for the fiscal period ended April 30, 2023.

Section 15(a) of the 1940 Act requires that all contracts pursuant to which persons serve as investment advisors to investment companies be approved by shareholders. As interpreted, this requirement also applies to the appointment of any subadvisor to the Fund. The Advisor and the Trust have obtained an exemptive order (the "Order") from the SEC permitting the Advisor, on behalf of the Fund and subject to the approval of the Board, including a majority of the Independent Trustees, to hire or terminate unaffiliated subadvisors and to modify any existing or future subadvisory agreement with unaffiliated subadvisors without shareholder approval. This authority is subject to certain conditions. The Fund will notify shareholders and provide them with certain information required by the Order within 90 days of hiring a new subadvisor. The Fund's sole shareholder has approved the use of the Order. Please see the SAI for more information on the Order.

Expense Waiver/Reimbursement Agreement

The Advisor has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (excluding interest, taxes, brokerage commissions, dividend payments on short sales, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, other extraordinary expenses not incurred in the ordinary course of the Fund's business, and amounts, if any, payable pursuant to a plan adopted in accordance with Rule 12b-1 under the 1940 Act) to not more than 0.65% of the average daily net assets of the Fund. The agreement will remain in effect permanently unless terminated by the Board.

Subadvisor

Pursuant to the Subadvisory Agreement, CBRE Investment Management Listed Real Assets LLC ("CBRE" or the "Subadvisor") serves as the subadvisor to the Fund and makes investment decisions, and buys and sells securities for the Fund. For its services to the Fund, the Subadvisor is compensated by the Advisor. To the extent that the Advisor has agreed to waive its management fee or reimburse expenses, the Subadvisor has agreed to waive or reimburse its fee proportionately.

CBRE is an investment advisor registered with the SEC and manages investment portfolios for clients on a fully discretionary basis with a focus on real asset securities strategies including listed real estate, listed infrastructure, and midstream energy. CBRE is the listed real asset solution within CBRE Investment Management ("CBRE IM"),

a leading manager of real estate and infrastructure mandates. CBRE IM is owned by CBRE Group, Inc. ("CBRE Group"), the world's largest commercial real estate services and investment firm (based on 2020 revenue). CBRE Group is a publicly traded company with shares listed on the New York Stock Exchange (ticker symbol CBRE) and has been an S&P 500 company since 2006 and in 2020 was ranked #128 on the Fortune 500. CBRE IM's offerings are organized into five primary investment solutions: (1) direct private real estate; (2) indirect private real estate; (3) private infrastructure; (4) listed real assets; and (5) real estate credit. Listed real asset solutions are delivered through CBRE, a majority owned subsidiary. CBRE's main office is located at 555 East Lancaster Avenue, Suite 120, Radnor, Pennsylvania 19087. As of December 31, 2022, CBRE managed approximately \$9.9 billion in discretionary client assets for approximately 53 client accounts.

Portfolio Management

The Advisor acts as investment advisor to the Fund and is responsible for the overall management of the investment portfolios of the Fund. Under the supervision of the Advisor, the Subadvisor is responsible for making the specific decisions about the following: (i) buying, selling and holding securities; (ii) selecting brokers and brokerage firms to trade for them; (iii) maintaining accurate records; and, if possible, (iv) negotiating favorable commissions and fees with the brokers and brokerage firms for all the Fund it oversees. For these services, the Subadvisor is paid a monthly fee by the Advisor out of the Advisor's management fee, not the Fund. See the SAI for a breakdown of fees.

The portfolio managers that are jointly and primarily responsible for the day-to-day management of the Fund are: Jeremy Anagnos, CFA, Daniel Foley, CFA, Jonathan Miniman, CFA, and Joseph P. Smith, CFA. Additional information about each portfolio manager is as follows:

Jeremy Anagnos, CFA, Chief Investment Officer, Listed Infrastructure

Mr. Anagnos has served as portfolio manager of the Fund since its inception and joined CBRE in 2004. He is the architect and lead Portfolio Manager of the listed infrastructure strategies, including the flagship global strategy and the sustainable strategy. Prior to the merger with ING's listed real assets business in 2011, Mr. Anagnos served as Co-Chief Investment Officer of the firm's securities team, responsible for portfolio management of global real estate securities separate accounts and funds. He was a founder of the securities group at CBRE and managed the global 28-member investment and operations team. During his career, Mr. Anagnos has worked in various management and research positions in the real estate industry with LaSalle Investment Management in Baltimore/Amsterdam and Deutsche Bank in London. Mr. Anagnos has been in the real asset investment management industry since 1995. He has a BS from Boston College and is a Chartered Financial Analyst® ("CFA®") charterholder.

Daniel Foley, CFA, Portfolio Manager, Senior Vice President

Mr. Foley has served as portfolio manager of the Fund since its inception and joined CBRE in 2006. Mr. Foley has been in the financial industry since 2006 and in his tenure with CBRE, and its predecessor firm, he has gained extensive, multi-disciplined experience evaluating real asset securities spanning developed and emerging markets across the globe. During his long tenure with the firm, he has covered wide-ranging business models. Mr. Foley has an MBA from Villanova University and a BS from Drexel University. He is also a CFA® charterholder.

Jonathan Miniman, CFA, Global Portfolio Manager

Mr. Miniman has served as portfolio manager of the Fund since its inception and joined CBRE in 2002. Mr. Miniman is co-leader of the U.S. real estate securities research team. Prior to joining CBRE, Mr. Miniman worked as a trader at Group One Trading. Mr. Miniman has over 20 years of financial industry experience. He has a BS from Villanova University and is also a CFA® charterholder.

Joseph P. Smith, CFA, Chief Investment Officer, Listed Real Assets Strategies

Mr. Smith has served as portfolio manager of the Fund since its inception. Mr. Smith serves as the Chief Investment Officer, Listed Real Assets Division of CBRE Investment Management. He joined the listed real assets business that ultimately became part of CBRE Investment Management in 1997. Prior to that, Mr. Smith worked in various analyst positions in the real estate industry, including positions at Alex Brown & Sons and Radnor Advisors. He has over 30 years of real assets investment management experience. Mr. Smith has an MBA from the Wharton School, University of Pennsylvania and a BS from Villanova University. He is also a CFA® charterholder.

For more information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund, see the SAI.

Other Service Providers

Fund Administrator, Custodian, Transfer Agent and Securities Lending Agent

The Bank of New York Mellon ("BNY Mellon"), located at 240 Greenwich Street, New York, New York 10286, serves as the Fund's Administrator, Custodian, Transfer Agent and Securities Lending Agent. BNY Mellon is the principal operating subsidiary of The Bank of New York Mellon Corporation.

Distributor

ALPS Distributors, Inc. ("ALPS" or the "Distributor"), located at 1290 Broadway, Suite 1000, Denver, Colorado 80203 serves as the Distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a Secondary Market in the Fund's Shares. NYLIFE Distributors LLC has entered into a Services Agreement with ALPS to market the Fund.

Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP, located at 300 Madison Avenue, New York, NY 10017, serves as the independent registered public accounting firm for the Trust.

Legal Counsel

Chapman and Cutler LLP, located at 1717 Rhode Island Avenue, Washington, D.C. 20036, serves as counsel to the Trust and the Fund.

Frequent Trading

The Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares by Fund shareholders ("market timing"). In determining not to adopt market timing policies and procedures, the Board noted that the Fund is expected to be attractive to active institutional and retail investors interested in buying and selling Shares on a short-term basis. In addition, the Board considered that, unlike traditional mutual funds, Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants, and that the vast majority of trading in Shares occurs on the Secondary Market. Because Secondary Market trades do not involve the Fund directly, it is unlikely those trades would cause many of the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With respect to trades directly with the Fund, to the extent effected in-kind (namely, for securities), those trades do not cause any of the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution of the Fund and increased transaction costs (the Fund may impose higher transaction fees to offset these increased costs), which could negatively impact the Fund's ability to achieve its investment objective. However, the Board also noted that direct trading on a short-term basis by Authorized Participants is critical to ensuring that Shares trade at or close to NAV. Given this structure, the Board determined that it is not necessary to adopt market timing policies and procedures. The Fund reserves the right to reject any purchase order for any legally permissible reason at any time and reserves the right to impose restrictions on disruptive or excessive trading in Creation Units.

The Board has instructed the officers of the Trust to review reports of purchases and redemptions of Creation Units on a regular basis to determine if there is any unusual trading in the Fund. The officers of the Trust will report to the Board any such unusual trading in Creation Units that is disruptive to the Fund. In such event, the Board may reconsider its decision not to adopt market timing policies and procedures.

Distribution and Service Plan

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.10% of its average daily net assets each year to finance activities primarily intended to result in the sale of Creation Units of the Fund or the provision of investor services. No Rule 12b-1 fees are currently paid by the Fund and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, they will be paid out of the respective Fund's assets, and over time these fees will increase the cost of your investment and they may cost you more than certain other types of sales charges.

The Advisor and its affiliates may, out of their own resources, pay amounts ("Payments") to third-parties for distribution or marketing services on behalf of the Fund. The making of these payments could create a conflict of interest for a financial intermediary receiving such payments. The Advisor may make Payments for such

third-parties to organize or participate in activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about ETFs, including ETFs advised by the Advisor, or for other activities, such as participation in marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems ("Education Costs"). The Advisor also may make Payments to third-parties to help defray costs typically covered by a trading commission, such as certain printing, publishing and mailing costs or materials relating to the marketing of services related to exchange-traded products (such as commission-free trading platforms) or exchange-traded products in general ("Administrative Costs").

Determination of Net Asset Value (NAV)

The NAV of the Shares for the Fund is equal to the Fund's total assets minus its total liabilities divided by the total number of Shares outstanding. Interest and investment income on the Fund's assets accrue daily and are included in the Fund's total assets. Expenses and fees (including investment advisory, management, administration and distribution fees, if any) accrue daily and are included in the applicable Fund's total liabilities. The NAV that is published is rounded to the nearest cent; however, for purposes of determining the price of Creation Units, the NAV is calculated to five decimal places. The NAV is calculated by the Administrator and Custodian and determined each Business Day as of the close of regular trading on the NYSE Arca (ordinarily 4:00 p.m. Eastern time).

In calculating NAV, the Fund's investments are valued using market quotations when available. Equity securities are generally valued at the closing price of the security on the security's primary exchange. The primary exchanges for the Fund's foreign equity securities may close for trading at various times prior to close of regular trading on the NYSE Arca, and the value of such securities used in computing the Fund's NAV are generally determined as of such times. The Fund's foreign securities may trade on weekends or other days when Shares do not trade. Consequently, the value of portfolio securities of the Fund may change on days when Shares of the Fund cannot be purchased or sold.

When market quotations or prices are not readily available or are deemed unreliable or not representative of an investment's fair value, investments are valued using fair value pricing as determined in good faith by the Advisor under procedures established by and under the general supervision and responsibility of the Board. The Advisor may conclude that a market quotation is not readily available or is unreliable if a security or other asset or liability does not have a price source due to its lack of liquidity or other reason, if a market quotation differs significantly from recent price quotations or otherwise no longer appears to reflect fair value, where the security or other asset or liability is thinly traded, or if the trading market on which a security is listed is suspended or closed and no appropriate alternative trading market is available.

The frequency with which the Fund's investments are valued using fair value pricing is primarily a function of the types of securities and other assets in which the respective Fund invests pursuant to its investment objective, strategies and limitations. If the Fund invests in other open-end management investment companies registered under the 1940 Act, they may rely on the NAVs of those companies to value the shares they hold of them. Those companies may also use fair value pricing under some circumstances.

Valuing the Fund's investments using fair value pricing results in using prices for those investments that may differ from current market valuations. Accordingly, fair value pricing could result in a difference between the prices used to calculate NAV and the prices used to determine the Fund's indicative intra-day value ("IIV"), which could result in the market prices for Shares deviating from NAV.

Indicative Intraday Value

The approximate value of the Fund's investments on a per-Share basis, the Indicative Intra-Day Value, or IIV, is disseminated every 15 seconds during hours of trading on the NYSE Arca. The IIV should not be viewed as a "real-time" update of NAV because the IIV may not be calculated in the same manner as NAV, which is computed once per day.

An independent third-party calculator calculates the IIV for the Fund during hours of trading on the NYSE Arca by dividing the "Estimated Fund Value" as of the time of the calculation by the total number of outstanding Shares of the Fund. "Estimated Fund Value" is the sum of the estimated amount of cash held in the Fund's

portfolio, the estimated amount of accrued interest owed to the Fund and the estimated value of the securities held in the Fund's portfolio, minus the estimated amount of the Fund's liabilities. The IIV will be calculated based on the same portfolio holdings disclosed on the Trust's website.

The Fund provides the independent third-party calculator with information to calculate the IIV, but the Fund is not involved in the actual calculation of the IIV and is not responsible for the calculation or dissemination of the IIV. The Fund makes no warranty as to the accuracy of the IIV.

Premium/Discount Information

As of the date of this Prospectus, the Fund has not yet commenced operations and therefore has not accumulated information to report regarding the extent and frequency with which market prices of Shares have tracked the Fund's NAV.

Information regarding the extent and frequency with which market prices of Shares has tracked the relevant Fund's NAV for the most recently completed calendar year and the quarters since that year will be available without charge on the Fund's website at newyorklifeinvestments.com/etf.

Dividends, Distributions and Taxes

Net Investment Income and Capital Gains

As a Fund shareholder, you are entitled to your share of the Fund's distributions of net investment income and net realized capital gains on its investments. The Fund pays out substantially all of its net earnings to its shareholders as "distributions."

The Fund typically earns income dividends from stocks and interest from debt securities. These amounts, net of expenses, typically are passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains or losses whenever they sell securities. Net capital gains typically are passed along to shareholders as "capital gain distributions."

Net investment income and net capital gains typically are distributed to shareholders at least annually. Dividends may be declared and paid more frequently to comply with the distribution requirements of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). In addition, the Fund may decide to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period, in which case some portion of each distribution may result in a return of capital. You will be notified regarding the portion of a distribution that represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of the Fund only if the broker through which you purchased Shares makes such option available. Distributions which are reinvested nevertheless will be subject to U.S. federal income tax to the same extent as if such distributions had not been reinvested.

U.S. Federal Income Taxation

The following is a summary of certain U.S. federal income tax considerations applicable to an investment in Shares of the Fund. The summary is based on the Code, U.S. Treasury Department regulations promulgated thereunder, and judicial and administrative interpretations thereof, all as in effect on the date of this Prospectus and, all of which are subject to change, possibly with retroactive effect. In addition, this summary assumes that Fund shareholders hold Shares as capital assets within the meaning of the Code and do not hold Shares in connection with a trade or business. This summary does not address all potential U.S. federal income tax considerations possibly applicable to an investment in Shares of the Fund, and does not address the consequences to Fund shareholders subject to special tax rules, including, but not limited to, partnerships and the partners therein, tax-exempt shareholders, regulated investment companies ("RICs", real estate investment trusts ("REITS"), real estate mortgage investment conduits ("REMICs"), those who hold Shares through an IRA, 401(k) plan or other tax-advantaged account, and, except to the extent discussed below, "non-U.S. shareholder" (as defined below). This discussion does not discuss any aspect of U.S. state, local, estate, gift, or non-U.S. tax law. Furthermore, this discussion is not intended or written to be legal or tax advice to any shareholder in the Fund or other person and is not intended or written to be used or relied on, and cannot be used or relied on, by any such person for the purpose of avoiding any U.S. federal tax penalties that may be imposed on such person. Prospective Fund shareholders are urged to consult their own tax advisors with respect to the specific U.S. federal, state, local and non-U.S. tax consequences of investing in Shares, based on their particular circumstances.

The Fund has not requested and will not request an advance ruling from the U.S. Internal Revenue Service (the "IRS") as to the U.S. federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. Prospective investors should consult their own tax advisors with regard to the U.S. federal tax consequences of the purchase, ownership and disposition of Shares, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country or other taxing jurisdiction. The following information supplements and should be read in conjunction with the section in the SAI entitled "U.S. Federal Income Taxation."

Tax Treatment of the Fund

The Fund intends to qualify and elect to be treated as a separate RIC under the Code. To qualify and remain eligible for the special tax treatment accorded to RICs, the Fund must meet certain annual income and quarterly asset diversification requirements and must distribute annually at least 90% of the sum of (i) its "investment company taxable income" (which includes dividends, interest and net short-term capital gains) and (ii) certain net tax-exempt income, if any.

As a RIC, the Fund generally will not be required to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that it distributes to its shareholders. If the Fund fails to qualify as a RIC for any year (subject to certain curative measures allowed by the Code), the Fund will be subject to regular corporate-level U.S. federal income tax in that year on all of its taxable income, regardless of whether the Fund makes any distributions to its shareholders. In addition, in such case, distributions will be taxable to the Fund's shareholders generally as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. The remainder of this discussion assumes that the Fund will qualify for the special tax treatment accorded to RICs.

The Fund generally will be subject to a 4% excise tax on certain undistributed income if the Fund does not distribute to its shareholders in each calendar year an amount at least equal to the sum of 98% of its ordinary income for the calendar year (taking into account certain deferrals and elections), 98.2% of its capital gain net income (adjusted for certain ordinary losses) for the twelve months ended October 31 of such year (or later if the Fund is permitted to elect and so elects), plus 100% of any undistributed amounts from prior years. For these purposes, the Fund will be treated as having distributed any amount on which it has been subject to U.S. corporate income tax for the taxable year ending within the calendar year. The Fund intends to make distributions necessary to avoid this 4% excise tax, although there can be no assurance that it will be able to do so.

The Fund may be required to recognize taxable income in advance of receiving the related cash payment. For example, if the Fund invests in original issue discount obligations (such as zero coupon debt instruments or debt instruments with payment-in-kind interest), the Fund will be required to include in income each year a portion of the original issue discount that accrues over the term of the obligation, even if the related cash payment is not received by the Fund until a later year. Under the "wash sale" rules, the Fund may not be able to deduct currently a loss on a disposition of a portfolio security. As a result, the Fund may be required to make an annual income distribution greater than the total cash actually received during the year. Such distribution may be made from the existing cash assets of the Fund or cash generated from selling portfolio securities. The Fund may realize gains or losses from such sales, in which event its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Tax Treatment of Fund Shareholders

Taxation of U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "U.S. shareholders." For purposes of this discussion, a "U.S. shareholder" is a beneficial owners of Shares who, for U.S. federal income tax purposes, is (i) an individual who is a citizen or resident of the United States; (ii) a corporation (or an entity treated as a corporation for U.S. federal income tax purposes) created or organized in the United States or under the laws of the United States, or of any state thereof, or the District of Columbia; (iii) an estate, the income of which is includable in gross income for U.S. federal income tax purposes regardless of its source; or (iv) a trust, if (1) a U.S. court is able to exercise primary supervision over the administration of such trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (2) the trust has a valid election in place to be treated as a U.S. person.

Fund Distributions. In general, Fund distributions are subject to U.S. federal income tax when paid, regardless of whether they consist of cash or property, and regardless of whether they are reinvested in Shares. However, any Fund distribution declared in October, November or December of any calendar year and payable to

shareholders of record on a specified date during such month will be deemed to have been received by the Fund shareholder on December 31 of such calendar year, provided such dividend is actually paid during January of the following calendar year.

Distributions of the Fund's net investment income and net short-term capital gains in excess of net long-term capital losses (collectively referred to as "ordinary income dividends") are taxable as ordinary income to the extent of the Fund's current and accumulated earnings and profits (subject to an exception for distributions of "qualified dividend income," as discussed below). Some portion of the ordinary income distributions that are attributable to dividends received by the Fund from shares in certain real estate investment trusts may be designated by the Fund as eligible for a deduction for qualified business income, provided certain holding period requirements are satisfied. To the extent designated as capital gain dividends by the Fund, distributions of the Fund's net long-term capital gains in excess of net short-term capital losses ("net capital gain") are taxable at long-term capital gain tax rates to the extent of the Fund's current and accumulated earnings and profits, regardless of a Fund shareholder's holding period in the Fund's Shares. Distributions of "qualified dividend income" (defined below) are, to the extent of the Fund's current and accumulated earnings and profits, taxed to certain non-corporate Fund shareholders at the rates generally applicable to long-term capital gain, provided that the Fund shareholder meets certain holding period and other requirements with respect to the distributing Fund's Shares and the distributing Fund meets certain holding period and other requirements with respect to its dividend-paying stocks. For this purpose, "qualified dividend income" generally means income from dividends received by the Fund from U.S. corporations and qualified non-U.S. corporations. Distributions with respect to shares in real estate investment trusts are qualifying dividends only in limited circumstances. Substitute payments received on Shares that are lent out will be ineligible for being reported as qualified dividend income. If the Fund pays a dividend that would be "qualified" dividend income for individuals, corporate shareholders may be entitled to a dividends received deduction.

An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

The Fund intends to distribute its net capital gain at least annually. However, by providing written notice to its shareholders no later than 60 days after its year-end, the Fund may elect to retain some or all of its net capital gain and designate the retained amount as a "deemed distribution." In that event, the Fund pays U.S. federal income tax on the retained net capital gain, and each Fund shareholder recognizes a proportionate share of the Fund's undistributed net capital gain. In addition, each Fund shareholder can claim a tax credit or refund for the shareholder's proportionate share of the Fund's U.S. federal income taxes paid on the undistributed net capital gain and increase the shareholder's tax basis in the Shares by an amount equal to the shareholder's proportionate share of the Fund's undistributed net capital gain, reduced by the amount of the shareholder's tax credit or refund.

Distributions in excess of the Fund's current and accumulated earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholders tax basis in its Shares of the Fund, and generally as capital gain thereafter. Any such distribution will reduce the shareholder's tax basis in the Shares, and thus will increase the shareholder's capital gain, or decrease the capital loss, recognized upon a sale or exchange of Shares.

In addition, individuals with adjusted gross incomes above certain threshold amounts (and certain trusts and estates) generally are subject to a 3.8% Medicare tax on net investment income in addition to otherwise applicable U.S. federal income tax. "Net investment income" generally will include dividends (including capital gain dividends) received from the Fund and net gains from the redemption or other disposition of Shares. Please consult your tax advisor regarding this tax.

If the Fund is a "qualified fund of funds" (i.e., a RIC at least 50% of the value of the total assets of which, at the close of each quarter of the taxable year, is represented by interests in other RICs) or more than 50% of the Fund's total assets at the end of a taxable year consist of non-U.S. stock or securities, the Fund may elect to "pass through" to its shareholders certain non-U.S. income taxes paid by the Fund. This means that each shareholder will be required to (i) include in gross income, even though not actually received, the shareholder's pro rata share of the Fund's non-U.S. income taxes, and (ii) either take a corresponding deduction (in calculating U.S. federal taxable income) or credit (in calculating U.S. federal income tax), subject to certain limitations.

Investors considering buying Shares just prior to a distribution should be aware that, although the price of the Shares purchased at such time may reflect the forthcoming distribution, such distribution nevertheless may be taxable (as opposed to a non-taxable return of capital).

Sales or Exchange of Shares. Any capital gain or loss realized upon a sale or exchange of Shares (including an exchange of Shares of one Fund for Shares of another Fund) generally is treated as a long-term gain or loss if the Shares have been held for more than one year. Any capital gain or loss realized upon a sale or exchange of Shares held for one year or less generally is treated as a short-term gain or loss, except that any capital loss on the sale or exchange of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to the Shares. An election may be available to you to defer recognition of capital gain if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Creation Unit Issues and Redemptions. On an issue of Shares of the Fund as part of a Creation Unit where the creation is conducted in-kind, an Authorized Participant generally recognizes capital gain or loss (assuming the Authorized Participant does not hold the securities as inventory) equal to the difference between (i) the fair market value (at issue) of the issued Shares (plus any cash received by the Authorized Participant as part of the issue) and (ii) the Authorized Participant's aggregate basis in the exchanged securities (plus any cash paid by the Authorized Participant as part of the issue). On a redemption of Shares as part of a Creation Unit where the redemption is conducted in-kind, an Authorized Participant recognizes capital gain or loss (assuming the Authorized Participant does not hold the securities as inventory) equal to the difference between (i) the fair market value (at redemption) of the securities received (plus any cash received by the Authorized Participant as part of the redemption) and (ii) the Authorized Participant's basis in the redeemed Shares (plus any cash paid by the Authorized Participant as part of the redemption). However, the IRS may assert, under the "wash sale" rules or on the basis that there has been no significant change in the Authorized Participant's economic position, that any loss on creation or redemption of Creation Units cannot be deducted currently.

In general, any capital gain or loss recognized upon the issue or redemption of Shares (as components of a Creation Unit) is treated either as long-term capital gain or loss, if the deposited securities (in the case of an issue) or the Shares (in the case of a redemption) have been held for more than one year, or otherwise as short-term capital gain or loss. However, any capital loss on a redemption of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to such Shares.

Back-Up Withholding. The Fund (or a financial intermediary such as a broker through which a shareholder holds Shares in the Fund) may be required to report certain information on the Fund shareholder to the IRS and withhold U.S. federal income tax ("backup withholding") at a current rate of 24% from taxable distributions and redemption or sale proceeds payable to the Fund shareholder if (i) the Fund shareholder fails to provide the Fund with a correct taxpayer identification number or make required certifications, or if the IRS notifies the Fund that the Fund shareholder is otherwise subject to backup withholding, and (ii) the Fund shareholder is not otherwise exempt from backup withholding. Non-U.S. shareholders can qualify for exemption from backup withholding by submitting a properly completed IRS Form W-8BEN or W-8BEN-E. Backup withholding is not an additional tax and any amount withheld may be credited against the Fund shareholder's U.S. federal income tax liability.

Taxation of Non-U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "non-U.S. shareholders." For purposes of this discussion, a "non-U.S. shareholder" is a beneficial owner of Shares that is not a U.S. shareholder (as defined above) and is not an entity or arrangement treated as a partnership for U.S. federal income tax purposes. The following discussion is based on current law and is for general information only. It addresses only selected, and not all, aspects of U.S. federal income taxation applicable to non-U.S. shareholders.

With respect to non-U.S. shareholders of the Fund, the Fund's ordinary income dividends generally will be subject to U.S. federal withholding tax at a rate of 30% (or at a lower rate established under an applicable tax treaty), subject to certain exceptions for "interest-related dividends" and "short-term capital gain dividends" discussed below. The Fund will not pay any additional amounts to shareholders in respect of any amounts withheld.

U.S. federal withholdings tax generally will not apply to any gain realized by a non-U.S. shareholder in respect of the Fund's net capital gain. Special rules (not discussed herein) apply with respect to dividends of the Fund that are attributable to gain from the sale or exchange of "U.S. real property interests."

In general, all "interest-related dividends" and "short-term capital gain dividends" (each defined below) will not be subject to U.S. federal withholding tax, provided that, among other requirements, the non-U.S. shareholder furnished the Fund with a completed IRS Form W8BEN or W-8BEN-E, as applicable, (or acceptable substitute documentation) establishing the non-U.S. shareholder's non-U.S. status and the Fund does not have actual knowledge or reason to know that the non-U.S. shareholder would be subject to such withholding tax if the non-U.S. shareholder were to receive the related amounts directly rather than as dividends from the Fund. "Interest-related dividends" generally means dividends designated by the Fund as attributable to such Fund's U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which such Fund is at least a 10% shareholder, reduced by expenses that are allocable to such income. "Short-term capital gain dividends" generally means dividends designated by the Fund as attributable to the excess of such Fund's net short-term capital gain over its net long-term capital loss. Depending on its circumstances, the Fund may treat such dividends, in whole or in part, as ineligible for these exemptions from withholding.

For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an "applicable corporation" subject to a 15% minimum tax on adjusted financial statement income.

In general, subject to certain exceptions, non-U.S. shareholders will not be subject to U.S. federal income or withholdings tax in respect of a sale or other disposition of Shares of the Fund.

To claim a credit or refund for any Fund-level taxes on any undistributed net capital gain (as discussed above) or any taxes collected through back-up withholdings (discussed above), a non-U.S. shareholder must obtain a U.S. taxpayer identification number and file a U.S. federal income tax return even if the non-U.S. shareholder would not otherwise be required to do so.

Foreign Account Tax Compliance Act. The U.S. Foreign Account Tax Compliance Act ("FATCA") generally imposes a 30% withholding tax on "withholdable payments" (defined below) made to (i) a "foreign financial institution" ("FFI"), unless the FFI enters into an agreement with the IRS to provide information regarding certain of its direct and indirect U.S. account holders and satisfies certain due diligence and other specified requirements, and (ii) a "non-financial foreign entity" ("NFFE") unless such NFFE provides certain information about its direct and indirect "substantial U.S. owners" to the withholding agent or certifies that it has no such U.S. owners. The beneficial owner of a "withholdable payment" may be eligible for a refund or credit of the withheld tax. The U.S. government also has entered into intergovernmental agreements with other jurisdictions to provide an alternative, and generally easier, approach for FFIs to comply with FATCA. If the shareholder is a tax resident in a jurisdiction that has entered into an intergovernmental agreement with the U.S. government, the shareholder will be required to provide information about the shareholder's classification and compliance with the intergovernmental agreement.

"Withholdable payments" generally include, among other items, U.S.-source interest and dividends, and gross proceeds from the sale or disposition of property of a type that can produce U.S.-source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

The Fund or a shareholder's broker may be required to impose a 30% withholding tax on withholdable payments to a shareholder if the shareholder fails to provide the Fund with the information, certifications or documentation required under FATCA, including information, certification or documentation necessary for the Fund to determine if the shareholder is a non-U.S. shareholder or a U.S. shareholder and, if it is a non-U.S. shareholder, if the non-U.S. shareholder has "substantial U.S. owners" and/or is in compliance with (or meets an exception from) FATCA requirements. The Fund will not pay any additional amounts to shareholders in respect of any amounts withheld. The Fund may disclose any shareholder information, certifications or documentation to the IRS or other parties as necessary to comply with FATCA.

The requirements of, and exceptions from, FATCA are complex. All prospective shareholders are urged to consult their own tax advisors regarding the potential application of FATCA with respect to their own situation.

For a more detailed tax discussion regarding an investment in the Fund please see the section of the SAI entitled "U.S. Federal Income Taxation."

Code of Ethics

The Trust, Advisor, Subadvisor and Distributor each have adopted a code of ethics under Rule 17j-1 of the 1940 Act that is designed to prevent affiliated persons of the Trust, the Advisor, the Subadvisor and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to a code). There can be no assurance that the codes will be effective in preventing such activities.

The codes permit personnel subject to them to invest in securities, including securities that may be held or purchased by the Fund. The codes are on file with the SEC and are available to the public.

Fund Website and Disclosure of Portfolio Holdings

The Advisor maintains a website for the Fund at newyorklifeinvestments.com/eff. The website for the Fund contains the following information, on a per-Share basis, for the Fund: (1) the prior Business Day's NAV; (2) the reported mid-point of the bid-ask spread at the time of NAV calculation (the "Bid-Ask Price"); (3) a calculation of the premium or discount of the Bid-Ask Price against such NAV; and (4) data in chart format displaying the frequency distribution of discounts and premiums of the Bid-Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters (or for the life of the Fund if, shorter). In addition, on each Business Day, before the commencement of trading in Shares on the NYSE Arca, the Fund will disclose on its website (newyorklifeinvestments.com/eff) the identities and quantities of the portfolio securities and other assets held by the Fund that will form the basis for the calculation of NAV at the end of the Business Day.

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the SAI.

Other Information

The Fund is not sponsored, endorsed, sold or promoted by the NYSE Arca. The NYSE Arca makes no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the Fund to achieve its objectives. NYSE Arca has no obligation or liability in connection with the administration, marketing or trading of the Fund.

For purposes of the 1940 Act, the Fund is treated as a registered investment company, and the acquisition of shares by other registered investment companies and companies relying on Sections 3(c)(1) and 3(c)(7) of the 1940 Act is subject to the restrictions of Section 12(d)(1) of the 1940 Act and the related rules and interpretations.

Financial Highlights

Financial highlights are not presented for the Fund since the Fund has not commenced operations.

Privacy Policy

The following notice does not constitute part of the Prospectus, nor is it incorporated into the Prospectus.

The Trust is committed to respecting the privacy of personal information you entrust to us in the course of doing business with us.

The Trust may collect non-public personal information from various sources. The Trust uses such information provided by you or your representative to process transactions, to respond to inquiries from you, to deliver reports, products, and services, and to fulfill legal and regulatory requirements.

We do not disclose any non-public personal information about our customers to anyone unless permitted by law or approved by the customer. We may share this information within the Trust's family of companies in the course of providing services and products to best meet your investing needs. We may share information with certain third-parties who are not affiliated with the Trust to perform certain business administration and related business services, such as processing transactions or servicing accounts, or as permitted by law. For example, we may share information with a company that maintains or services customer accounts for the Trust. When we enter into such a relationship, we restrict the company's use of our customers' information and prohibit them from sharing it or using it for any purposes other than those for which they were hired.

We maintain physical, electronic, and procedural safeguards to protect your personal information. Within the Trust, we restrict access to personal information to those employees who require access to that information in order to provide products or services to our customers, such as handling inquiries. Our employment policies restrict the use of customer information and require that it be held in strict confidence.

We will adhere to the policies and practices described in this notice for both current and former customers of the Trust.
