

INDEXIQ ETF TRUST
INDEXIQ ACTIVE ETF TRUST
(the “Trusts” and each series of the Trusts, a “Fund”)

Supplement dated December 17, 2020 (“Supplement”)
to each Fund’s Summary Prospectus and Prospectus dated August 28, 2020
(each, a “Prospectus”)

Capitalized terms and certain other terms used in this Supplement, unless otherwise defined in this Supplement, have the meanings assigned to them in the Prospectus.

Effective immediately, for each Fund, the first paragraph in the “Fees and Expenses of the Fund” section of the Prospectus is deleted in its entirety and replaced with the following:

This table describes fees and expenses that you may pay if you buy, sell or hold shares of the Fund (“Shares”). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Effective immediately, the first paragraph in the “Purchase and Sale of Fund Shares” section of the Prospectus is deleted in its entirety and replaced with the following:

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called “Creation Units.” Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund’s Shares may trade at a price greater than (premium) or less than (discount) the Fund’s NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information, including the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com

Investors Should Retain this Supplement for Future Reference

IndexIQ ETF Trust

Summary Prospectus

August 28, 2020

IQ Chaikin U.S. Large Cap ETF **CLRG**

This summary prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's full prospectus, which contains more information about the Fund and its risks. The Fund's full prospectus dated August 28, 2020 and statement of additional information dated August 28, 2020, and most recent annual report to shareholders, dated April 30, 2020, are all incorporated by reference into this Summary Prospectus. All this information may be obtained at no cost either: online at nylinvestments.com/etfs/resources/prospectus; by calling IndexIQ Funds at 888-474-7725 or by sending an email request to info@indexiq.com

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

CLRG LISTED ON NASDAQ | CUSIP # 45409B388

A NEW YORK LIFE INVESTMENTS COMPANY

Summary Information

IQ Chaikin U.S. Large Cap ETF

Investment Objective

The Fund seeks investment results that track (before fees and expenses) the price and yield performance of its underlying index, the Nasdaq Chaikin Power US Large Cap Index (the "Underlying Index").

Fees and Expenses of the Fund

This table describes fees and expenses that you may pay if you buy and hold shares of the Fund ("Shares"). Most investors will incur customary brokerage commissions when buying or selling Shares of the Fund, which are not reflected in the table set forth below.

Shareholder Fees (fees paid directly from your investment):

None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fee	0.25%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.01%
Total Annual Fund Operating Expenses	0.26%
Expense Waiver/Reimbursement ^(a)	<u>0.01%</u>
Total Annual Fund Operating Expenses After Waiver/Reimbursement	<u>0.25%</u>

(a) IndexIQ Advisors LLC has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.25% of the average daily net assets of the Fund. The agreement will remain in effect until August 31, 2021 unless terminated by the Board of Trustees.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or

performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$26	\$83	\$145	\$330

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 58% of the average value of the portfolio. This rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's Shares.

Principal Investment Strategies

The Fund employs a "passive management" — or indexing — investment approach designed to track the performance of the Underlying Index, which has been developed by Nasdaq, Inc. (the "Index Provider"). The Underlying Index applies the Chaikin Power Gauge®, a quantitative multi-factor model that seeks to identify securities that are expected to outperform peers, to select securities from the Nasdaq US 300 Index (the "Parent Index"). The Parent Index is a modified capitalization-weighted index of U.S. large-capitalization securities. The Underlying Index is an equally weighted index of large-capitalization securities. As of June 30, 2020, the market capitalization range of the Underlying Index is approximately \$10.5 billion to \$1,543.3 billion. As of June 30, 2020, the primary sectors within the Underlying Index are consumer discretionary, financials, health care, information technology and financials. The composition of the Underlying Index may change over time.

The Underlying Index uses the Chaikin Power Gauge to select securities from the Parent Index. The Chaikin Power Gauge is a multi-factor model that evaluates four primary components:

- Value component (35% of rating), which uses factors such as long term debt to equity ratio, price to book ratio, and free cash flow to identify companies that are priced at a discount relative to peers;
- Growth component (20% of rating), which uses factors such as earnings growth, earnings trend, and earnings consistency to identify companies with higher growth potential;
- Technical component (15% of rating), which uses factors such as price trend, price trend rate of change, and volume trend to identify stocks with strong momentum and price appreciation; and

- Sentiment component (30% of rating), which uses factors such as earnings estimate trend, short interest, and industry relative strength to identify companies that are expected to outperform peers by informed Wall Street analysts and professionals.

The Chaikin Power Gauge seeks to identify each security's current potential to outperform or underperform compared with peers.

To be selected for inclusion in the Underlying Index, a security must rank in the least volatile two-thirds of the Parent Index based on a calculation of its volatility over the prior year period and its sensitivity to the performance of the equity market (as measured by its beta) over the previous five year period.

The security types eligible for inclusion in the Underlying Index include common stocks and real estate investment trusts ("REITs"). The Underlying Index rebalances and reconstitutes annually and typically consists of up to 100 securities based on the Chaikin Power Gauge ranking. The Underlying Index selection criteria uses sector constraints to maintain exposure to the different sectors within a range of 80% to 120% of the weight of the sector in the Parent Index.

The Fund generally will invest in all of the securities that comprise its Underlying Index in proportion to their weightings in the Underlying Index. The Fund has adopted a policy to invest, under normal circumstances, at least 80% of the value of its assets (net assets plus the amount of any borrowings for investment purposes) in securities of large-capitalization U.S. issuers.

The Fund may invest in one or more ETFs advised by the Advisor ("Affiliated ETFs") that are not components of the index if such an investment will help the Fund track the Underlying Index.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. You should consider carefully the following risks before investing in the Fund.

Authorized Participant Concentration Risk

Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an "Authorized Participant"). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market

participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund's third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Equity Securities Risk

Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Focused Investment Risk

To the extent that a Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Index Risk

There is no guarantee that the Fund's investment results will have a high degree of correlation to those of the Underlying Index or that the Fund will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its

exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

Industry/Sector Concentration Risk

The Fund's investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated.

Consumer Discretionary Sector Risk

Companies in the consumer discretionary sector may be adversely affected by, among other things, the performance of domestic and international economies, exchange and interest rates, worldwide demand, competition, consumer confidence, consumers' disposable income levels, propensity to spend and consumer preferences, social trends and marketing campaigns.

Financial Sector Risk

Companies in the financial sector may be adversely affected by, among other things, government regulations, economic conditions, credit rating downgrades, changes in currency exchange rates, volatile interest rates, decreased liquidity in credit markets and competition from new entrants. Profitability of these companies is largely dependent on the availability and cost of capital and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers also can negatively impact the sector. These companies are often subject to substantial government regulation and intervention, which may adversely impact the scope of their activities, the prices they can charge, the amount of capital they must maintain and, potentially, their size. The impact of more stringent capital requirements, or recent or future regulation in various countries on any individual financial company or on the financial sector as a whole cannot be predicted. The financial sector is also a target for cyber attacks and may experience technology malfunctions and disruptions.

These companies are often subject to substantial government regulation and intervention, which may adversely impact the scope of their activities, the prices they can charge, the amount of capital they must maintain and, potentially, their size. The impact of more stringent capital requirements, or recent or future regulation in various countries

on any individual financial company or on the financial sector as a whole cannot be predicted. The financial sector is also a target for cyber attacks and may experience technology malfunctions and disruptions.

Health Care Sector Risk

Companies in the health care sector may be adversely affected by, among other things, extensive, costly and uncertain government regulation, restrictions on government reimbursement for medical expenses, product obsolescence, increased emphasis on outpatient services, limited number of products and fluctuations in the costs of medical products. Many health care companies are heavily dependent on intellectual property protection, and the expiration of a company's patent may impact that company's profitability. Many health care companies are subject to extensive litigation based on product liability and similar claims. Health care companies are subject to competitive forces that may make it difficult to raise prices and, in fact, may result in price discounting. Many new products in the health care sector may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly with no guarantee that any product will come to market.

Information Technology Sector Risk

Companies in the information technology sector may be adversely affected by, among other things, domestic and international market competition, obsolescence due to rapid technological developments, new product introduction, unpredictable growth rates and competition for qualified personnel. Aggressive pricing and reduced profit margins, intellectual property rights protections, cyclical market patterns and evolving industry standards and government regulations may also impact information technology companies. The market prices of information technology securities may exhibit a greater degree of market risk and more frequent, sharp price fluctuations than other types of securities. These securities may fall in and out of favor with investors rapidly, which may cause sudden selling and dramatically lower market prices.

Investment Style Risk

The Underlying Index seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Underlying Index will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure.

Large-Capitalization Companies Risk

Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

Market Risk

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund's value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Passive Management Risk

The Fund is not actively managed and instead seeks to track the performance of an index. Passive management has the following risks associated with it:

- The Fund invests in the securities included in, or representative of, the Underlying Index. The provider of the Underlying Index or the index calculation agent may make errors. The index provider may include

index constituents that should have been excluded, or it may exclude index constituents that should have been included. It also may include or exclude constituents at incorrect levels. This may result in the Fund, in turn, being correctly positioned to an index that has been incorrectly calculated. This could lead to losses to the Fund.

- In seeking to track the Underlying Index's performance, the Fund may be subject to tracking error, which is the divergence of the Fund's performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund's portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security's price at the local market close and the Fund's valuation of a security at the time of calculation of the Fund's NAV), differences in transaction costs, the Fund's holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass-through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. This risk may be heightened during times of increased market volatility or other unusual market conditions.
- The Fund generally will not attempt to take defensive positions in declining markets and generally will not sell a security because its issuer is in financial trouble, unless that security is removed from (or was no longer useful in tracking a component of) the Underlying Index.

Secondary Market Trading Risk

Although the Fund's Shares are listed for trading on one or more securities exchanges, there can be no assurance that an active trading market for such Shares will develop or be maintained by market makers or Authorized Participants. In general, the trading of Shares on securities exchanges is subject to the risk of irregular trading activity and wide "bid/ask" spreads (which may be especially pronounced for smaller funds). Additionally, market makers are under no obligation to make a market in the Fund's Shares and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund's Shares or Authorized Participants stop submitting purchase or redemption orders for Creation Units, the Fund's Shares may trade at a larger premium or discount to its NAV. Wide bid-ask

spreads and large premiums or discounts to NAV are likely to lead to an investor buying his or her shares at a market price that is more than their value, and selling those shares at a market price that is less than their value.

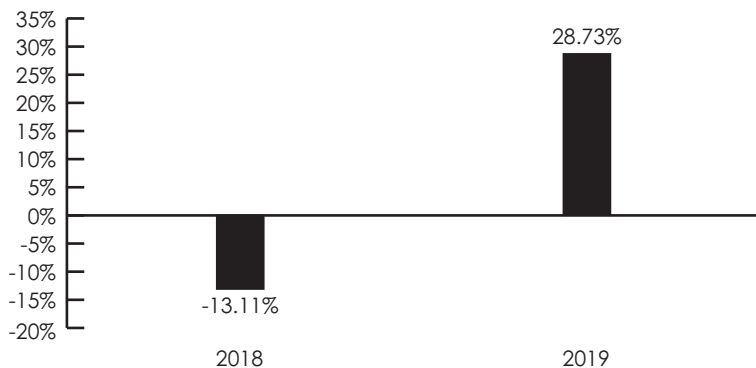

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund's portfolio holdings or NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Performance Information

The bar chart that follows shows the annual total returns of the Fund for a full calendar year. The table that follows the bar chart shows the Fund's average annual total return, both before and after taxes. The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for one calendar year compared with its underlying index and additional broad measures of market performance. The Nasdaq Chaikin US Large Cap Index is a rules-based, quantitative index, designed to enhance an existing index by selecting stocks with the highest Chaikin Power Gauge rating. The S&P 500[®] Index is widely regarded as the standard index for measuring large-cap U.S. stock market performance. The NASDAQ US 300 Index includes up to the 300 largest securities in the NASDAQ US Large Cap Index, a float-adjusted market capitalization-weighted index, designed to track the performance of securities in NASDAQ US Benchmark Index that comprises the large-cap segment of companies.

All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Performance reflects fee waivers and/or expense reimbursement in effect, if such waivers or reimbursements were not in place, the Fund's performance would be reduced. Fund performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting nylinvestments.com/etfs.

The Fund's year-to-date total returns as of June 30, 2020 was -12.94%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	10.75%	1Q/2019
Lowest Return	-17.16%	4Q/2018

Average Annual Total Returns as of December 31, 2019

	1 Year	Since Inception ⁽¹⁾
Returns before taxes	28.73%	5.86%
Returns after taxes on distributions ⁽²⁾	27.53%	5.16%
Returns after taxes on distributions and sales of Fund Shares ⁽²⁾	16.95%	4.25%
NASDAQ Chaikin Power US Large Cap Index (reflects no deduction for fees, expenses or taxes)	29.17%	6.16%
S&P 500 Total Return Index (reflects no deduction for fees, expenses or taxes)	30.70%	11.38%
NASDAQ US 300 Total Return Index (reflects no deduction for fees, expenses or taxes)	31.84%	12.28%

(1) The Fund commenced operations on December 13, 2017.

(2) After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your Shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund Shares at the end of the measurement period.

Investment Advisor

IndexIQ Advisors LLC (the "Advisor") is the investment advisor to the Fund.

Portfolio Manager

The professionals jointly and primarily responsible for the day-to-day management of the Fund are Greg Barrato and James Harrison. Mr. Barrato, Senior Vice President of the Advisor, has been a portfolio manager of the Fund since its inception and Mr. Harrison, Vice President of the Advisor, has been a portfolio manager of the Fund since April 2018.

Purchase and Sale of Fund Shares

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in blocks of 50,000 Shares or whole multiples thereof ("Creation Units"). The Fund's Creation Units are issued and redeemed principally in-kind for securities included in the Fund. Retail investors may acquire Shares on the Nasdaq through a broker-dealer.

Shares of the Fund will trade at market price rather than NAV. As such, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

Tax Information

The Fund's distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
