This summary prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund’s full prospectus, which contains more information about the Fund and its risks. The Fund’s full prospectus dated October 11, 2021 and statement of additional information dated October 11, 2021 are all incorporated by reference into this Summary Prospectus. All this information may be obtained at no cost either: online at newyorklifeinvestments.com/documents; by calling IndexIQ Funds at 888-474-7725 or by sending an email request to info@indexiq.com

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund’s shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

EQUL LISTED ON NYSE ARCA | CUSIP # 45409B313

* Shares of the Fund are not issued, sponsored or endorsed by Girls Who Code Inc.
Summary Information

IQ Engender Equality ETF
In alignment with Girls Who Code Inc.®*

Investment Objective
The Fund seeks investment results that correspond (before fees and expenses) generally to the price and yield performance of its underlying index, the Solactive Equileap US Select Gender Equality Index (the “Underlying Index”).

Fees and Expenses of the Fund
This table describes fees and expenses that you may pay if you buy, sell or hold shares of the Fund (“Shares”). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Shareholder Fees (fees paid directly from your investment):
None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management Fee</td>
<td>0.45%</td>
</tr>
<tr>
<td>Distribution and/or Service (12b-1) Fees</td>
<td>0.00%</td>
</tr>
<tr>
<td>Other Expenses *(a)</td>
<td>0.01%</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expenses</strong></td>
<td><strong>0.46%</strong></td>
</tr>
<tr>
<td>Expense Waiver/Reimbursement *(b)</td>
<td>0.01%</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expenses After</strong></td>
<td><strong>0.45%</strong></td>
</tr>
<tr>
<td>Waiver/Reimbursement</td>
<td></td>
</tr>
</tbody>
</table>

*(a) The Fund has not yet commenced operations and Other Expenses are based on estimated amounts for the current fiscal year.

*(b) IndexIQ Advisors LLC (the “Advisor”) has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits “Total Annual Fund Operating Expenses” (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.45% of the average daily net assets of the Fund. The agreement will remain in effect until August 31, 2022 unless terminated by the Board of Trustees of the Fund.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

* Shares of the Fund are not issued, sponsored or endorsed by Girls Who Code Inc.®
The example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$46</td>
<td>$147</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities or other instruments. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. The Fund is newly organized and, as of the date of the Prospectus, has not yet commenced operations.

**Principal Investment Strategies**

The Fund employs a “passive management” — or indexing — investment approach designed to track the performance of the Underlying Index, which was developed by Solactive A.G. (“Solactive” or the “Index Provider”) and Equileap (“Equileap”). Solactive constructs the Underlying Index using the Equileap Score, which is calculated based on data and the scoring methodology developed and produced by Equileap. The Underlying Index is designed to track the U.S. large-, mid- and small-capitalization companies that have the highest Equileap Score. The criteria and factors used to calculate the Equileap Score are in alignment with initiatives, research and programs of Girls Who Code Inc., a 501(c)(3) public charity, (“Girls Who Code®”).

The index universe consists of the 1000 largest companies in the U.S. stock market. The Underlying Index includes an exclusionary screen that excludes companies that derive certain minimum amounts of revenue from:

- Unconventional Fossil Fuels: excluding companies with more than 5% revenue exposure to coal mining and power generation, hydraulic fracturing, oil & sands, and deep water drilling;
- Nuclear Energy: excluding companies with more than 10% of revenues derived from production, distribution or supports of products related to nuclear energy;
• Controversial Businesses: excluding companies with more than 10% revenue exposure to gambling, adult entertainment, alcoholic beverages and tobacco products, cannabis or military equipment;

• Controversial Weapons: excluding companies with any exposure to anti-personnel mines, biological and chemical weapons, cluster munitions, depleted uranium, and nuclear weapons; or

• Norms Based Research: excluding companies with verified infringement of established international initiatives and guidelines, including the Ten Principles of the United Nations Global Compact and Organisation for Economic Co-operation and Development (OECD) Guidelines, and other reports, research and guidelines from third-party organizations.

The Underlying Index also excludes companies for a period of one year if, in the past two years the company has engaged in a pattern of unethical business practices involving discrimination against employees, which can include gender/sex, pay, maternity, or pregnancy discrimination, and unethical practices in the company's marketing and advertisement.

After the exclusionary screens have been applied, all remaining securities are ranked according to the Equileap Score. A company’s Equileap Score is derived by assigning a weight of 40% to how the company scores on gender balance in leadership and workforce, a weight of 30% to how the company scores on equal compensation and work life balance, a weight of 20% to how the company scores on policies promoting gender equality and a weight of 10% to how the company scores on commitment, transparency and accountability. Equileap determines a company’s Equileap Score based upon its analysis of publicly available information, including annual reports, Corporate Social Responsibility reports, and other information available on the website of the company. Additionally, Equileap may obtain information from questionnaires sent to companies and will take those responses into account when Equileap is able to link the information to a publicly available source.

**Gender Balance in Leadership & Workforce**

• Non-Executive Board: Percentage of male and female as a proportion of the total number of non-executive board members.

• Executives: Percentage of male and female executives as a proportion of the total number of executives.

• Senior Management: Percentage of male and female senior management, as a proportion of the total number of senior management.
• Workforce: Percentage of male and female employees at the company, as a percentage of total employees.

• Promotion & Career Development Opportunities: Ratio of male and female employees in management compared to ratio of each gender in total employees.

**Equal Compensation & Work Life Balance**

• Fair Remuneration: Commitment to ensure payment of a fair wage to all employees.

• Equal Pay: Commitment to provide comparable wages, hours, and benefits, including retirement benefits, for all employees for comparable work.

• Parental Leave: Paid leave programs for child and dependent care to both women and men (maternity leave, paternity leave, dependent care).

• Flexible Work Options: Option for employees to control and/or vary the start/end times of the work-day and/or vary the location from which employees work.

**Policies Promoting Gender Equality**

• Training and Career Development: Ensures equal access to training and career development.

• Recruitment Strategy: Commitment to ensure non-discrimination against any type of demographic group.

• Freedom from Violence, Abuse and Sexual Harassment: Prohibit all forms of violence in the workplace, including verbal, physical and sexual harassment.

• Safety at Work: Commitment to the safety of employees in the workplace and company-related travel.

• Human Rights: Commitment to ensure the protection of the rights of all people it works with including employees’ rights to participate in legal, civic and political affairs.

• Social Supply Chain: Commitment to reduce social risks in its supply chain such as forbidding business-related activities that condone, support, or otherwise participate in human trafficking, including for labor or sexual exploitation.

• Supplier Diversity: Commitment to ensure gender diversity in the supply chain, including a focus to ensure female-owned businesses in the supply chain.
• Employee Protection: Systems and policies for the reporting of internal ethical compliance complaints without retaliation or retribution, including but not limited to access to confidential third-party ethics hotlines or systems for confidential written complaints.

Commitment, Transparency & Accountability

• Commitment to Women’s Empowerment: Recognition and commitment to ensuring women’s empowerment in the workplace.

• Audit: Undertaken and awarded an independent gender audit certificate by an Equileap-recognized body.

The Underlying Index consists of the 75 securities with the highest Equileap Score, subject to constraints on component turnover and industry exposure. The Underlying Index is equally weighted and rebalanced quarterly.

As of September 30, 2021, the market capitalization range of the Underlying Index was approximately $6.8 billion to $2.1 trillion. As of September 30, 2021, the primary sectors within the Underlying Index are consumer discretionary, consumer staples, financials, healthcare and information technology.

The Fund also may invest in one or more ETFs advised by the Advisor (“Affiliated ETFs”) that are not components of the index if such an investment will help the Fund track the Underlying Index.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund’s Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, the Advisor or any of its affiliates. You should consider carefully the following risks before investing in the Fund.

Authorized Participant Concentration Risk

Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an “Authorized Participant”). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.
Cyber Security Risk
The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund’s third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Equity Securities Risk
Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors’ perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer’s common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders’ claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Focused Investment Risk
To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund’s investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Index Risk
There is no guarantee that the Fund’s investment results will have a high degree of correlation to those of the Underlying Index or that the Fund will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund’s ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.
Industry/Sector Concentration Risk
The Fund’s investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund’s investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated.

Consumer Discretionary Sector Risk
Companies in the consumer discretionary sector may be adversely affected by, among other things, the performance of domestic and international economies, exchange and interest rates, worldwide demand, competition, consumer confidence, consumers’ disposable income levels, propensity to spend and consumer preferences, social trends and marketing campaigns.

Consumer Staples Sector Risk
Companies in the consumer staples sector may be adversely affected by, among other things, changes in domestic and international economies, exchange and interest rates, worldwide demand, competition, consumers’ disposable income levels, propensity to spend and consumer preferences, social trends and marketing campaigns. Companies in the consumer staples sector have historically been characterized as relatively cyclical and therefore more volatile in times of change.

Financial Sector Risk
Companies in the financial sector may be adversely affected by, among other things, government regulations, economic conditions, credit rating downgrades, changes in currency exchange rates, volatile interest rates, decreased liquidity in credit markets and competition from new entrants. Profitability of these companies is largely dependent on the availability and cost of capital and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers also can negatively impact the sector. These companies are often subject to substantial government regulation and intervention, which may adversely impact the scope of their activities, the prices they can charge, the amount of capital they must maintain and, potentially, their size. The impact of more stringent capital requirements, or recent or future regulation in various countries on any individual financial company or on the financial sector as a whole cannot be predicted. The financial sector is also a target for cyber attacks and may experience technology malfunctions and disruptions.
Health Care Sector Risk
Companies in the health care sector may be adversely affected by, among other things, extensive, costly and uncertain government regulation, restrictions on government reimbursement for medical expenses, product obsolescence, increased emphasis on outpatient services, limited number of products and fluctuations in the costs of medical products. Many health care companies are heavily dependent on intellectual property protection, and the expiration of a company’s patent may impact that company’s profitability. Many health care companies are subject to extensive litigation based on product liability and similar claims. Health care companies are subject to competitive forces that may make it difficult to raise prices and, in fact, may result in price discounting. Many new products in the health care sector may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly with no guarantee that any product will come to market.

Information Technology Sector Risk
Companies in the information technology sector may be adversely affected by, among other things, domestic and international market competition, obsolescence due to rapid technological developments, new product introduction, unpredictable growth rates and competition for qualified personnel. Aggressive pricing and reduced profit margins, intellectual property rights protections, cyclical market patterns and evolving industry standards and government regulations may also impact information technology companies. The market prices of information technology securities may exhibit a greater degree of market risk and more frequent, sharp price fluctuations than other types of securities. These securities may fall in and out of favor with investors rapidly, which may cause sudden selling and dramatically lower market prices.

Investment Style Risk
The Underlying Index seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Underlying Index will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure. The degree to which the Underlying Index accurately or optimally utilizes the investment style is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the factors relevant to a particular investment.
• **Gender Equality Investing Style Risk.** The returns on a portfolio of securities that excludes companies that have not adopted the gender diversity and inclusion practices and policies may trail the returns on a portfolio of securities that includes companies that have not adopted these practices and policies. Investing only in a portfolio of securities that are gender diverse may affect the Fund’s exposure to certain types of investments and may adversely impact the Fund’s performance depending on whether such investments are in or out of favor in the market.

• **ESG Investing Style Risk.** The Underlying Index seeks to provide exposure to the equity securities of companies meeting environmental, social and corporate governance investing criteria. The Underlying Index excludes or limits exposure to securities of certain issuers for non-financial reasons, and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of environmental, social and corporate governance investing criteria may affect the Fund’s exposure to certain sectors or types of investments and may impact the Fund’s relative investment performance depending on whether such sectors or investments are in or out of favor in the market. In addition, there is no guarantee that the construction methodology of the Underlying Index will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria.

**Issuer Risk**

The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes to the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Large-Capitalization Companies Risk**

Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

**Market Risk**

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund’s value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy,
and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the U.S. and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

**Mid-Capitalization Companies Risk**
Mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

**New Fund Risk**
The Fund is a new fund. As a new fund, there can be no assurance that it will grow to or maintain an economically viable size, in which case it could ultimately liquidate.

**Operational Risk**
The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund’s service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

**Passive Management Risk**
The Fund is not actively managed and instead seeks to track the performance of an Index. Passive management has the following risks associated with it:

- The Fund invests in the securities included in, or representative of, the Underlying Index. The provider of the Index or the Index calculation agent may make errors. The Index provider may include Index constituents that should have been excluded, or it may exclude Index constituents that should have been included. It also may include or exclude constituents at incorrect levels. This may result in the Fund, in turn, being correctly positioned to an Index that has been incorrectly calculated. This could lead to losses to the Fund.
• In seeking to track the Index’s performance, the Fund may be subject to tracking error, which is the divergence of the Fund’s performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund’s portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security’s price at the local market close and the Fund’s valuation of a security at the time of calculation of the Fund’s NAV), differences in transaction costs, the Fund’s holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass-through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. This risk may be heightened during times of increased market volatility or other unusual market conditions.

• The Fund generally will not attempt to take defensive positions in declining markets and generally will not sell a security because its issuer is in financial trouble, unless that security is removed from (or was no longer useful in tracking a component of) the Underlying Index.

Portfolio Turnover Risk
The Fund’s strategy may frequently involve buying and selling portfolio securities to rebalance the Fund’s investment exposures. High portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund’s performance to be less than expected.

Small-Capitalization Companies Risk
Small-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

Trading Price Risk
Shares of the Fund trade on securities exchanges at prices at, above or below the Fund’s most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund’s holdings. The trading price of the Fund’s Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund’s portfolio holdings or NAV. As a result, the trading prices of the Fund’s Shares
may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund’s Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund’s NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Performance Information
As of the date of this Prospectus, the Fund has not yet completed a full calendar year of operations and therefore does not report its performance information. The Fund’s performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting newyorklifeinvestments.com.

Investment Advisor
IndexIQ Advisors LLC is the investment advisor to the Fund.

Portfolio Manager
The professionals jointly and primarily responsible for the day-to-day management of the Fund are Greg Barrato and James Harrison. Mr. Barrato, Senior Vice President of the Advisor, has been a portfolio manager of the Fund since inception and Mr. Harrison, Vice President of the Advisor, has been a portfolio manager of the Fund since inception.

Purchase and Sale of Fund Shares
Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called “Creation Units.” Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund’s Shares may trade at a price greater than (premium) or less than (discount) the Fund’s NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information, including the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com.

Tax Information
The Fund’s distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.
Financial Intermediary Compensation
If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

The Fund is offered by IndexIQ, the Fund’s sponsor, in alignment with Girls Who Code Inc. ("GWC"). The Fund is designed to promote investment objectives that are deemed to be consistent with GWC’s mission. Shares of the Fund are not sponsored, endorsed or promoted by GWC, and GWC is not an investment adviser or service provider to the Fund. GWC makes no representations or warranties regarding the performance of the Fund and will have no obligation or liability in connection with the Fund. The Fund’s sponsor, IndexIQ, and its affiliates are supporters of and donors to GWC and are making a substantial contribution to GWC in connection with GWC’s agreement to license use of its name and trademarks to IndexIQ and its affiliates. New York Life Investment Management LLC ("NYLIM") and IndexIQ’s contribution to GWC is calculated on an annualized basis to be the lower of: (i) 0.045% of the Fund’s average daily net managed assets (the average daily value of the total assets of the Fund, less all accrued liabilities of the Fund and less any management fees waived by the Fund’s adviser); or (ii) ten percent of the Fund’s net annual management fee taking into account all applicable fee waivers and expense reimbursements. NYLIM and IndexIQ will make annual minimum contributions to GWC of $25,000 in each of the years 2021 to 2025 so long as their commercial co-venture is in effect.
