Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). Since May 31, 2016, the price used to calculate the market price returns ("MP") is the mean between the day's last bid and ask prices on the fund's primary exchange. Any market price returns prior to May 31, 2016 were calculated using the day's closing price on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

\*As stated in the Fund's prospectus, the management fee of 0.45% is expressed as a unitary fee to cover expenses incurred in connection with managing the portfolio.

Performance reflects a contractual fee waiver and/or expense limitation agreement in effect through 8/31/22, without which total returns may have been lower. This agreement renews automatically for one-year terms unless written notice is provided before the start of the next term or upon approval of the Board.

\*\*Largest company composition may differ due to shares outstanding used in market calculation.

\*\*\*Index dividend yield is the weighted average of every index constituent's dividend yield, which is calculated by dividing the dollar value of dividends paid in a certain year per share of stock held by the dollar value of one share of stock.

### Before considering an investment in the Fund, you should understand that you could lose money.

Shares of the Fund are not sponsored, endorsed or promoted by American Heart Association, Inc. ("AHA"). The Fund's sponsor, IndexIQ, and its affiliates are donors to and supporters of AHA's Social Impact Fund and are making a substantial contribution to the Social Impact Fund in connection with AHA's agreement to license use of its name and trademarks to IndexIQ and its affiliates. AHA makes no representation or warranty, express or implied, to prospective or actual investors in the Fund or to any member of the public regarding the advisability of investing in any financial product, including one seeking to track the Underlying Index, the ability of the Fund to track the performance of the Underlying Index, the ability of the Underlying Index to meet or exceed stock market performance, the suitability of the Fund or the ability of the Underlying Index or Fund to achieve its investment goals. AHA has no obligation or liability in connection with the administration, marketing or trading of shares of the Fund. AHA is not an investment adviser or a fund distributor or service provider. Inclusion of a security within the Underlying Index is not a recommendation by AHA to buy, sell or hold such security, nor is it considered to be investment advice or a guarantee that the investment goals of the Underlying Index will be achieved. AHA does not guarantee the accuracy and/or the completeness of the Underlying Index or any data included therein.

**Principal Risks** - Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. As with all investments, you may lose money in the Fund. New Fund Risk the Fund is a new fund. As a new fund, there can be no assurance that it will grow to or maintain an economically viable size, in which case it could ultimately liquidate. Equity Securities Risk Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer. Large-Capitalization Companies Risk Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets. Small- and/or Mid-Capitalization Companies Risk Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies. Foreign Investing Risk Foreign securities can be subject to greater risks than U.S. investments, including currency fluctuations, less liquid trading markets, greater price volatility, political and economic instability, less publicly available information, and changes in tax or currency laws or monetary policy. These risks are likely to be greater for emerging markets than in developed markets. Passive Management Risk. The Fund is not actively managed and instead seeks to track the performance of an Index.

The IQ Candriam Healthy Hearts Index seeks to provide investors with exposure to select companies that are involved in the diagnosis and/or treatment of heart disease, or that provide goods or services that allow people to adopt or maintain a healthy lifestyle.

The MSCI ACWI Index is an unmanaged free-float-adjusted market-capitalization-weighted index designed to measure the equity market performance of developed and emerging markets.

The MSCI World Health Care Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets in the health-care sector.

<sup>††</sup>A satellite position is a specialist investment which seeks to achieve additional alpha outside of a portfolio's core holdings, which typically seek to achieve market-rate returns. ESG means Environmental, Social and Governance.
