This summary prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund’s full prospectus, which contains more information about the Fund and its risks. The Fund’s full prospectus dated January 12, 2021 and statement of additional information dated January 12, 2021, are all incorporated by reference into this Summary Prospectus. All this information may be obtained at no cost either: online at newyorklifeinvestments.com/documents; by calling IndexIQ Funds at 888-474-7725 or by sending an email request to info@indexiq.com.

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund’s shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.
Summary Information

IQ Healthy Hearts ETF

In alignment with American Heart Association®

Investment Objective
The Fund seeks investment results that correspond (before fees and expenses) generally to the price and yield performance of its underlying index, the IQ Candriam Healthy Hearts Index (the “Underlying Index”).

Fees and Expenses of the Fund
This table describes fees and expenses that you may pay if you buy, sell or hold shares of the Fund (“Shares”). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Shareholder Fees (fees paid directly from your investment):
None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

<table>
<thead>
<tr>
<th>Expense Description</th>
<th>0.45%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management Fee</td>
<td></td>
</tr>
<tr>
<td>Distribution and/or Service (12b-1) Fees</td>
<td>0.00%</td>
</tr>
<tr>
<td>Other Expenses(a)</td>
<td>0.01%</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Total Annual Fund Operating Expenses</th>
<th>0.46%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expense Waiver/Reimbursement(b)</td>
<td>0.01%</td>
</tr>
</tbody>
</table>

| Total Annual Fund Operating Expenses After Expense Waiver/Reimbursement | 0.45% |

(a) The Fund has not yet commenced operations and Other Expenses are based on estimated amounts for the current fiscal year.

(b) IndexIQ Advisors LLC (the “Advisor”) has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits “Total Annual Fund Operating Expenses” (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.45% of the average daily net assets of the Fund. The agreement will remain in effect until August 31, 2022 unless terminated by the Board of Trustees of the Fund.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels.
The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$46</td>
<td>$146</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**
The Fund pays transaction costs, such as commissions, when it buys and sells securities or other instruments. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. The Fund is newly organized and, as of the date of the Prospectus, has not yet commenced operations.

**Principal Investment Strategies**
The Fund employs a “passive management” — or indexing — investment approach designed to track the performance of the Underlying Index, which was developed by IndexIQ LLC (“IndexIQ”) with Candriam Belgium S.A. (“Candriam”) acting as index consultant to IndexIQ. The Underlying Index incorporates thematic selection criteria designed to provide exposure to equity securities of companies that are making a positive contribution to global health-related goals, such as by providing solutions for monitoring and curing heart diseases or helping people adopt a healthy lifestyle that limits cardiovascular risks. As of December 31, 2020, the primary sectors within the Underlying Index are health care, consumer staples and technology. The Underlying Index includes securities of large-, mid- and small-capitalization companies that trade in the U.S. and foreign markets, including emerging markets other than China, Egypt, India, Kuwait, Pakistan, Qatar, Saudi Arabia and United Arab Emirates. As of December 31, 2020, the market capitalization range of the Underlying Index was approximately $1.14 billion to $2.25 trillion. The initial universe for the Underlying Index consists of the constituents of a third-party index designed to track the performance of the investable universe covering approximately the largest 99% of the free-float market capitalization in the global markets.

The Underlying Index includes thematic selection criteria developed by IndexIQ and Candriam that reflect initiatives, research and programs of the American Heart Association, Inc., a 501(c)(3) public charity, (“American Heart Association®”). Each of the thematic screens addresses issues or
areas historically supported by the American Heart Association®. The American Heart Association® is the nation’s oldest and largest voluntary organization dedicated to fighting heart disease and stroke.

The thematic selection criteria used by the Underlying Index to identify and score companies for potential inclusion in the Index are:

- Diagnosis and/or treatment of cardiovascular diseases, such as atherosclerosis, thrombosis, heart attack and vascular surgery;
- Manufacturing and distribution of healthy food;
- Manufacturing and distribution of wellness products;
- Providing services allowing people to access information about health and thereby make better informed decisions; and
- Providing solutions for people to track their fitness and engage in healthy lifestyle.

Each eligible company is assigned a score between 0-10 for determining which constituents are to be included in the Underlying Index. This scoring is based upon either: (i) the percentage or dollar value of revenue that the company derives from activities relevant to the theme; or (ii) a measure of the impact a company’s activity has on the theme.

The security selection process also includes an exclusionary screen based on any continued and significant non-compliance with the principles within the United Nation’s Global Compact as well as the exclusion of companies engaged in certain businesses beyond minimum thresholds (e.g., companies that operate in countries with oppressive regimes, that operate in adult content, alcohol, vaping, armament, gambling, nuclear, and tobacco and non-research, non-prescription or recreational cannabis sectors, or that utilize animal testing or genetic modification in research and development).

Following the application of the exclusionary screens, the Underlying Index selects the top-ranked 50 to 80 companies for inclusion based on the thematic selection criteria scoring. The number of companies selected for inclusion in the Underlying Index will vary depending on the number of companies that exceed the thematic screening score required for inclusion in the Underlying Index.

Securities selected for inclusion in the Underlying Index are weighted using a modified market capitalization-weighting methodology, with a minimum component weight of 0.5% and maximum component weight of 5% at the time of rebalance.

The Underlying Index is rebalanced quarterly. The Underlying Index applies the exclusionary screen on a monthly basis and any company identified in the exclusionary screen is removed from the Underlying Index. The
Underlying Index may include as a component one or more ETFs advised by the Advisor ("Affiliated ETFs") and the Fund will typically invest in any Affiliated ETF included in the Underlying Index. The Fund also may invest in Affiliated ETFs that are not components of the index if such an investment will help the Fund track the Underlying Index.

For additional information about the Fund’s principal investment strategies, see “Description of the Principal Strategies of the Fund.”

Principal Risks
Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund’s Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk and the Fund does not represent a complete investment program. As with all investments, you may lose money in the Fund.

An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund. A more complete discussion of Principal Risks is included under “Description of the Principal Risks of the Fund.”

Authorized Participant Concentration Risk
Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an “Authorized Participant”). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Currency Risk
Investments directly in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad.
Cyber Security Risk
The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund’s third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Depositary Receipts Risk
Sponsored and unsponsored depositary receipts involve risk not experienced when investing directly in the equity securities of an issuer. Depositary receipts may be less liquid than the underlying shares in their primary trading market. Any distributions paid to the holders of depositary receipts are usually subject to a fee charged by the depositary. Holders of depositary receipts may have limited voting rights, and investment restrictions in certain countries may adversely impact the value of depositary receipts.

Emerging Markets Securities Risk
Securities of issuers based in countries with developing economies (emerging market countries) may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed market countries and are generally considered speculative in nature. Emerging market countries are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets, rapid inflation, possible repatriation of investment income and capital, currency convertibility issues, less uniform accounting standards and more governmental limitations on foreign investment than more developed markets. Laws regarding foreign investment in emerging market securities, securities regulation, title to securities, and shareholder rights may change quickly and unpredictably. In addition, the enforcement of systems of taxation at federal, regional and local levels in emerging market countries may be inconsistent and subject to sudden change.

Equity Securities Risk
Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors’ perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing
costs increase. Holders of an issuer’s common stock may be subject to
greater risks than holders of its preferred stock and debt securities because
common stockholders’ claims are subordinated to those of holders of
preferred stocks and debt securities upon the bankruptcy of an issuer.

Focused Investment Risk
To the extent that the Fund invests a large percentage of its assets in a
single asset class or the securities of issuers within the same country, group
of countries, region, industry, group of industries or sector, an adverse
economic, market, political or regulatory development may affect the
value of the Fund’s investments more than if the Fund were more broadly
diversified. Different asset classes, countries, groups of countries, regions,
industries, groups of industries or sectors tend to go through cycles of
outperformance and underperformance in comparison to each other and
to the general financial markets.

Foreign Securities Risk
Investments in the securities of non-U.S. issuers involve risks beyond those
associated with investments in U.S. securities. These additional risks include
greater market volatility, the availability of less reliable financial
information, higher transactional and custody costs, taxation by foreign
governments, decreased market liquidity and political instability. Some
countries and regions have experienced security concerns, war or threats
of war and aggression, terrorism, economic uncertainty, natural and
environmental disasters and/or systemic market dislocations that have led,
and in the future may lead, to increased short-term market volatility and
may have adverse long-term effects on the U.S. and world economies and
markets generally. Foreign issuers are often subject to less stringent
requirements regarding accounting, auditing, financial reporting and
record keeping than are U.S. issuers, and therefore not all material
information will be available. Securities exchanges or foreign governments
may adopt rules or regulations that may negatively impact the Fund’s
ability to invest in foreign securities or may prevent the Fund from
repatriating its investments. Less developed securities markets are more
likely to experience problems with the clearing and settling of trades, as
well as the holding of securities by local banks, agents and depositories.
The less developed a country’s securities market is, the greater the
likelihood of custody problems.

Foreign Securities Valuation Risk
The Fund’s value may be impacted by events that cause the fair value of
foreign securities to materially change between the close of the local
exchange on which they trade and the time at which the Fund prices its
Shares. Additionally, because foreign exchanges on which securities held
by the Fund may be open on days when the Fund does not price its Shares,
the potential exists for the value of the securities in the Fund’s portfolio to
change on days when shareholders will not be able to purchase or sell the Fund’s Shares. **To the extent the Fund calculates its NAV based on fair value prices and the value of the Underlying Index is based on the securities’ closing price on foreign securities markets (i.e., the value of the Underlying Index is not based on fair value prices), the valuation of the Fund’s NAV may deviate from the calculation of the Underlying Index.**

**Geographic Concentration Risk**

The Fund may invest a substantial amount of its assets in securities of issuers located in a single country or geographic region. As a result, any changes to the regulatory, political, social or economic conditions in such country or geographic region will generally have greater impact on the Fund than such changes would have on a more geographically diversified fund and may result in increased volatility and greater losses. This risk may be especially pronounced to the extent the Fund invests in countries and regions experiencing, or likely to experience, security concerns, war, threats of war, terrorism, economic uncertainty and natural disasters.

**Index Risk**

There is no guarantee that the Fund’s investment results will have a high degree of correlation to those of the Underlying Index or that the Fund will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund’s ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

• **Industry/Sector Concentration Risk.** The Fund’s investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund’s investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated.

• **Health Care Sector Risk.** Companies in the health care sector may be adversely affected by, among other things, extensive, costly and uncertain government regulation, restrictions on government reimbursement for medical expenses, product obsolescence, increased emphasis on outpatient services, limited number of products and fluctuations in the costs of medical products. Many health care companies are heavily dependent on intellectual property protection, and the expiration of a company’s patent may impact that company’s profitability. Many health care companies
are subject to extensive litigation based on product liability and similar claims. Health care companies are subject to competitive forces that may make it difficult to raise prices and, in fact, may result in price discounting. Many new products in the health care sector may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly with no guarantee that any product will come to market.

- **Consumer Goods Sector Risk.** Companies in the consumer goods sector may be adversely affected by, among other things, changes in domestic and international economies, exchange and interest rates, worldwide demand, competition, consumers’ disposable income levels, propensity to spend and consumer preferences, social trends and marketing campaigns. Companies in the consumer goods sector have historically been characterized as relatively cyclical and therefore more volatile in times of change.

- **Information Technology Sector Risk.** Companies in the information technology sector may be adversely affected by, among other things, domestic and international market competition, obsolescence due to rapid technological developments, new product introduction, unpredictable growth rates and competition for qualified personnel. Aggressive pricing and reduced profit margins, intellectual property rights protections, cyclical market patterns and evolving industry standards and government regulations may also impact information technology companies. The market prices of information technology securities may exhibit a greater degree of market risk and more frequent, sharp price fluctuations than other types of securities. These securities may fall in and out of favor with investors rapidly, which may cause sudden selling and dramatically lower market prices.

**Investment Style Risk**

The Underlying Index seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Underlying Index will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure. The degree to which the Underlying Index accurately or optimally utilizes the investment style is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the factors relevant to a particular investment.
• **Health-Related Investing Style Risk.** Companies involved in health and wellness activities include companies that diagnose and treat diseases, operate gyms and fitness/wellness facilities as well as companies that provide, manufacture or distribute natural/organic foods, sports/fitness equipment, wearable fitness technology, fitness/athletic apparel, nutritional supplements, anti-aging products and dietary services. The risks related to investing in such companies include rapid changes in medical and pharmaceutical advancements, consumer trends, social trends, marketing campaigns, and consumers’ disposable income. The customers and/or suppliers of health-related companies may be concentrated in a particular country, region or industry. Any adverse event affecting one of these countries, regions or industries could have a negative impact on health and wellness companies.

• **ESG Investing Style Risk.** The Underlying Index seeks to provide exposure to the equity securities of companies meeting environmental, social and corporate governance investing criteria. The Underlying Index excludes or limits exposure to securities of certain issuers for non-financial reasons, and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of environmental, social and corporate governance investing criteria may affect the Fund’s exposure to certain sectors or types of investments and may impact the Fund’s relative investment performance depending on whether such sectors or investments are in or out of favor in the market. In addition, there is no guarantee that the construction methodology of the Underlying Index will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria.

**Issuer Risk**
The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes to the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Large-Capitalization Companies Risk**
Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.
Market Risk
Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund’s value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the U.S. and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

New Fund Risk
The Fund is a new fund. As a new fund, there can be no assurance that it will grow to or maintain an economically viable size, in which case it could ultimately liquidate.

Operational Risk
The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund’s service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Passive Management Risk
The Fund is not actively managed and instead seeks to track the performance of an Index. Passive management has the following risks associated with it:

• The Fund invests in the securities included in, or representative of, the Underlying Index. The provider of the Index or the Index calculation agent may make errors. The Index provider may include Index constituents that should have been excluded, or it may exclude Index constituents that should have been included. It also may include or exclude constituents at incorrect levels. This may result in the Fund, in turn, being correctly positioned to an Index that has been incorrectly calculated. This could lead to losses to the Fund.
• In seeking to track the Index’s performance, the Fund may be subject to tracking error, which is the divergence of the Fund’s performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund’s portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security’s price at the local market close and the Fund’s valuation of a security at the time of calculation of the Fund’s NAV), differences in transaction costs, the Fund’s holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass-through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. This risk may be heightened during times of increased market volatility or other unusual market conditions.

• The Fund generally will not attempt to take defensive positions in declining markets and generally will not sell a security because its issuer is in financial trouble, unless that security is removed from (or was no longer useful in tracking a component of) the Underlying Index.

Portfolio Turnover Risk
The Fund’s strategy may frequently involve buying and selling portfolio securities to rebalance the Fund’s investment exposures. High portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund’s performance to be less than expected.

Small- and/or Mid-Capitalization Companies Risk
Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

Trading Price Risk
Shares of the Fund trade on securities exchanges at prices at, above or below the Fund’s most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund’s holdings. The trading price of the Fund’s Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund’s portfolio holdings or NAV. As a result, the trading prices of the Fund’s Shares
may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund’s Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund’s NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Performance Information
As of the date of this Prospectus, the Fund has not yet completed a full calendar year of operations and therefore does not report its performance information. The Fund’s performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting newyorklifeinvestments.com.

Investment Advisor
IndexIQ Advisors LLC is the investment advisor to the Fund.

Portfolio Manager
The professionals jointly and primarily responsible for the day-to-day management of the Fund are Greg Barrato and James Harrison. Mr. Barrato, Senior Vice President of the Advisor, has been a portfolio manager of the Fund since inception and Mr. Harrison, Vice President of the Advisor, has been a portfolio manager of the Fund since inception.

Purchase and Sale of Fund Shares
Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called “Creation Units.” Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund’s Shares may trade at a price greater than (premium) or less than (discount) the Fund’s NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information, including the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com/etf.

Shares of the Fund will trade at market price rather than NAV. As such, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).
Tax Information
The Fund’s distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation
If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Shares of the Fund are not sponsored, endorsed or promoted by American Heart Association, Inc. (“AHA”). The Fund’s sponsor, IndexIQ, and its affiliates are donors to and supporters of AHA’s Social Impact Fund and are making a substantial contribution to the Social Impact Fund. AHA makes no representation or warranty, express or implied, to prospective or actual investors in the Fund or to any member of the public regarding the advisability of investing in any financial product, including one seeking to track the Underlying Index, the ability of the Fund to track the performance of the Underlying Index, the ability of the Underlying Index to meet or exceed stock market performance, the suitability of the Fund or the ability of the Underlying Index or Fund to achieve its investment goals. AHA has no obligation or liability in connection with the administration, marketing or trading of shares of the Fund. AHA is not an investment adviser or a fund distributor or service provider. Inclusion of a security within the Underlying Index is not a recommendation by AHA to buy, sell or hold such security, nor is it considered to be investment advice or a guarantee that the investment goals of the Underlying Index will be achieved. AHA does not guarantee the accuracy and/or the completeness of the Underlying Index or any data included therein.
