IQ MacKay ESG High Income ETF (IQHI)

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

Not FDIC Insured | May Lose Value | No Bank Guarantee

IndexIQ Active ETF Trust (the “Trust”) is a registered investment company that consists of separate investment portfolios, each of which is called a “Fund.” This Prospectus relates to the following Fund:

<u>Name</u>	<u>CUSIP</u>	<u>Symbol</u>	<u>Exchange</u>
IQ MacKay ESG High Income ETF	45409F736	IQHI	NYSE Arca

The Fund is an exchange-traded fund. This means that shares of the Fund are listed on a national securities exchange (the “Exchange”) and trade at market prices. The market price for the Fund’s shares may be different from its net asset value per share (the “NAV”). The Fund has its own CUSIP number and exchange trading symbol.

Summary Information

IQ MacKay ESG High Income ETF

Investment Objective

The IQ MacKay ESG High Income ETF (the "Fund") seeks to maximize current income, while incorporating the Subadvisor's ESG investment strategy.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund ("Shares"). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Shareholder Fees (fees paid directly from your investment):

None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fee	0.40%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ^(a)	0.11%
Total Annual Fund Operating Expenses^(b)	0.51%
Expense Waiver/Reimbursement ^(b)	0.11%
Total Annual Fund Operating Expenses After Expense Waiver/Reimbursement	0.40%

(a) The Fund has not yet commenced operations and Other Expenses are based on estimated amounts for the current fiscal year.

(b) IndexIQ Advisors LLC (the "Advisor") has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.40% of the average daily net assets of the Fund. The agreement will remain in effect permanently unless terminated by the Board of Trustees of the Fund.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$41	\$128

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. The Fund is newly organized and, as of the date of the Prospectus, has not yet commenced operations.

Principal Investment Strategies

The Fund seeks to achieve its investment objective through investments in debt instruments offering attractive levels of yield. This Fund expects to invest primarily in U.S. corporate debt securities, non-U.S. corporate debt securities, convertible corporate securities, loans and loan participation interests that are rated below investment grade by a nationally recognized statistical rating organization ("NRSRO") or that are unrated but are considered to be of comparable quality by MacKay Shields LLC (the "Subadvisor"). Securities that are rated below investment grade by NRSROs (such as securities rated lower than BBB- and Baa3) are commonly referred to as "high-yield securities" or "junk bonds." If NRSROs assign different ratings to the same instrument for

purposes of determining the security's credit quality, the Fund will use the middle rating when three NRSROs rate the security. For securities where only two NRSROs rate the security, the Fund will use the lower rating. If only one rating is available for a security, the Fund will use that rating. The Fund may invest without limitation in below investment grade securities.

Under normal circumstances, the Fund will invest at least 80% of its assets in instruments that meet the Subadvisor's environmental, social, and corporate governance (ESG) criteria. The Subadvisor analyzes and applies its ESG criteria to corporate issuers and the Subadvisor's ESG analysis includes its own proprietary assessments of ESG factors as well as standards developed and set forth by recognized organizations such as entities sponsored by the United Nations.

The Fund will not invest in instruments of corporate issuers that have been determined by the Subadvisor, through its own analysis or using third party data, to not be in compliance with the Principles of the UN Global Compact. The Fund will also not invest in instruments of corporate issuers that have been determined by the Subadvisor, through its own analysis or using third party data, to: (i) derive greater than 5% of their revenue from (a) the mining of coal, (b) the manufacture or production of tobacco, (c) the extraction or processing of oil sands, or (d) arctic oil and gas extraction; or (ii) the manufacture of controversial weapons (such as anti-personnel mines, biological weapons, chemical weapons, cluster munitions, depleted uranium ammunition and armor, incendiary weapons, nuclear weapons, and white phosphorus munitions).

The Fund may hold cash or invest in short-term instruments during times when the Subadvisor is unable to identify attractive high income securities. The Fund may invest in derivatives, such as futures, options and swap agreements to seek enhanced returns or to reduce the risk of loss by hedging certain of its holdings. In times of unusual or adverse market, economic or political conditions, the Fund may invest without limit in investment grade securities and may invest in U.S. government securities or other high quality money market instruments. To the extent the Fund is invested in cash, investment grade debt or other high-quality instruments, the yield on these investments tends to be lower than the yield on other investments normally purchased by the Fund. Although investing heavily in these investments may help to preserve the Fund's assets, it may not be consistent with the Fund's primary investment objective and may limit the Fund's ability to achieve a high level of income.

The Fund may purchase or receive common stocks or other equity securities, including in connection with restructurings.

The Fund may invest up to 10% of its net assets in underlying funds, including exchange-traded funds (ETFs), mutual funds and closed-end funds.

The Investment Process: The Subadvisor utilizes a top-down and bottom-up approach in its investment decision-making process. The top-down element of the investment process incorporates an analysis of the important economic underpinnings of the market's risk cycle. The investment team believes that monetary policy, as dictated by central bank actions, is a significant contributor to credit creation and an important driver of the inflection points in the market cycle.

The bottom-up component of the investment team's investment process feeds into its macro analysis to help identify significant changes in financial market conditions, real economic developments and areas of credit excess. Credits are run through a multi-factor analysis of financial and non-financial risk characteristics seeking to gain a complete picture of the credit profile of an issuer prior to investment.

The Subadvisor's ESG analysis evaluates securities using environmental, social, corporate governance factors. The Subadvisor considers these ESG criteria systematically throughout the Fund's investment process. The Subadvisor's ESG analysis evaluates each issuer relative to other issuers in the relevant peer group and asset class. The Subadvisor's ESG analysis is a proprietary process developed by the Subadvisor that assigns each issuer separate "environmental," "social," and "governance" scores based on ESG factors deemed most material to that asset class and peer group.

Although the Subadvisor does not use third party ESG scores to calculate an issuer's ESG score, as described further below, the Subadvisor may use third-party research to help identify sustainability issues that are likely to affect the financial condition or operating performance of an issuer.

The Subadvisor's scoring process seeks to rate issuers as "outperforming," "average," or "underperforming" within each of the environmental, social and governance factors versus peers. The issuer's score in each of the three factors is combined on an equally weighted basis to determine the issuer's overall ESG score. In addition to an issuer's current overall score, the Subadvisor also considers the historical trend in an issuer's score and

seeks to identify opportunities where a company has improved its ESG practices and is expected to continue to demonstrate further improvement. A security meets the Subadvisor's ESG criteria if it: (i) has received a score of at least "average"; or (ii) if the issuer's current score is below "average," the issuer has demonstrated a trend of improving scores. During the portfolio construction process, the Subadvisor will assess overall environmental, social and governance scores across the portfolio, as well as by overall issuer score.

The Subadvisor's process for corporate credit ESG analysis includes evaluating material ESG factors on an industry-by-industry basis and issuer performance of those factors is based on under/outperformance of industry peers. Factors considered as part of the Subadvisor's ESG analysis of corporate issuers include:

- Environmental factors such as the issuer's ability to identify and mitigate pecuniary environmental risk exposure, predominantly arising from regulatory factors in a transition to a low carbon economy.
- Social factors such as an issuer's ability to effectively identify and mitigate pecuniary social risk exposure, such as human capital management, customer privacy and data security.
- Governance factors such as assessing an issuer's quality of management and business oversight.

The Subadvisor's engagement activities may include, but are not limited to, in-person meetings and phone calls with issuers to understand their sustainability goals and business practices as well as other industry participants engaged in ESG and sustainability initiatives. This engagement allows the Subadvisor to better align mutual interests while impacting change.

The Subadvisor may sell a security if it no longer believes that the security will contribute to meeting the investment objective of the Fund or no longer meets its ESG standards. In considering whether to sell a security, the Subadvisor may evaluate, among other things, the condition of the economy, meaningful changes in the issuer's financial condition, changes in the condition and outlook.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, the Advisor or any of its affiliates. You should consider carefully the following risks before investing in the Fund.

Authorized Participant Concentration Risk

Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an "Authorized Participant"). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Cash Transactions Risk

The Fund currently intends to effect creations and redemptions principally for cash, rather than for in-kind securities. For this reason, the Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. The Fund may recognize a capital gain on these sales that might not have been incurred if the Fund had made a redemption in-kind. This may decrease the tax efficiency of the Fund compared to ETFs that utilize an in-kind redemption process.

Convertible Securities Risk

A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. Convertible securities are typically subordinate to an issuer's other debt obligations. Issuers of convertible securities may be more vulnerable to changes in the economy, such as a recession or a sustained period of rising interest rates, which could affect their ability to make interest and principal payments. If an issuer stops making interest and/or principal payments, the Fund could lose its entire investment.

Corporate Bonds Risk

Corporate bonds are debt obligations issued by corporations. Corporate bonds are generally used by corporations to borrow money from investors. The investment return of corporate bonds reflects interest earned on the security and changes in the market value of the security. The market value of a corporate bond may be

affected by changes in the market rate of interest, the credit rating of the issuer, the issuer's performance and perceptions of the issuer in the marketplace. There is a risk that the issuers of the securities may not be able to meet their obligations on interest or principal payments at the time called for by an instrument.

Counterparty Risk

A counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest, settlement or margin payments, fulfill the delivery conditions of the contract or transaction, or otherwise honor its obligations. If a counterparty fails to meet its contractual obligations the Fund will have contractual remedies pursuant to the agreements related to the transaction but the Fund may be unable to terminate or realize any gain on the investment or transaction, resulting in a loss to the Fund. The Fund may experience significant delays in obtaining any recovery in an insolvency, bankruptcy, or other reorganization proceeding involving a counterparty (including recovery of any collateral posted by it) and may obtain limited or no recovery in such circumstances.

Credit Risk

Credit risk is the risk that the issuer or guarantor of a debt instrument or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities will be unable or unwilling to make its timely interest and/or principal payments when due or otherwise honor its obligations. Changes in an issuer's or counterparty's credit rating or the market's perception of an issuer's or counterparty's creditworthiness may also adversely affect the value of the Fund's investment in that issuer. The degree of credit risk depends on an issuer's or counterparty's financial condition and on the terms of an obligation.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund's third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Debt Securities Risk

The risks of investing in debt securities include (without limitation): (i) credit risk, e.g., the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations; (ii) interest rate risk, e.g., when interest rates go up, the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up; (iii) liquidity risk and valuation risk, e.g., debt securities generally do not trade on a securities exchange, making them generally less liquid and more difficult to value than common stock; (iv) call risk and income risk, e.g., during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates; and (v) extension risk, e.g., if interest rates rise, repayments of debt securities may occur more slowly than anticipated by the market, which may drive the prices of these securities down because their interest rates are lower than the current interest rate and the securities remain outstanding longer. Debt securities most frequently trade in institutional round lot size transactions. If the Fund purchases bonds in amounts less than the institutional round lot size, which are frequently referred to as "odd" lots, the odd lot size positions may have more price volatility than institutional round lot size positions. The Fund uses a third-party pricing service to value bond holdings and the pricing service values bonds assuming orderly transactions of an institutional round lot size.

Derivatives Risk

Derivatives are investments whose value depends on (or is derived from) the value of an underlying instrument, such as a security, asset, reference rate or index and involve risks different from, and possibly greater than, the risks associated with other investments. These risks include: (i) the risk that the counterparty to a derivatives transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to, changing supply and demand relationships, government programs and policies, national and international political and economic events, changes in interest rates, inflation and deflation, and changes in supply and demand relationships.

Unlike other investments, derivative contracts often have leverage inherent in their terms. The use of leveraged derivatives can magnify potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's Share price. The effects of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements.

Equity Securities Risk

Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Exchange Traded Products Risk

Unlike an investment in a mutual fund, the value of the Fund's investment in other exchange-traded funds or exchange-traded investment products ("ETPs") is based on its market price (rather than NAV) and the Fund could lose money due to premiums/discounts of the ETP (which could cause the Fund to buy shares at market prices that are higher than their value or sell shares at market prices that are lower than their value); the failure of an active trading market to develop; or exchange trading halts or delistings. An investment in the Fund will entail more costs and expenses than a direct investment in any underlying ETP. As the Fund's allocations to underlying ETPs changes, or the expense ratio of underlying ETPs change, the operating expenses borne by the Fund from such investments may increase or decrease. Federal law prohibits the Fund from acquiring investment company shares, including shares of other registered investment companies (including ETFs), in excess of specific thresholds unless exempted by rule, regulation or exemptive order. These prohibitions may prevent the Fund from allocating its investment in an optimal manner.

Focused Investment Risk

To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. The less developed a country's securities market is, the greater the likelihood of custody problems.

Foreign Securities Valuation Risk

The Fund's value may be impacted by events that cause the fair value of foreign securities to materially change between the close of the local exchange on which they trade and the time at which the Fund prices its Shares. Additionally, because foreign exchanges on which securities held by the Fund may be open on days when the Fund does not price its Shares, the potential exists for the value of the securities in the Fund's portfolio to change on days when shareholders will not be able to purchase or sell the Fund's Shares.

Futures Contracts Risk

Futures contracts are typically exchange-traded contracts that call for the future delivery of an asset at a certain price and date, or cash settlement of the terms of the contract. There may be an imperfect correlation between the changes in market value of the securities held by the Fund and the prices of futures contracts.

There may not be a liquid secondary market for the futures contracts and the Fund may not be able to enter into a closing transaction. Exchanges may also limit the number of positions that can be held or controlled by the Fund, thus limiting the ability of the Fund to implement its investment strategy. Futures markets are highly volatile and the use of futures may increase the Fund's volatility. The value of an investment in the Fund may change quickly and without warning.

High Yield Securities Risk

High yield securities, or "junk" bonds, generally offer a higher current yield than the yield available from higher grade issues, but are subject to greater market fluctuations, are less liquid and provide a greater risk of loss than investment grade securities, and therefore are considered to be highly speculative. In general, high yield securities may have a greater risk of default than other types of securities and could cause income and principal losses for the Fund.

Income Risk

The Fund's income may decline when interest rates fall or if there are defaults in its portfolio. This decline can occur because the Fund may subsequently invest in lower-yielding securities when securities in its portfolio mature or the Fund otherwise needs to purchase additional securities.

Interest Rate Risk

An increase in interest rates may cause the value of securities held by the Fund to decline. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity. The Fund may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives.

When interest rates rise, certain obligations will be paid off by the issuer (or other obligated party) more slowly than anticipated, causing the value of these securities to fall. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value. The value of securities with longer maturities generally changes more in response to changes in interest rates than does the value of securities with shorter maturities.

During periods of falling interest rates, an issuer of a callable security held by the Fund may "call" or repay the security before its stated maturity, which may result in the Fund having to reinvest the proceeds in securities with lower yields, resulting in a decline in the Fund's income, or in securities with greater risks or with other less favorable features.

Investment Style Risk

The Fund seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Fund will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure.

- *ESG Investing Style Risk.* The Fund seeks exposure to the securities of companies meeting environmental, social and corporate governance investing criteria. The Fund excludes or limits exposure to securities of certain issuers for non-financial reasons, and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of ESG investing criteria may affect the Fund's exposure to certain sectors or types of investments and may impact the Fund's relative investment performance depending on whether such sectors or investments are in or out of favor in the market. ESG investing is subjective by nature, and therefore offers no guarantee that the ESG criteria utilized by the Subadvisor will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria or any judgment exercised by the Subadvisor will reflect the beliefs or values of any particular investor. In addition, ESG investing is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the factors relevant to a particular investment.

Issuer Risk

The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes to the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

Liquidity Risk

Liquidity risk exists when particular investments are difficult to purchase or sell. Certain investments may be subject to restrictions on resale, trade over-the-counter or in limited volume, or lack an active trading market. Accordingly, the Fund may not be able to sell or close out of such investments at favorable times or prices (or at all), or at the prices approximating those at which the Fund currently values them. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value.

Market Risk

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund's value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the U.S. and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Money Market/Short-Term Securities Risk

To the extent the Fund holds cash or invests in money market or short-term securities, the Fund may be less likely to achieve its investment objective. In addition, it is possible that the Fund's investments in these instruments could lose money.

New Fund Risk

As a new fund, there can be no assurance that the Fund will grow to or maintain an economically viable size. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Option Contracts Risk

The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events. There may at times be an imperfect correlation between the movement in values option contracts and the reference asset, and there may at times not be a liquid secondary market for certain option contracts.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result or, while it may be the desired result, may underperform other types of investment strategies. The Subadvisor may give consideration to certain ESG criteria when evaluating an

investment opportunity. The application of ESG criteria may result in the Fund (i) having exposure to certain securities or industry sectors that are significantly different than the composition of the Fund's benchmark; and (ii) performing differently than other funds and strategies in its peer group that do not take into account ESG criteria or the Fund's benchmark. There can be no guarantee that the Fund will meet its investment objective(s).

Risks of Investing in Loans

Investments in loans are subject to the same risks as investments in other types of debt securities, including credit risk, interest rate risk, liquidity risk and valuation risk that may be heightened because of the limited public information available regarding loans and because loan borrowers may be leveraged and tend to be more adversely affected by changes in market or economic conditions. Default in the payment of interest or principal on a loan will result in a reduction in the value of the loan and consequently a reduction in the value of an investment in that loan. If an investor holds a loan through another financial institution or relies on a financial institution to administer the loan, its receipt of principal and interest on the loan may be subject to the credit risk of that financial institution. It is possible that any collateral securing a loan may be insufficient or unavailable to the investor, and that the investor's rights to collateral may be limited by bankruptcy or insolvency laws. Additionally, there is no central clearinghouse for loan trades and the loan market has not established enforceable settlement standards or remedies for failure to settle. Consequently, the secondary market for loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods (in some cases longer than 7 days), which may cause an investor to be unable to realize the full value of its investment. In addition, loans are generally not registered with the SEC under the Securities Act of 1933, as amended, and may not be considered "securities," and an investor may not be entitled to rely on the anti-fraud protections of the federal securities laws. An investment in loans made to non-U.S. borrowers may be affected by political and social instability, changes in economic or taxation policies, difficulties in enforcing obligations, decreased liquidity and increased volatility. Foreign borrowers may be subject to less regulation, resulting in less publicly available information about the borrowers.

The loan market has seen a significant increase in loans with weaker lender protections including, but not limited to, limited financial maintenance covenants or, in some cases, no financial maintenance covenants (i.e., "covenant-lite loans") that would typically be included in a traditional loan agreement and general weakening of other restrictive covenants applicable to the borrower such as limitations on incurrence of additional debt, restrictions on payments of junior debt or restrictions on dividends and distributions. Weaker lender protections such as the absence of financial maintenance covenants in a loan agreement and the inclusion of "borrower-favorable" terms may impact recovery values and/or trading levels of loans in the future. The absence of financial maintenance covenants in a loan agreement generally means that the lender may not be able to declare a default if financial performance deteriorates. This may hinder an investor's ability to reprice credit risk associated with a particular borrower and reduce the investor's ability to restructure a problematic loan and mitigate potential loss. As a result, an investor's exposure to losses on investments in loans may be increased, especially during a downturn in the credit cycle or changes in market or economic conditions.

Risks of Loan Assignments and Participations

The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser of an assignment may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. Because assignments may be arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. In addition, if the loan is foreclosed, the purchaser of an assignment could become part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral. To the extent an investor sells a loan by way of assignment, the investor may be required to pass along a portion of any fees to which the investor was entitled under the loan. In connection with purchasing participations, such purchaser generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the purchaser may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the purchaser will be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the purchaser may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

Swap Agreements Risk

Swap agreements may involve greater risks than direct investment in securities as they may be leveraged and are subject to credit risk, counterparty risk, liquidity risk and valuation risk. A swap agreement could result in losses if the underlying reference or asset does not perform as anticipated. In addition, many swaps trade over-the-counter and may be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund's portfolio holdings or NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Valuation Risk

Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the value of the securities or other assets in the Fund's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell the Fund's Shares.

Performance Information

As of the date of this Prospectus, the Fund has not commenced operations and therefore does not report its performance information. The Fund's performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting newyorklifeinvestments.com/etf.

Investment Advisor and Subadvisor

IndexIQ Advisors LLC is the investment advisor to the Fund.

MacKay Shields LLC is the investment subadvisor to the Fund.

Portfolio Managers

Eric Gold and Matt Jacob of the Subadvisor are primarily responsible for the day-to-day management of the Fund. Mr. Gold has been a portfolio manager of the Fund since the Fund's inception and Mr. Jacob has been a portfolio manager of the Fund since the Fund's inception.

Purchase and Sale of Fund Shares

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called "Creation Units." Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund's Shares may trade at a price greater than (premium) or less than (discount) the Fund's NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the "bid-ask spread"). Recent information, including the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com/etf.

Tax Information

The Fund's distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Overview

The Trust is an investment company consisting of a number of separate investment portfolios (each, a "Fund" and together, the "Funds") that are structured as exchange-traded funds ("ETFs"). Each share of a Fund represents an ownership interest in the securities and other instruments comprising a Fund's portfolio. Unlike shares of a mutual fund, which can be bought and redeemed from the issuing fund by all shareholders at a price based on net asset value ("NAV"), shares of an ETF (such as the Fund) are listed on a national securities exchange and trade in the secondary market at market prices that change throughout the day, and may differ from a Fund's NAV. IndexIQ Advisors LLC (the "Advisor") is the investment advisor to the Fund.

The Fund has a distinct investment objective and policies. Each of the policies described herein, including the investment objective of the Fund, constitutes a non-fundamental policy that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information (the "SAI") under "Investment Restrictions." There can be no assurance that the Fund's objective will be achieved.

Description of the Principal Investment Strategies of the Fund

The Fund is an actively managed ETF and thus does not seek to replicate the performance of a specific index. Instead, the Fund uses an active investment strategy to meet its investment objective. The Subadvisor, subject to the oversight of the Advisor and Board of Trustees of the Trust (the "Board"), has discretion on a daily basis to manage the Fund's portfolio in accordance with the Fund's investment objective and investment policies.

The Fund, under normal circumstances, invests at least 80% of its assets (net assets plus any borrowings for investment purposes) in high-yield corporate debt instruments, including all types of high-yield domestic and foreign corporate debt securities that are rated below investment grade by a nationally recognized statistical rating organization ("NRSRO") or that are unrated but are considered to be of comparable quality by the Subadvisor. The Fund's investments may also include convertible corporate securities, loans and loan participation interests. The Fund may invest up to 20% of its net assets in common stocks and other equity-related securities. The Fund may hold cash or invest in short-term instruments during times when the Subadvisor is unable to identify attractive high income securities. The Fund may invest in derivatives, such as futures, options and swap agreements to seek enhanced returns or to reduce the risk of loss by hedging certain of its holdings. In times of unusual or adverse market, economic or political conditions, the Fund may invest without limit in investment grade securities and may invest in U.S. government securities or other high quality money market instruments.

Unless otherwise indicated, all of the percentage limitations above and in the section entitled "Principal Investment Strategies" apply only at the time of an acquisition or encumbrance of securities or assets of the Fund, except that any borrowings by the Fund that exceeds applicable limitations must be reduced to meet such limitations within the period required by the 1940 Act. Therefore, a change in the percentage that results from a relative change in values or from a change in the Fund's assets will not be considered a violation of the Fund's policies or restrictions. "Value" for the purposes of all investment restrictions shall mean the value used in determining the Fund's NAV.

To the extent the Fund makes investments on behalf of the Fund that are regulated by the Commodities Futures Trading Commission, it intends to do so in accordance with Rule 4.5 under the Commodity Exchange Act ("CEA"). The Advisor has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with Rule 4.5 and is therefore not subject to registration as a commodity pool operator under the CEA.

The Fund's portfolio holdings will be disclosed on the Trust's website (newyorklifeinvestments.com/etf) daily after the close of trading on the NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") and prior to the opening of trading on the Exchange the following day.

Additional Investment Strategies

The Fund has a distinct investment objective and policies. Each of the policies described herein, including the investment objective of the Fund, constitutes a non-fundamental policy that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information (the "SAI") under "Investment Restrictions." There can be no assurance that the Fund's objective will be achieved.

Temporary Defensive Positions

In times of unusual or adverse market, economic or political conditions or abnormal circumstances (such as large cash inflows or anticipated large redemptions), the Fund may, for temporary defensive purposes or for liquidity purposes (which may be for a prolonged period), invest outside the scope of its principal investment strategies. Under such conditions, the Fund may not invest in accordance with its investment objective or principal investment strategies and, as a result, there is no assurance that the Fund will achieve its investment objective. Under such conditions, the Fund may also invest without limit in investment grade securities and may invest in U.S. government securities or other high quality money market instruments.

Description of the Principal Risks of the Fund

Investors in the Fund should carefully consider the risks of investing in the Fund as set forth in the Fund's Summary Information section under "Principal Risks."

Authorized Participant Concentration Risk

Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting. This risk may be heightened for ETFs that invest in non-U.S. securities because such securities often involve greater settlement and operational issues for Authorized Participants that may further limit the availability of Authorized Participants.

Cash Transaction Risk

The Fund currently intends to effect creation and redemptions principally for cash, rather than principally for in-kind securities. As a result, investment in the Fund may be less tax efficient than investment in a conventional ETF. ETFs generally are able to make in-kind redemptions and avoid being taxed on gains on the distributed portfolio securities at the fund level. Because the Fund currently intends to effect redemptions principally for cash, the Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. The Fund may recognize a capital gain on these sales that might not have been incurred if the Fund had made a redemption in-kind and this may decrease the tax efficiency of the Fund compared to ETFs that utilize an in-kind redemption process. Moreover, cash transactions may have to be carried out over several days if the securities market is relatively illiquid, and this may involve considerable brokerage fees and taxes. These brokerage fees and taxes, which will be higher than if the Fund sold and redeemed its Shares principally in-kind, will be passed on to those purchasing and redeeming Creation Units in the form of creation and redemption transaction fees. In addition, these factors may result in wider spreads between the bid and the offered prices of the Fund's Shares than for ETFs that distribute portfolio securities in-kind.

Convertible Securities Risk

Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer, depending on the terms of the securities) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying equity security or sell it to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objective. The market values of convertible securities tend to decline as interest rates increase. However, a convertible security's market value also tends to reflect the market price of the equity security of the issuing company, particularly when the price of the equity security is greater than the convertible security's conversion price (i.e., the predetermined price or exchange ratio at which the convertible security can be converted or exchanged for the underlying equity security). Convertible

securities are also exposed to the risk that an issuer will be unable to meet its obligation to make dividend or principal payments when due as a result of changing financial or market conditions. Convertible debt securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of their potential for capital appreciation. Moreover, there can be no assurance that convertible securities will provide current income prior to conversion because the issuers of the convertible securities may default on their obligations. If the convertible security has a conversion or call feature that allows the issuer to redeem the security before the conversion date, the potential for capital appreciation may be diminished. In the event that convertible securities are not optional but mandatory based upon the price of the underlying common stock, the Fund may be subject to additional exposure to loss of income in situations where it would prefer to hold debt.

Corporate Bonds Risk

Corporate bonds are debt obligations issued by corporations. Corporate bonds are generally used by corporations to borrow money from investors. Corporate bonds may be either secured or unsecured. Collateral used for secured debt includes, but is not limited to, real property, equipment, machinery, accounts receivable, stocks, bonds or notes. An unsecured corporate bond is known as a debenture. The investment return of corporate bonds reflects interest earned on the security and changes in the market value of the security. Holders of corporate bonds, known as creditors, have a prior legal claim over common and preferred stockholders as to both income and assets of the issuer for the principal and interest due them and may have a prior claim over other creditors if liens or mortgages are involved. Corporate bonds contain elements of both interest rate risk and credit risk. The market value of a corporate bond generally may be expected to rise and fall inversely with changes in interest rates and may also be affected by the credit rating of the issuer, the issuer's performance and perceptions of the issuer in the marketplace. Corporate bonds usually yield more than government or agency bonds due to the presence of credit risk. There is a risk that the issuers of the securities may not be able to meet their obligations on interest or principal payments at the time called for by an instrument.

Counterparty Risk

A counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest, settlement or margin payments, fulfill the delivery conditions of the contract or transaction, or otherwise honor its obligations. If a counterparty fails to meet its contractual obligations for any reason, including bankruptcy of the counterparty or its parent, a loss to the Fund may result. The Fund may experience significant delays in obtaining any recovery in an insolvency, bankruptcy, or other reorganization proceeding involving a counterparty (including recovery of any collateral posted by it) and may obtain only a limited recovery or may obtain no recovery in such circumstances. If the Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty. Under applicable law or contractual provisions, including if the Fund enters into an investment or transaction with a financial institution and such financial institution (or an affiliate of the financial institution) experiences financial difficulties, then the Fund may in certain situations be prevented or delayed from exercising its rights to terminate the investment or transaction, or to realize on any collateral, which may result in the suspension of payment and delivery obligations of the parties under such investment or transactions or in another institution being substituted for that financial institution without the consent of the Fund. Further, the Fund may be subject to "bail-in" risk under applicable law whereby, if required by the financial institution's authority, the financial institution's liabilities could be written down, eliminated or converted into equity or an alternative instrument of ownership. A bail-in of a financial institution may result in a reduction in value of some or all of its securities and, if the Fund holds such securities or has entered into a transaction with such a financial security when a bail-in occurs, the Fund may also be similarly impacted.

Credit Risk

Credit risk is the risk that the issuer or guarantor of a debt instrument or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities will be unable or unwilling to make its timely interest and/or principal payments or to otherwise honor its obligations. There are varying degrees of credit risk, depending on an issuer's or counterparty's financial condition and on the terms of an obligation, which may be reflected in the issuer's or counterparty's credit rating. There is the chance that the Fund's portfolio holdings will have their credit ratings downgraded or will default (i.e., fail to make scheduled interest or principal

payments), or that the market's perception of an issuer's or counterparty's creditworthiness may worsen, potentially reducing the Fund's income level or Share price. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio securities and/or perceptions related thereto.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. These risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of security issuers, the Advisor, distributor and other service providers (including, but not limited to, sub-advisors, index providers, fund accountants, custodians, transfer agents and administrators), market makers, Authorized Participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines and other penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, Authorized Participants or market makers. There is no guarantee that such preventative efforts will succeed, and the Fund and its shareholders could be negatively impacted as a result.

Debt Securities Risk

The risks of investing in debt securities include (without limitation): (i) credit risk, e.g., the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations; (ii) interest rate risk, e.g., when interest rates go up, the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up; (iii) liquidity risk and valuation risk, e.g., debt securities generally do not trade on a securities exchange, making them generally less liquid and more difficult to value than common stock; (iv) call risk and income risk, e.g., during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates; and (v) extension risk, e.g., if interest rates rise, repayments of debt securities may occur more slowly than anticipated by the market, which may drive the prices of these securities down because their interest rates are lower than the current interest rate and the securities remain outstanding longer. Debt securities most frequently trade in institutional round lot size transactions. If the Fund purchases bonds in amounts less than the institutional round lot size, which are frequently referred to as "odd" lots, the odd lot size positions may have more price volatility than institutional round lot size positions. The Fund uses a third-party pricing service to value bond holdings and the pricing service values bonds assuming orderly transactions of an institutional round lot size.

Derivatives Risk

Derivatives are investments whose value depends on (or is derived from) the value of an underlying instrument, such as a security, asset, reference rate or index and involve risks different from, and possibly greater than, the risks associated with other investments. These risks include: (i) the risk that the counterparty to a derivatives transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to, changing supply and demand relationships, government programs and policies, national and international political and economic

events, changes in interest rates, inflation and deflation, and changes in supply and demand relationships. Unlike other investments, derivative contracts often have leverage inherent in their terms. This leverage creates a disconnect between the initial amount of an investment relative to the risk assumed and introduces the possibility that a relatively small movement in the value of an underlying reference asset can result in an immediate and substantial loss to a party to a derivative contract. In general, the use of leveraged derivatives can magnify potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's Share price. The effects of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. In the event of the bankruptcy or insolvency of a counterparty, the Fund could experience the loss of some or all of its investment in a derivative or experience delays in liquidating its positions, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, and an inability to realize any gains on its investment during such period. The Fund may also incur fees and expenses in enforcing its rights. Certain derivatives are subject to mandatory clearing. Central clearing is intended to reduce counterparty credit risk and increase liquidity, but central clearing does not make derivatives transactions risk-free.

Equity Securities Risk

The value of equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate or factors relating to specific companies in which the Fund invests. For example, an adverse event, such as an unfavorable earnings report, may depress the value of equity securities of an issuer held by the Fund; the price of common stock of an issuer may be particularly sensitive to general movements in the stock market; or a drop in the stock market may depress the price of most or all of the common stocks and other equity securities held by the Fund. In addition, common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. Holders of an issuer's common stock may also be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Exchange Traded Products Risk

Unlike an investment in a mutual fund, the value of the Fund's investment in other exchange-traded funds or exchange-traded investment products ("ETPs") is based on its market price (rather than NAV) and the Fund could lose money due to premiums/discounts of the ETP (which could cause the Fund to buy shares at market prices that are higher than their value or sell shares at market prices that are lower than their value); the failure of an active trading market to develop; or exchange trading halts or delistings. An investment in the Fund will entail more costs and expenses than a direct investment in any underlying ETP. As the Fund's allocations to underlying ETPs changes, or the expense ratio of underlying ETPs change, the operating expenses borne by the Fund from such investments may increase or decrease. Federal law prohibits the Fund from acquiring investment company shares, including shares of other registered investment companies (including ETFs), in excess of specific thresholds unless exempted by rule, regulation or exemptive order. These prohibitions may prevent the Fund from allocating its investment in an optimal manner.

Focused Investment Risk

To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, custody, financial reporting and

record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. Non-U.S. transaction costs, such as brokerage commissions and custody costs, may be higher than in the United States. In some non-U.S. markets, custody arrangements for securities provide significantly less protection than custody arrangements in U.S. markets. Prevailing custody and trade settlement practices (e.g., the requirement to pay for securities prior to receipt) could similarly expose the Fund to credit and other risks it does not have in the United States with respect to participating brokers, custodians, clearing banks or other clearing agents, escrow agents and issuers. In addition, the Fund may not receive shareholder communications or be permitted to vote the securities it holds, as the issuers may be under no legal obligation to distribute them.

Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Low trading volumes and volatile prices in less developed markets make trades harder to complete and settle, and governments or trade groups may compel local agents to hold securities in designated depositories that are not subject to independent evaluation. Local agents are held only to the standards of care of their local markets. The less developed a country's securities market is, the greater the likelihood of custody problems.

Foreign Securities Valuation Risk

The Fund's value may be impacted by events that cause the fair value of foreign securities to materially change between the close of the local exchange on which they trade and the time at which the Fund prices its Shares. Additionally, because foreign exchanges on which securities held by the Fund may be open on days when the Fund does not price its Shares, the potential exists for the value of the securities in the Fund's portfolio to change on days when shareholders will not be able to purchase or sell such Shares.

Futures Contracts Risk

Futures contracts are typically exchange-traded contracts that call for the future delivery of an asset by one party to another at a certain price and date, or cash settlement of the terms of the contract. The risk of a position in a futures contract may be very large compared to the relatively low level of margin the Fund is required to deposit. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit. The ability to establish and close out positions in futures contracts is subject to the development and maintenance of a liquid secondary market. There is no assurance that a liquid secondary market on an exchange will exist for any particular futures contract at any particular time. If the Fund uses futures contracts for hedging purposes, there is a risk of imperfect correlation between movements in the prices of the derivatives and movements in the securities or index underlying the derivatives or movements in the prices of the Fund's investments that are the subject of such hedge. The prices of futures contracts, for a number of reasons, may not correlate perfectly with movements in the securities or index underlying them. For example, participants in the futures markets are subject to margin deposit requirements less onerous than margin requirements in the securities markets in general. As a result, futures markets may attract more speculators than the securities markets. Increased participation by speculators in those markets may cause temporary price distortions. Due to the possibility of price distortion, even a correct forecast of general market trends by the Fund's portfolio managers still may not result in successful derivatives activity over a very short time period. The Commodity Futures Trading Commission and the various exchanges have established limits referred to as "speculative position limits" on the maximum net long or net short positions that any person and certain affiliated entities may hold or control in a particular futures contract. It is possible that, as a result of such limits, the Fund will be precluded from taking positions in certain futures contracts it might have otherwise taken to the disadvantage of shareholders.

High Yield Securities Risk

The Fund's investment in high yield securities, or "junk" bonds, may entail increased credit risks and the risk that the value of the Fund's assets will decline, and may decline precipitously, with increases in interest rates. High yield securities are, under most circumstances, subject to greater market fluctuations and risk of loss of income and principal than are investments in lower-yielding, higher-rated debt securities. As interest rates rise, the value of high yield securities may decline precipitously. Increased rates may also indicate a slowdown in the economy, which may adversely affect the credit of issuers of high yield securities and result in a higher incidence of defaults among such issuers. A slowdown in the economy, or a development adversely affecting an issuer's creditworthiness, may result in the issuer being unable to maintain earnings or sell assets at the rate and at the prices, respectively, that are required to produce sufficient cash flow to meet its interest and

principal requirements. The Fund's portfolio managers cannot predict future economic policies or their consequences or, therefore, the course or extent of any similar market fluctuations in the future. In addition, high yield securities are generally less liquid than investment grade securities.

Income Risk

The Fund's income may decline when interest rates fall or if there are defaults in its portfolio. This decline can occur because the Fund may subsequently invest in lower-yielding securities when securities in its portfolio mature or the Fund otherwise needs to purchase additional securities.

Interest Rate Risk

An increase in interest rates may cause the value of certain fixed income securities held by the Fund to decline. Many factors can cause interest rates to rise, such as central bank monetary policies, inflation rates, general economic conditions and expectations about the foregoing. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity. Substantial shareholder redemptions may worsen this impact. An increase in interest rates could also cause principal payments on a fixed income security to be repaid at a slower rate than expected. This risk is particularly prevalent for a callable debt security where an increase in interest rates could cause the issuer of that security to not redeem the security as anticipated on the call date, effectively lengthening the security's expected maturity, in turn making that security more vulnerable to interest rate risk and reducing its market value. The Fund may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives.

When interest rates rise, certain obligations will be paid off by the issuer (or other obligated party) more slowly than anticipated, causing the value of these securities to fall. Rising interest rates tend to extend the duration of fixed income securities, making their market value more sensitive to changes in interest rates. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value. The value of securities with longer maturities generally changes more in response to changes in interest rates than does the value of securities with shorter maturities. Extension risk is particularly prevalent for a callable fixed income security where an increase in interest rates could result in the issuer of that security choosing not to redeem the security as anticipated on the security's call date. Such a decision by the issuer could have the effect of lengthening the security's expected maturity, making it more vulnerable to interest rate risk and reducing its market value.

Some securities may be redeemed at the option of the issuer, or "called," before their stated maturity date. In general, an issuer will call its debt securities if they can be refinanced by issuing new debt securities which bear a lower interest rate. The Fund is subject to the possibility that during periods of falling interest rates an issuer will call its high-yielding debt securities. The Fund may then be forced to invest the unanticipated proceeds in securities with lower yields, resulting in a decline in the Fund's income, or in securities with greater risks or with other less favorable features. Such redemptions and subsequent reinvestments would also increase the Fund's portfolio turnover. If a called debt security was purchased by the Fund at a premium, the value of the premium may be lost in the event of a redemption.

Investment Style Risk

The Fund seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Fund will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure.

- *ESG Investing Style Risk.* The Fund seeks exposure to the securities of companies meeting environmental, social and corporate governance investing criteria. The Fund excludes or limits exposure to securities of certain issuers for non-financial reasons, and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of ESG investing criteria may affect the Fund's exposure to certain sectors or types of investments and may impact the Fund's relative investment performance depending on whether such sectors or investments are in or out of favor in the market. ESG investing is subjective by nature, and therefore offers no guarantee that the ESG criteria utilized by the

Subadvisor will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria or any judgment exercised by the Subadvisor will reflect the beliefs or values of any particular investor. In addition, ESG investing is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the factors relevant to a particular investment.

Issuer Risk

The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Any issuer of these securities may perform poorly, causing the value of its securities to decline. Poor performance may be caused by poor management decisions, competitive pressures, changes in technology, expiration of patent protection, disruptions in supply, labor problems or shortages, corporate restructurings, fraudulent disclosures, credit deterioration of the issuer or other factors. Issuers may, in times of distress or at their own discretion, decide to reduce or eliminate dividends, which may also cause their stock prices to decline. An issuer may also be subject to risks associated with the countries, states and regions in which the issuer resides, invests, sells products or otherwise conducts operations.

Liquidity Risk

Liquidity risk exists when particular investments are difficult to purchase or sell. To the extent the Fund invests in illiquid securities or securities that become less liquid, such investments may have a negative effect on the returns of the Fund because the Fund may be unable to sell the illiquid securities at an advantageous time or price. Securities with substantial market and/or credit risk may be especially susceptible to liquidity risk. Liquidity risk may be the result of, among other things, an investment being subject to restrictions on resale, trading over-the-counter or in limited volume, or lacking an active trading market. Liquid investments may become illiquid or less liquid after purchase by the Fund, particularly during periods of market turmoil or economic uncertainty. Illiquid and relatively less liquid investments may be harder to value, especially in changing markets. If the Fund is forced to sell underlying investments at reduced prices or under unfavorable conditions to meet redemption requests or for other cash needs, the Fund may suffer a loss. This may be magnified in a rising interest rate environment or under other circumstances where redemptions from the Fund may be higher than normal. It may also be the case that other market participants may be attempting to liquidate similar holdings at the same time as the Fund, causing increased supply in the market and contributing to liquidity risk and downward pricing pressure. There can be no assurance that a security that is deemed to be liquid when purchased will continue to be liquid or as long as it is held by the Fund.

Market Risk

The value of the Fund's investments may fluctuate and/or decline because of changes in the markets in which the Fund invests, which could cause the Fund to underperform other funds with similar investment objectives and strategies. Security markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Changes in these markets may be rapid and unpredictable. Fluctuations in the markets generally or in a specific industry or sector may impact the securities in which the Fund invests. From time to time, markets may experience periods of stress for potentially prolonged periods that may result in: (i) increased market volatility; (ii) reduced market liquidity; and (iii) increased redemptions of Fund shares. Such conditions may add significantly to the risk of volatility in the net asset value of the Fund's shares and the market prices at which shares of the Fund trade on a securities exchange. During periods of market stress shares of the Fund may also experience significantly wider "bid/ask" spreads and premiums and discounts between the Fund's net asset value and market price.

Market changes may impact fixed income securities in different and, at times, conflicting manners. The Fund potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations or market closures. Securities and investments held by the Fund may be susceptible to declines in value, including declines in value that are not believed to be representative of the issuer's value or fundamentals, due to investor reactions to such events.

Political and diplomatic events within the United States and abroad, such as the U.S. budget and deficit reduction plans, protectionist measures, trade tensions central bank policy and government intervention in the economy, has in the past resulted, and may in the future result, in developments that present additional risks to the Fund's investments and operations. Geopolitical and other events, such as war, acts of terrorism, natural disasters, the spread of infectious illnesses, epidemics and pandemics, environmental and other public health

issues, recessions or other events, and governments' reactions to such events, may lead to increased market volatility and instability in world economies and markets generally and may have adverse effects on the performance of the Fund and its investments. Additional and/or prolonged geopolitical or other events may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Any such market, economic and other disruptions could also prevent the Fund from executing its investment strategies and processes in a timely manner.

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares, they could be worth less than what you paid for them.

Market Disruption Risk and Recent Market Events

Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. Recent market disruption events include the pandemic spread of the novel coronavirus known as COVID-19, and the significant restrictions, market volatility, decreased economic and other activity and increased government activity that it has caused. Specifically, COVID-19 has led to significant death and morbidity, and concerns about its further spread have resulted in the closing of schools and non-essential businesses, cancellations, shelter-in-place orders, lower consumer spending in certain sectors, social distancing, bans on large social gatherings and travel, quarantines, government economic stimulus measures, reduced productivity, rapid increases in unemployment, increased demand for and strain on government and medical resources, border closings and global trade and supply chain interruptions, among others. The full effects, duration and costs of the COVID-19 pandemic are impossible to predict, and the circumstances surrounding the COVID-19 pandemic will continue to evolve. The pandemic may affect certain countries, industries, economic sectors, companies and investment products more than others, may exacerbate existing economic, political, or social tensions and may increase the probability of an economic recession or depression. The Fund and its investments may be adversely affected by the effects of the COVID-19 pandemic, and a prolonged pandemic may result in the Fund and its service providers experiencing operational difficulties in coordinating a remote workforce and implementing their business continuity plans, among others.

Money Market/Short-Term Securities Risk

To the extent that the Fund invests in money market or short-term securities, the Fund may be subject to certain risks associated with such investments. An investment in a money market fund or short-term securities is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. It is possible for the Fund to lose money by investing in money market funds. A money market fund may not achieve its investment objective. Changes in government regulations may affect the value of an investment in a money market fund.

New Fund Risk

As a new fund, there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case it could ultimately liquidate. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. An Authorized Participant, the Advisor or an affiliate of the Advisor may invest in the Fund and hold its investments for a specific period of time in order to facilitate commencement of the Fund's operations or for the Fund to achieve size or scale. There can be no assurance that any such entity would not redeem its investment or that the size of the Fund would be maintained at such levels which could negatively impact the Fund.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Option Contracts Risk

The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events. There may at times be an imperfect correlation between the movement in values option contracts and the reference asset, and there may at times not be a liquid secondary market for certain option contracts. Option contracts may also involve the use of leverage, which could result in greater price volatility than other markets.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result or, while it may be the desired result, may underperform other types of investment strategies. The Subadvisor may give consideration to certain ESG criteria when evaluating an investment opportunity. The application of ESG criteria may result in the Fund (i) having exposure to certain securities or industry sectors that are significantly different than the composition of the Fund's benchmark; and (ii) performing differently than other funds and strategies in its peer group that do not take into account ESG criteria or the Fund's benchmark. There can be no guarantee that the Fund will meet its investment objective(s).

Risks of Investing in Loans

Investments in loans are subject to the same risks as investments in other types of debt securities, including credit risk, interest rate risk, liquidity risk and valuation risk that may be heightened because of the limited public information available regarding loans and because loan borrowers may be leveraged and tend to be more adversely affected by changes in market or economic conditions. Default in the payment of interest or principal on a loan will result in a reduction in the value of the loan and consequently a reduction in the value of an investment in that loan. If an investor holds a loan through another financial institution or relies on a financial institution to administer the loan, its receipt of principal and interest on the loan may be subject to the credit risk of that financial institution. It is possible that any collateral securing a loan may be insufficient or unavailable to the investor, and that the investor's rights to collateral may be limited by bankruptcy or insolvency laws. Additionally, there is no central clearinghouse for loan trades and the loan market has not established enforceable settlement standards or remedies for failure to settle. Consequently, the secondary market for loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods (in some cases longer than 7 days), which may cause an investor to be unable to realize the full value of its investment. In addition, loans are generally not registered with the SEC under the Securities Act of 1933, as amended, and may not be considered "securities," and an investor may not be entitled to rely on the anti-fraud protections of the federal securities laws. An investment in loans made to non-U.S. borrowers may be affected by political and social instability, changes in economic or taxation policies, difficulties in enforcing obligations, decreased liquidity and increased volatility. Foreign borrowers may be subject to less regulation, resulting in less publicly available information about the borrowers.

The loan market has seen a significant increase in loans with weaker lender protections including, but not limited to, limited financial maintenance covenants or, in some cases, no financial maintenance covenants (i.e., "covenant-lite loans") that would typically be included in a traditional loan agreement and general weakening of other restrictive covenants applicable to the borrower such as limitations on incurrence of additional debt, restrictions on payments of junior debt or restrictions on dividends and distributions. Weaker lender protections such as the absence of financial maintenance covenants in a loan agreement and the inclusion of "borrower-favorable" terms may impact recovery values and/or trading levels of loans in the future. The absence of financial maintenance covenants in a loan agreement generally means that the lender may not be able to declare a default if financial performance deteriorates. This may hinder an investor's ability to reprice credit risk associated with a particular borrower and reduce the investor's ability to restructure a problematic loan and mitigate potential loss. As a result, an investor's exposure to losses on investments in loans may be increased, especially during a downturn in the credit cycle or changes in market or economic conditions

Risks of Loan Assignments and Participations

The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser of an assignment may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. Because assignments may be arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. In addition, if the loan is foreclosed, the purchaser of an assignment could become part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral. To the extent an investor sells a loan by way of assignment, the investor may be required to pass along a portion of any fees to which the investor was entitled under the loan. In connection with purchasing participations, such purchaser generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the purchaser may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the purchaser will be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the purchaser may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

Swap Agreements Risk

Swap agreements are two-party contracts entered into for a set period of time in which the parties agree to exchange payments based on some underlying reference or asset (such as interest rates). The use of swaps is a highly specialized activity that involves investment techniques, risk analyses and tax planning different from those associated with ordinary portfolio securities transactions. These transactions can result in sizeable realized and unrealized capital gains and losses relative to the gains and losses from the Fund's direct investments in the reference assets. Transactions in swaps can involve greater risks than if the Fund had invested directly in the reference asset since, in addition to general market risks, swaps may be leveraged and are also subject to credit risk, counterparty risk, liquidity risk and valuation risk. Because they are two-party contracts and may have terms of greater than seven days, certain swap transactions may be considered illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap counterparty. Some swaps may be complex and difficult to value. Swaps may also be subject to pricing or "basis" risk, which exists when a particular swap becomes extraordinarily expensive relative to historical prices or the price of corresponding cash market instruments. Under certain market conditions it may not be economically feasible to initiate a transaction or liquidate a position in time to avoid a loss or take advantage of an opportunity. If a swap transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses. The prices of swaps can be very volatile, and a variance in the degree of volatility or in the direction of the price of the reference asset from the portfolio managers' expectations may produce significant losses in the Fund's investments in swaps. In addition, a perfect correlation between a swap and an investment position may be impossible to achieve. As a result, the Fund's use of swaps may not be effective in fulfilling the Fund's investment strategies and may contribute to losses that would not have been incurred otherwise. Certain swaps are not bilateral agreements but are centrally cleared and are exchange-traded. Central clearing tends to decrease credit risk and improve liquidity but many regulations regarding centrally cleared swaps have not been fully implemented and the scope of the risks remain unclear. As central clearing does not make the agreements risk-free and there is no guarantee that the Fund would consider all centrally cleared or exchange-traded swaps to be liquid.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the Fund's NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. The market price of the Fund's Shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade the Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that an investor most wants to sell their Shares. Although it is generally expected

that the market price of the Fund's Shares will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares. While the creation/redemption feature is designed to make it more likely that the Fund's Shares normally will trade on securities exchanges at prices close to the Fund's next calculated NAV, exchange prices are not expected to correlate exactly with the Fund's NAV due to timing reasons, supply and demand imbalances and other factors. In addition, disruptions to creations and redemptions, including disruptions at market makers, Authorized Participants, or other market participants, and during periods of significant market volatility, may result in trading prices for Shares of the Fund that differ significantly from its NAV. Authorized Participants may be less willing to create or redeem Shares if there is a lack of an active market for such Shares or its underlying investments, which may contribute to the Fund's Shares trading at a premium or discount to NAV. Additionally, similar to shares of other issuers listed on a securities exchange, the Fund's Shares may be sold short and are therefore subject to the risk of increased volatility and price decreases associated with being sold short. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV.

Valuation Risk

Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the value of the securities or other assets in the Fund's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell the Fund's Shares. Authorized Participants who purchase or redeem Shares on days when the Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received had the Fund not fair-valued securities or used a different valuation methodology. The Fund's ability to value investments may be impacted by technological issues or errors by pricing services or other third-party service providers.

Additional Risks

Large Investments Risk

From time to time, the Fund may receive large purchase or redemption orders from affiliated or unaffiliated funds or other investors. In addition, any third-party investor, investment advisor affiliate, authorized participant, lead market maker or other entity may make a large investment in the Fund and hold its investment for any number of reasons, including to facilitate the Fund's commencement of operations or to facilitate the Fund's achieving a specified size or scale. There can be no assurance that any large shareholder would not sell or redeem its investment at any given time, either in a single transaction or over time. These large transactions, and particularly redemptions, could have adverse effects on the Fund, including: (i) negative impacts to performance if the Fund were required to sell securities, invest cash or hold significant cash at times when it otherwise would not do so; (ii) wider price spreads or greater premiums/discounts that could materialize as a result of lower secondary market volume of shares; and (iii) negative federal income tax consequences if this activity accelerated the realization of capital gains.

U.S. Tax Risks

To qualify for the favorable U.S. federal income tax treatment accorded to regulated investment companies, the Fund must satisfy certain income, asset diversification and distribution requirements. If for any taxable year, the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to its shareholders, and such distributions would be taxable to its shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits. To the extent the Fund engages in derivatives transactions, the tax treatment such derivatives transactions is unclear for purposes of determining the Fund's tax status. To the extent the Fund engages in transactions in financial instruments, including, but not limited to, options, futures contracts, hedging transactions, forward contracts and swap contracts, the Fund will be subject to special tax rules (which may include mark-to-market, constructive sale, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses. These rules could, therefore, affect the amount, timing and character of distributions to the Fund's shareholders. The Fund's use of such

transactions may result in the Fund realizing more short-term capital gains and ordinary income, in each case subject to U.S. federal income tax at higher ordinary income tax rates, than it would if it did not engage in such transactions. Please refer to the SAI for a more complete discussion of the risks of investing in Shares.

Buying and Selling Shares in the Secondary Market

Most investors will buy and sell Shares of the Fund in Secondary Market transactions through brokers. Shares of the Fund will be listed for trading on the Secondary Market on the NYSE Arca. Shares can be bought and sold throughout the trading day like other publicly-traded shares. Unless imposed by your broker or dealer, there is no minimum dollar amount you must invest and no minimum number of Shares you must buy in the Secondary Market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the Secondary Market on each leg of a round trip (purchase and sale) transaction. In addition, because transactions in the Secondary Market occur at market prices, you may pay more than NAV when you buy Shares and receive less than NAV when you sell those Shares.

Share prices are reported in dollars and cents per Share. For information about buying and selling Shares in the Secondary Market, please contact your broker or dealer.

Book Entry

Shares of the Fund are held in book-entry form and no stock certificates are issued. DTC, through its nominee Cede & Co., is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants.

These procedures are the same as those that apply to any securities that you hold in book entry or "street name" form for any publicly-traded company. Specifically, in the case of a shareholder meeting of the Fund, DTC assigns applicable Cede & Co. voting rights to its participants that have Shares credited to their accounts on the record date, issues an omnibus proxy and forwards the omnibus proxy to the Fund. The omnibus proxy transfers the voting authority from Cede & Co. to the DTC participant. This gives the DTC participant through whom you own Shares (namely, your broker, dealer, bank, trust company or other nominee) authority to vote the shares, and, in turn, the DTC participant is obligated to follow the voting instructions you provide.

Management

The Board is responsible for the general supervision of the Fund. The Board appoints officers who are responsible for the day-to-day operations of the Fund.

Investment Advisor

The Advisor has been registered as an investment advisor with the SEC since August 2007, has provided investment advisory services to registered investment companies since June 2008, and is a wholly-owned indirect subsidiary of New York Life Investment Management Holdings LLC. The Advisor's principal office is located at 51 Madison Avenue, New York, New York 10010. As of June 30, 2022, the Advisor had approximately \$8.2 billion in assets under management.

The Advisor has overall responsibility for the general management and administration of the Trust. The Advisor provides an investment program for the Fund. The Advisor has arranged for custody, fund administration, transfer agency and all other non-distribution related services necessary for the Fund to operate.

As compensation for its services and its assumption of certain expenses, the Fund pays the Advisor a management fee equal to a percentage of the Fund's average daily net assets that is calculated daily and paid monthly, as follows:

<u>Fund Name</u>	<u>Management Fee</u>
IQ MacKay ESG High Income ETF	0.40%

The Advisor may voluntarily waive any portion of its advisory fee from time to time, and may discontinue or modify any such voluntary limitations in the future at its discretion.

The Advisor serves as investment advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement") and the Subadvisor serves as investment subadvisor to the Fund pursuant to an Investment Subadvisory Agreement (the "Subadvisory Agreement"). The Advisory Agreement and Subadvisory Agreement were approved by the Independent Trustees of the Trust. The basis for the Trustees' approval of the Advisory Agreement and Subadvisory Agreement are available in the Trust's Annual or Semiannual Report to shareholders.

Section 15(a) of the 1940 Act requires that all contracts pursuant to which persons serve as investment advisors to investment companies be approved by shareholders. As interpreted, this requirement also applies to the appointment of any subadvisor to the Fund. The Advisor and the Trust have obtained an exemptive order (the "Order") from the SEC permitting the Advisor, on behalf of the Fund and subject to the approval of the Board, including a majority of the Independent Trustees, to hire or terminate unaffiliated subadvisors and to modify any existing or future subadvisory agreement with unaffiliated subadvisors without shareholder approval. This authority is subject to certain conditions. The Fund will notify shareholders and provide them with certain information required by the Order within 90 days of hiring a new subadvisor. The Fund's sole shareholder has approved the use of the Order. Please see the SAI for more information on the Order.

Expense Waiver/Reimbursement Agreement

The Advisor has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (excluding interest, taxes, brokerage commissions, dividend payments on short sales, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, other extraordinary expenses not incurred in the ordinary course of the Fund's business, and amounts, if any, payable pursuant to a plan adopted in accordance with Rule 12b-1 under the 1940 Act) to not more than 0.40% of the average daily net assets of the Fund. The agreement will remain in effect permanently unless terminated by the Board of Trustees of the Fund.

Subadvisor

Pursuant to the Subadvisory Agreement, MacKay Shields LLC serves as the subadvisor to the Fund and makes investment decisions, and buys and sells securities for the Fund. For its services to the Fund, the Subadvisor is compensated by the Advisor. To the extent that the Advisor has agreed to waive its management fee or reimburse expenses, the Subadvisor has agreed to waive or reimburse its fee proportionately. The Subadvisor was incorporated in 1969 as an independent investment advisory firm and has been registered as an investment advisor with the SEC since 1969. The Subadvisor was privately held until 1984 when it became a wholly-owned subsidiary of New York Life. The Subadvisor's principal office is located at 1345 Avenue of the Americas, New York, New York 10105. As of June 30, 2022, the Subadvisor had approximately \$132 billion in assets under management.

Portfolio Management

The Advisor acts as investment advisor to the Fund and is responsible for the overall management of the investment portfolios of the Fund. Under the supervision of the Advisor, the Subadvisor is responsible for making the specific decisions about the following: (i) buying, selling and holding securities; (ii) selecting brokers and brokerage firms to trade for them; (iii) maintaining accurate records; and, if possible, (iv) negotiating favorable commissions and fees with the brokers and brokerage firms for all the Fund it oversees. For these services, the Subadvisor is paid a monthly fee by the Advisor out of the Advisor's management fee, not the Fund. See the SAI for a breakdown of fees.

The portfolio managers primarily responsible for the day-to-day management of the Fund are Eric Gold and Matt Jacob.

Mr. Gold is the Head of the Global Credit team, Co-Head of the Credit Committee and a member of the Investment Policy Committee. Mr. Gold is responsible for leadership and oversight of the team's strategies, spanning high yield, loans and investment grade credit. Before joining the Global Credit team, Mr. Gold served as a Managing Director on the MacKay High Yield team. Over his tenure at MacKay Shields, Mr. Gold has been active in credit analysis and portfolio construction, covering a wide array of industry sectors across the credit universe. Prior to joining MacKay Shields in 2010, he was a sell-side Analyst covering the telecommunications, cable and media sectors at Sterne Agee & Leach, Inc. Previously, he was an Analyst at BlackRock and a

sell-side Analyst at Grantchester Securities where he was ranked by Institutional Investor as the #1 analyst in the wireless telecommunications sector for 1999, 2000, 2001 and 2002. Mr. Gold received a BA from Vassar College and an MBA from New York University. He has been working in the investment industry since 1987.

Mr. Jacob has served as a portfolio manager of the Fund since its inception. He is a Managing Director and Senior Portfolio Manager on the Global Credit team and also a member of the Investment Policy Committee. As the Co-Chair of the Credit Committee, Mr. Jacob is responsible for corporate credit investments across all the group's portfolios as well as dedicated corporate investment grade, high yield and bank loan strategies. He joined the firm as a Portfolio Analyst for the Global Fixed Income team in February 2011. He came to MacKay Shields from KDI Capital Partners where as an Equity Sector Leader for the firm's fundamental research efforts in the core consumer sector. Prior to KDI, he worked at Buckingham Research Group and Johnson Rice & Company, LLC, where he gained extensive experience in equity sales and research. Mr. Jacob received his MBA with a concentration in Finance from Tulane University, Freeman School of Business in 2006 and a BS in Finance with a specialization in Internal Audit from Louisiana State University in 2001. He has been in the investment research industry since 2002.

For more information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund, see the SAI.

Other Service Providers

Fund Administrator, Custodian, Transfer Agent and Securities Lending Agent

The Bank of New York Mellon ("BNY Mellon"), located at 240 Greenwich Street, New York, New York 10286, serves as the Fund's Administrator, Custodian, Transfer Agent and Securities Lending Agent. BNY Mellon is the principal operating subsidiary of The Bank of New York Mellon Corporation.

Distributor

ALPS Distributors, Inc. ("ALPS" or the "Distributor"), located at 1290 Broadway, Suite 1000, Denver, Colorado 80203 serves as the Distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a Secondary Market in the Fund's Shares. NYLIFE Distributors LLC has entered into a Services Agreement with ALPS to market the Fund.

Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP, located at 300 Madison Avenue, New York, NY 10017, serves as the independent registered public accounting firm for the Trust.

Legal Counsel

Chapman and Cutler LLP, located at 1717 Rhode Island Avenue, Washington, D.C. 20036, serves as counsel to the Trust and the Fund.

Frequent Trading

The Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares by Fund shareholders ("market timing"). In determining not to adopt market timing policies and procedures, the Board noted that the Fund is expected to be attractive to active institutional and retail investors interested in buying and selling Shares on a short-term basis. In addition, the Board considered that, unlike traditional mutual funds, Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants, and that the vast majority of trading in Shares occurs on the Secondary Market. Because Secondary Market trades do not involve the Fund directly, it is unlikely those trades would cause many of the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With respect to trades directly with the Fund, to the extent effected in-kind (namely, for securities), those trades do not cause any of the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution of the Fund and increased transaction costs (the Fund may impose higher transaction fees to offset these increased costs), which could negatively impact the Fund's ability to achieve its investment objective. However, the Board also noted that direct trading on a short-term basis by Authorized Participants is critical to ensuring that Shares trade at or close to NAV. Given this structure, the Board determined that it is not necessary to adopt market timing policies and procedures. The Fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive or excessive trading in Creation Units.

The Board has instructed the officers of the Trust to review reports of purchases and redemptions of Creation Units on a regular basis to determine if there is any unusual trading in the Fund. The officers of the Trust will report to the Board any such unusual trading in Creation Units that is disruptive to the Fund. In such event, the Board may reconsider its decision not to adopt market timing policies and procedures.

Distribution and Service Plan

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.10% of its average daily net assets each year to finance activities primarily intended to result in the sale of Creation Units of the Fund or the provision of investor services. No Rule 12b-1 fees are currently paid by the Fund and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, they will be paid out of the respective Fund's assets, and over time these fees will increase the cost of your investment and they may cost you more than certain other types of sales charges.

The Advisor and its affiliates may, out of their own resources, pay amounts ("Payments") to third-parties for distribution or marketing services on behalf of the Fund. The making of these payments could create a conflict of interest for a financial intermediary receiving such payments. The Advisor may make Payments for such third-parties to organize or participate in activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about ETFs, including ETFs advised by the Advisor, or for other activities, such as participation in marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems ("Education Costs"). The Advisor also may make Payments to third-parties to help defray costs typically covered by a trading commission, such as certain printing, publishing and mailing costs or materials relating to the marketing of services related to exchange-traded products (such as commission-free trading platforms) or exchange-traded products in general ("Administrative Costs").

Determination of Net Asset Value (NAV)

The NAV of the Shares for the Fund is equal to the Fund's total assets minus its total liabilities divided by the total number of Shares outstanding. Interest and investment income on the Fund's assets accrue daily and are included in the Fund's total assets. Expenses and fees (including investment advisory, management, administration and distribution fees, if any) accrue daily and are included in the applicable Fund's total liabilities. The NAV that is published is rounded to the nearest cent; however, for purposes of determining the price of Creation Units, the NAV is calculated to five decimal places. The NAV is calculated by the Administrator and Custodian and determined each Business Day as of the close of regular trading on the NYSE Arca (ordinarily 4:00 p.m. Eastern time).

The Fund typically values fixed income portfolio securities using last available bid prices or current market quotations provided by dealers or prices (including evaluated prices) supplied by the Fund's approved independent third-party pricing services. Pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots often trade at different prices that may be above or below the price at which the pricing service has valued the security. An amortized cost method of valuation may be used with respect to debt obligations with sixty days or less remaining to maturity unless the Advisor determines in good faith that such method does not represent fair value.

Generally, trading in U.S. government securities, money market instruments and certain fixed income securities is substantially completed each day at various times prior to the close of business on the NYSE Arca. The values of such securities used in computing the NAV of the Fund are determined as of such times.

When market quotations or prices are not readily available or are deemed unreliable or not representative of an investment's fair value, investments are valued using fair value pricing as determined in good faith by the Advisor under procedures established by and under the general supervision and responsibility of the Board. The Advisor may conclude that a market quotation is not readily available or is unreliable if a security or other asset or liability does not have a price source due to its lack of liquidity or other reason, if a market quotation differs significantly from recent price quotations or otherwise no longer appears to reflect fair value, where the security or other asset or liability is thinly traded, or if the trading market on which a security is listed is suspended or closed and no appropriate alternative trading market is available.

The frequency with which the Fund's investments are valued using fair value pricing is primarily a function of the types of securities and other assets in which the respective Fund invests pursuant to its investment objective, strategies and limitations. If the Fund invests in other open-end management investment companies registered under the 1940 Act, they may rely on the NAVs of those companies to value the shares they hold of them. Those companies may also use fair value pricing under some circumstances.

Valuing the Fund's investments using fair value pricing results in using prices for those investments that may differ from current market valuations. Accordingly, fair value pricing could result in a difference between the prices used to calculate NAV and the prices used to determine the Fund's indicative intra-day value ("IIV"), which could result in the market prices for Shares deviating from NAV.

Indicative Intraday Value

The approximate value of the Fund's investments on a per-Share basis, the Indicative Intra-Day Value, or IIV, is disseminated every 15 seconds during hours of trading on the NYSE Arca. The IIV should not be viewed as a "real-time" update of NAV because the IIV may not be calculated in the same manner as NAV, which is computed once per day.

An independent third-party calculator calculates the IIV for the Fund during hours of trading on the NYSE Arca by dividing the "Estimated Fund Value" as of the time of the calculation by the total number of outstanding Shares of the Fund. "Estimated Fund Value" is the sum of the estimated amount of cash held in the Fund's portfolio, the estimated amount of accrued interest owed to the Fund and the estimated value of the securities held in the Fund's portfolio, minus the estimated amount of the Fund's liabilities. The IIV will be calculated based on the same portfolio holdings disclosed on the Trust's website.

The Fund provides the independent third-party calculator with information to calculate the IIV, but the Fund is not involved in the actual calculation of the IIV and is not responsible for the calculation or dissemination of the IIV. The Fund makes no warranty as to the accuracy of the IIV.

Premium/Discount Information

As of the date of this Prospectus, the Fund has not yet commenced operations and therefore has not accumulated information to report regarding the extent and frequency with which market prices of Shares have tracked the Fund's NAV.

Information regarding the extent and frequency with which market prices of Shares has tracked the relevant Fund's NAV for the most recently completed calendar year and the quarters since that year will be available without charge on the Fund's website at newyorklifeinvestments.com/etf.

Dividends, Distributions and Taxes

Net Investment Income and Capital Gains

As a Fund shareholder, you are entitled to your share of the Fund's distributions of net investment income and net realized capital gains on its investments. The Fund pays out substantially all of their net earnings to their shareholders as "distributions."

The Fund typically earns dividends from stocks and interest from debt securities. These amounts, net of expenses, typically are passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains or losses whenever they sell securities. Net capital gains typically are passed along to shareholders as "capital gain distributions."

Net investment income and net capital gains typically are distributed to shareholders at least annually. Dividends may be declared and paid more frequently to improve index tracking or to comply with the distribution requirements of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). In addition, the Fund may decide to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period, in which case some portion of each distribution may result in a return of capital. You will be notified regarding the portion of a distribution that represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of the Fund only if the broker through which you purchased Shares makes such option available. Distributions which are reinvested nevertheless will be subject to U.S. federal income tax to the same extent as if such distributions had not been reinvested.

U.S. Federal Income Taxation

The following is a summary of certain U.S. federal income tax considerations applicable to an investment in Shares of the Fund. The summary is based on the laws in effect on the date of this Prospectus and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect. In addition, this summary assumes that a Fund shareholder holds Shares as capital assets within the meaning of the Code and does not hold Shares in connection with a trade or business. This summary does not address all potential U.S. federal income tax considerations possibly applicable to an investment in Shares of the Fund, and does not address the consequences to Fund shareholders subject to special tax rules, including, but not limited to, partnerships and the partners therein, tax-exempt shareholders, regulated investment companies ("RICs"), real estate investment trusts ("REITs"), real estate mortgage investment conduits ("REMICs"), those who hold Shares through an IRA, 401(k) plan or other tax-advantaged account, and, except to the extent discussed below, "non-U.S. shareholder" (as defined below). This discussion does not discuss any aspect of U.S. state, local, estate, gift, or non-U.S. tax law. Furthermore, this discussion is not intended or written to be legal or tax advice to any shareholder in the Fund or other person and is not intended or written to be used or relied on, and cannot be used or relied on, by any such person for the purpose of avoiding any U.S. federal tax penalties that may be imposed on such person. Prospective Fund shareholders are urged to consult their own tax advisors with respect to the specific U.S. federal, state, local and non-U.S. tax consequences of investing in Shares, based on their particular circumstances.

The Fund has not requested and will not request an advance ruling from the U.S. Internal Revenue Service (the "IRS") as to the U.S. federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. Prospective investors should consult their own tax advisors with regard to the U.S. federal tax consequences of the purchase, ownership and disposition of Shares, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country or other taxing jurisdiction. The following information supplements and should be read in conjunction with the section in the SAI entitled "U.S. Federal Income Taxation."

Tax Treatment of the Fund

The Fund intends to qualify and elect to be treated as a separate RIC under the Code. To qualify and remain eligible for the special tax treatment accorded to RICs, the Fund must meet certain annual income and quarterly asset diversification requirements and must distribute annually at least 90% of the sum of (i) its "investment company taxable income" (which includes dividends, interest and net short-term capital gains) and (ii) certain net tax-exempt income, if any.

As a RIC, the Fund generally will not be required to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that it distributes to its shareholders. If the Fund fails to qualify as a RIC for any year (subject to certain curative measures allowed by the Code), the Fund will be subject to regular corporate-level U.S. federal income tax in that year on all of its taxable income, regardless of whether the Fund makes any distributions to its shareholders. In addition, in such case, distributions will be taxable to the Fund's shareholders generally as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. The remainder of this discussion assumes that the Fund will qualify for the special tax treatment accorded to RICs.

The Fund generally will be subject to a 4% excise tax on certain undistributed income if the Fund does not distribute to its shareholders in each calendar year an amount at least equal to the sum of 98% of its ordinary income for the calendar year (taking into account certain deferrals and elections), 98.2% of its capital gain net income (adjusted for certain ordinary losses) for the twelve months ended October 31 of such year (or later if the Fund is permitted to elect and so elects), plus 100% of any undistributed amounts from prior years. For these purposes, a Fund will be treated as having distributed any amount on which it has been subject to U.S. corporate income tax for the taxable year ending within the calendar year. The Fund intends to make distributions necessary to avoid this 4% excise tax, although there can be no assurance that it will be able to do so.

The Fund may be required to recognize taxable income in advance of receiving the related cash payment. For example, if the Fund invests in original issue discount obligations (such as zero coupon debt instruments or debt instruments with payment-in-kind interest), the Fund will be required to include in income each year a portion of the original issue discount that accrues over the term of the obligation, even if the related cash payment is not received by the Fund until a later year. Under the "wash sale" rules, the Fund may not be able to deduct a loss on a disposition of a portfolio security. As a result, the Fund may be required to make an annual income

distribution greater than the total cash actually received during the year. Such distribution may be made from the cash assets of the Fund or by selling portfolio securities. The Fund may realize gains or losses from such sales, in which event its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Tax Treatment of Fund Shareholders

Taxation of U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "U.S. shareholders." For purposes of this discussion, a "U.S. shareholder" is a beneficial owners of Shares who, for U.S. federal income tax purposes, is (i) an individual who is a citizen or resident of the United States; (ii) a corporation (or an entity treated as a corporation for U.S. federal income tax purposes) created or organized in the United States or under the laws of the United States, or of any state thereof, or the District of Columbia; (iii) an estate, the income of which is includable in gross income for U.S. federal income tax purposes regardless of its source; or (iv) a trust, if (1) a U.S. court is able to exercise primary supervision over the administration of such trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (2) the trust has a valid election in place to be treated as a U.S. person.

Fund Distributions. In general, Fund distributions are subject to U.S. federal income tax when paid, regardless of whether they consist of cash or property, and regardless of whether they are re-invested in Shares. However, any Fund distribution declared in October, November or December of any calendar year and payable to shareholders of record on a specified date during such month will be deemed to have been received by the Fund shareholder on December 31 of such calendar year, provided such dividend is actually paid during January of the following calendar year.

Distributions of the Fund's net investment income and net short-term capital gains in excess of net long-term capital losses (collectively referred to as "ordinary income dividends") are taxable as ordinary income to the extent of the Fund's current and accumulated earnings and profits (subject to an exception for distributions of "qualified dividend income," as discussed below). To the extent designated as capital gain dividend by the Fund, distributions of the Fund's net long-term capital gains in excess of net short-term capital losses ("net capital gain") are taxable at long-term capital gain tax rates to the extent of the Fund's current and accumulated earnings and profits, regardless of a Fund shareholder's holding period in the Fund's Shares. Distributions of "qualified dividend income" (defined below) are, to the extent of the Fund's current and accumulated earnings and profits, taxed to certain non-corporate Fund shareholders at the rates generally applicable to long-term capital gain, provided that the Fund shareholder meeting certain holding period and of the requirements with respect to the distributing Fund's Shares and the distributing Fund meeting certain holdings period and other requirements with respect to its dividend-paying stocks. For this purpose, "qualified dividend income" generally means income from dividends received by the Fund from U.S. corporations and qualified non-U.S. corporations. Substitute payments received on Shares that are lent out will be ineligible for being reported as qualified dividend income. If the Fund pays a dividend that would be "qualified" dividend income for individuals, corporate shareholders may be entitled to a dividend received deduction.

An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

The Fund intends to distribute its net capital gain at least annually. However, by providing written notice to its shareholders no later than 60 days after its year-end, the Fund may elect to retain some or all of its net capital gain and designate the retained amount as a "deemed distribution." In that event, the Fund pays U.S. federal income tax on the retained net capital gain, and the Fund shareholder recognizes a proportionate share of the Fund's undistributed net capital gain. In addition, each Fund shareholder can claim a tax credit or refund for the shareholder's proportionate share of the Fund's U.S. federal income taxes paid on the undistributed net capital gain and increase the shareholder's tax basis of the Shares by an amount equal to shareholder's proportionate share of the Fund's undistributed net capital gain, reduced by the amount of the shareholder's tax credit or refund.

Distributions in excess of the Fund's current and accumulated earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholders tax basis in its shares of the fund, and generally as capital gain thereafter. Any such distribution will reduce the shareholder's tax basis in the Shares, and thus will increase the shareholder's capital gain, or decrease the capital loss, recognized upon a sale or exchange of Shares.

In addition, individuals with adjusted gross incomes above certain threshold amounts (and certain trusts and estates) generally are subject to a 3.8% Medicare tax on net investment income in addition to otherwise applicable U.S. federal income tax. "Net investment income" generally will include dividends (including capital gain dividends) received from the Fund and net gains from the redemption or other disposition of Shares. Please consult your tax advisor regarding this tax.

If the Fund is a "qualified fund of funds" (i.e., a RIC at least 50% of the value of the total assets of which, at the close of each quarter of the taxable year, is represented by interests in other RICs) or more than 50% of the Fund's total assets at the end of a taxable year consist of non-U.S. stock or securities, the Fund may elect to "pass through" to its shareholders certain non-U.S. income taxes paid by the Fund. This means that each shareholder will be required to (i) include in gross income, even though not actually received, the shareholder's pro rata share of the Fund's non-U.S. income taxes, and (ii) either take a corresponding deduction (in calculating U.S. federal taxable income) or credit (in calculating U.S. federal income tax), subject to certain limitations.

Investors considering buying Shares just prior to a distribution should be aware that, although the price of the Shares purchased at such time may reflect the forthcoming distribution, such distribution nevertheless may be taxable (as opposed to a non-taxable return of capital).

Sales or Exchange of Shares. Any capital gain or loss realized upon a sale or exchange of Shares (including an exchange of Shares of one Fund for Shares of another Fund) generally is treated as a long-term gain or loss if the Shares have been held for more than one year. Any capital gain or loss realized upon a sale or exchange of Shares held for one year or less generally is treated as a short-term gain or loss, except that any capital loss on the sale or exchange of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to the Shares.

An election may be available to you to defer recognition of capital gain if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Creation Unit Issues and Redemptions. On an issue of Shares of the Fund as part of a Creation Unit where the creation is conducted in-kind, an Authorized Participant generally recognizes capital gain or loss equal to the difference between (i) the fair market value (at issue) of the issued Shares (plus any cash received by the Authorized Participant as part of the issue) and (ii) the Authorized Participant's aggregate basis in the exchanged securities (plus any cash paid by the Authorized Participant as part of the issue). On a redemption of Shares as part of a Creation Unit where the redemption is conducted in-kind, an Authorized Participant generally recognizes capital gain or loss equal to the difference between (i) the fair market value (at redemption) of the securities received (plus any cash received by the Authorized Participant as part of the redemption) and (ii) the Authorized Participant's basis in the redeemed Shares (plus any cash paid by the Authorized Participant as part of the redemption). However, the IRS may assert, under the "wash sale" rules or on the basis that there has been no significant change in the Authorized Participant's economic position, that any loss on creation or redemption of Creation Units cannot be deducted currently.

In general, any capital gain or loss recognized upon the issue or redemption of Shares (as components of a Creation Unit) is treated either as long-term capital gain or loss, if the deposited securities (in the case of an issue) or the Shares (in the case of a redemption) have been held for more than one year, or otherwise as short-term capital gain or loss. However, any capital loss on a redemption of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to such Shares.

Back-Up Withholding. The Fund (or a financial intermediary such as a broker through which a shareholder holds Shares in the Fund) may be required to report certain information on the Fund shareholder to the IRS and withhold U.S. federal income tax ("backup withholding") at a current rate of 24% from taxable distributions and redemption or sale proceeds payable to the Fund shareholder if (i) the Fund shareholder fails to provide the Fund with a correct taxpayer identification number or make required certifications, or if the IRS notifies the Fund that the Fund shareholder is otherwise subject to backup withholding, and (ii) the Fund shareholder is not otherwise exempt from backup withholding. Non-U.S. shareholders can qualify for exemption from backup withholding by submitting a properly completed IRS Form W-8BEN or W-8BEN-E. Backup withholding is not an additional tax and any amount withheld may be credited against a Fund shareholder's U.S. federal income tax liability.

Taxation of Non-U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "non-U.S. shareholders." For purposes of this discussion, a "non-U.S. shareholder" is a beneficial owner of Shares that is not a U.S. shareholder (as defined above) and is not an entity or arrangement treated as a partnership for U.S. federal income tax purposes. The following discussion is based on current law and is for general information only. It addresses only selected, and not all, aspects of U.S. federal income taxation applicable to non-U.S. shareholders.

With respect to non-U.S. shareholders of the Fund, the Fund's ordinary income dividends generally will be subject to U.S. federal withholding tax at a rate of 30% (or at a lower rate established under an applicable tax treaty), subject to certain exceptions for "interest-related dividends" and "short-term capital gain dividends" discussed below. The Fund will not pay any additional amounts to shareholders in respect of any amounts withheld.

U.S. federal withholdings tax generally will not apply to any gain realized by a non-U.S. shareholder in receipt of the Fund's net capital gain. Special rules (not discussed herein) apply with respect to dividends of the Fund that are attributable to gain from the sale or exchange of "U.S. real property interests."

In general, all "interest related dividends" and "short-term capital gains dividends" (each defined below) will not be subject to U.S. federal withholding tax, provided that, among other requirements, the non-U.S. shareholder furnished the Fund with a completed IRS Form W8BEN or W-8BEN-E, as applicable, (or acceptable substitute documentation) establishing the non-U.S. shareholder's non-U.S. status and the Fund does not have actual knowledge or reason to know that the non-U.S. shareholder would be subject to such withholding tax if the non-U.S. shareholder were to receive the related amounts directly rather than as dividends from the Fund. "Interest-related dividends" generally means dividends designated by the Fund as attributable to the Fund's U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the Fund is at least 10% shareholder, reduced by expenses that are allocable to such income. "Short-term capital gain dividends" generally means dividends designated by the Fund as attributable to the excess of the Fund's net short-term capital gain over its net long-term capital loss. Depending on its circumstances, the Fund may treat such dividends, in whole or in part, as ineligible for these exceptions from withholding.

In general, subject to certain exceptions, non-U.S. shareholders will not be subject to U.S. federal income or withholdings tax in respect of a sale or other disposition of Shares of the Fund.

To claim a credit or refund for any Fund-level taxes on any undistributed net capital gain (as discussed above) or any taxes collected through back-up withholdings (discussed below), a non-U.S. shareholder must obtain a U.S. taxpayer identification number and file a U.S. federal income tax return even if the non-U.S. shareholder would not otherwise be required to do so.

Foreign Account Tax Compliance Act. The U.S. Foreign Account Tax Compliance Act ("FATCA") generally imposes a 30% withholding tax on "withholdable payments" (defined below) made to (i) a "foreign financial institution" ("FFI"), unless the FFI enters into an agreement with the IRS to provide information regarding certain of direct and indirect its U.S. accounts and satisfy certain due diligence and other specified requirements, and (ii) a "non-financial foreign entity" ("NFFE") unless such NFFE provides certain information about its direct and indirect "substantial U.S. owners" to the withholding agent or certifies that it has no such U.S. owners. The beneficial owner of a "withholdable payment" may be eligible for a refund or credit of the withheld tax. The U.S. government also has entered into intergovernmental agreements with other jurisdictions to provide an alternative, and generally easier, approach for FFIs to comply with FATCA. If the shareholder is a tax resident in a jurisdiction that has entered into an intergovernmental agreement with the U.S. government, the shareholder will be required to provide information about the shareholder's classification and compliance with the intergovernmental agreement.

"Withholdable payments" generally include, among other items, U.S.-source interest and dividends, and gross proceeds from the sale or disposition of property of a type that can produce U.S. source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

The Fund or a shareholder's broker may be required to impose a 30% withholding tax on withholdable payments to a shareholder if the shareholder fails to provide the Fund with the information, certifications or documentation required under FATCA, including information, certification or documentation necessary for the

Fund to determine if the shareholder is a non-U.S. shareholder or a U.S. shareholder and, if it is a non-U.S. shareholder, if the non-U.S. shareholder has "substantial U.S. owners" and/or is in compliance with (or meets an exception from) FATCA requirements. The Fund will not pay any additional amounts to shareholders in respect of any amounts withheld. The Fund may disclose any shareholder information, certifications or documentation to the IRS or other parties as necessary to comply with FATCA.

The requirements of, and exceptions from, FATCA are complex. All prospective shareholders are urged to consult their own tax advisors regarding the potential application of FATCA with respect to their own situation.

For a more detailed tax discussion regarding an investment in the Fund, please see the section of the SAI entitled "U.S. Federal Income Taxation."

Code of Ethics

The Trust, Advisor, Subadvisor and Distributor each have adopted a code of ethics under Rule 17j-1 of the 1940 Act that is designed to prevent affiliated persons of the Trust, the Advisor, the Subadvisor and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to a code). There can be no assurance that the codes will be effective in preventing such activities.

The codes permit personnel subject to them to invest in securities, including securities that may be held or purchased by the Fund. The codes are on file with the SEC and are available to the public.

Fund Website and Disclosure of Portfolio Holdings

The Advisor maintains a website for the Fund at newyorklifeinvestments.com/etf. The website for the Fund contains the following information, on a per-Share basis, for the Fund: (1) the prior Business Day's NAV; (2) the reported mid-point of the bid-ask spread at the time of NAV calculation (the "Bid-Ask Price"); (3) a calculation of the premium or discount of the Bid-Ask Price against such NAV; and (4) data in chart format displaying the frequency distribution of discounts and premiums of the Bid-Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters (or for the life of the Fund if, shorter). In addition, on each Business Day, before the commencement of trading in Shares on the NYSE Arca, the Fund will disclose on its website (newyorklifeinvestments.com/etf) the identities and quantities of the portfolio securities and other assets held by the Fund that will form the basis for the calculation of NAV at the end of the Business Day.

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the SAI.

Other Information

The Fund is not sponsored, endorsed, sold or promoted by the NYSE Arca. The NYSE Arca makes no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the Fund to achieve its objectives. NYSE Arca has no obligation or liability in connection with the administration, marketing or trading of the Fund.

For purposes of the 1940 Act, the Fund is treated as a registered investment company, and the acquisition of shares by other registered investment companies and companies relying on Sections 3(c)(1) and 3(c)(7) of the 1940 Act is subject to the restrictions of Section 12(d)(1) of the 1940 Act and the related rules and interpretations.

Financial Highlights

Financial highlights are not presented for the Fund since the Fund has not commenced operations.

Privacy Policy

The following notice does not constitute part of the Prospectus, nor is it incorporated into the Prospectus.

The Trust is committed to respecting the privacy of personal information you entrust to us in the course of doing business with us.

The Trust may collect non-public personal information from various sources. The Trust uses such information provided by you or your representative to process transactions, to respond to inquiries from you, to deliver reports, products, and services, and to fulfill legal and regulatory requirements.

We do not disclose any non-public personal information about our customers to anyone unless permitted by law or approved by the customer. We may share this information within the Trust's family of companies in the course of providing services and products to best meet your investing needs. We may share information with certain third-parties who are not affiliated with the Trust to perform marketing services, to process or service a transaction at your request or as permitted by law. For example, sharing information with companies that maintain or service customer accounts for the Trust is essential. We may also share information with companies that perform administrative or marketing services for the Trust, including research firms. When we enter into such a relationship, we restrict the companies' use of our customers' information and prohibit them from sharing it or using it for any purposes other than those for which they were hired.

We maintain physical, electronic, and procedural safeguards to protect your personal information. Within the Trust, we restrict access to personal information to those employees who require access to that information in order to provide products or services to our customers, such as handling inquiries. Our employment policies restrict the use of customer information and require that it be held in strict confidence.

We will adhere to the policies and practices described in this notice for both current and former customers of the Trust.

PROSPECTUS | SEPTEMBER 30, 2022

FOR MORE INFORMATION

If you would like more information about the Trust, the Fund and the Shares, the following documents are available free upon request:

Annual/Semi-annual Report

Additional information about the Fund's investments is available in the Fund's annual and semi-annual reports to shareholders (once available). In the Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during the last fiscal year.

Statement of Additional Information

Additional information about the Fund and its policies is also available in the SAI. The SAI is incorporated by reference into this Prospectus (and is legally considered part of this Prospectus). The Fund's annual and semi-annual reports (once available) and the Fund's SAI are available free upon request by calling IndexIQ at 1-888-474-7725. You can also access and download the annual and semi-annual reports (once available) and the SAI at the Fund's website: newyorklifeinvestments.com/etf.

To obtain other information and for shareholder inquiries:

By telephone: 1-888-474-7725

By mail: IndexIQ Active ETF Trust

c/o IndexIQ

51 Madison Avenue,

New York, NY 10010

On the Internet: SEC Edgar database: <http://www.sec.gov>; or newyorklifeinvestments.com/etf

You may review and obtain copies of Fund documents (including the SAI) by visiting the SEC's public reference room in Washington, D.C. You may also obtain copies of Fund documents, after paying a duplicating fee, by writing to the SEC's Public Reference Section, Washington, D.C. 20549-0102 or by electronic request to: publicinfo@sec.gov. Information on the operation of the public reference room may be obtained by calling the SEC at (202) 551-8090.

No person is authorized to give any information or to make any representations about the Fund and its Shares not contained in this Prospectus and you should not rely on any other information. Read and keep the Prospectus for future reference.

Dealers effecting transactions in the Fund's Shares, whether or not participating in this distribution, may be generally required to deliver a Prospectus. This is in addition to any obligation dealers have to deliver a Prospectus when acting as underwriters.

"New York Life Investments" is both a servicemark, and the common trade name, of certain investment advisors affiliated with New York Life Insurance Company.

IQ[®] and IndexIQ[®] are registered servicemarks of New York Life Insurance Company.
