

INDEXIQ ETF TRUST
INDEXIQ ACTIVE ETF TRUST
(the “Trusts” and each series of the Trusts, a “Fund”)

Supplement dated December 17, 2020 (“Supplement”)
to each Fund’s Summary Prospectus and Prospectus
dated August 28, 2020 (each, a “Prospectus”)

Capitalized terms and certain other terms used in this Supplement, unless otherwise defined in this Supplement, have the meanings assigned to them in the Prospectus.

Effective immediately, for each Fund, the first paragraph in the “Fees and Expenses of the Fund” section of the Prospectus is deleted in its entirety and replaced with the following:

This table describes fees and expenses that you may pay if you buy, sell or hold shares of the Fund (“Shares”). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Effective immediately, the first paragraph in the “Purchase and Sale of Fund Shares” section of the Prospectus is deleted in its entirety and replaced with the following:

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called “Creation Units.” Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund’s Shares may trade at a price greater than (premium) or less than (discount) the Fund’s NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information, including the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com

Investors Should Retain this Supplement for Future Reference

IndexIQ Active ETF Trust

Prospectus

August 28, 2020

IQ Ultra Short Duration ETF (ULTR)

NEITHER THE SECURITIES AND EXCHANGE COMMISSION (“SEC”) NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds’ shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

Not FDIC Insured | May Lose Value | No Bank Guarantee

IndexIQ Active ETF Trust (the “Trust”) is a registered investment company that consists of separate investment portfolios called “Funds.” This Prospectus relates to the following Fund:

| <u>Fund Name</u> | <u>CUSIP</u> | <u>Symbol</u> |
|-----------------------------|--------------|---------------|
| IQ Ultra Short Duration ETF | 45409F819 | ULTR |

The Fund is an exchange-traded fund (“ETF”). This means that shares of the Fund are listed on a national securities exchange, such as the NYSE Arca, Inc. (“NYSE Arca”), and trade at market prices. The market price for the Fund’s shares may be different from its net asset value per share (the “NAV”). The Fund has its own CUSIP number and exchange trading symbol.

Summary Information

IQ Ultra Short Duration ETF

Investment Objective

The IQ Ultra Short Duration ETF (the "Fund") seeks to provide current income while maintaining limited price volatility.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund ("Shares"). Most investors will incur customary brokerage commissions when buying or selling Shares of the Fund, which are not reflected in the table set forth below.

Shareholder Fees (fees paid directly from your investment):

None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

| | |
|--|--------------|
| Management Fee | 0.24% |
| Distribution and/or Service (12b-1) Fees | 0.00% |
| Other Expenses | 0.26% |
| Total Annual Fund Operating Expenses | 0.50% |
| Expense Waiver/Reimbursement ^(a) | 0.25% |
| Total Annual Fund Operating Expenses After Expense Waiver/Reimbursement | 0.25% |

(a) IndexIQ Advisors LLC (the "Advisor") has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses), to not more than 0.24% of average daily net assets of the Fund. The Agreement will remain in effect until August 31, 2021, unless terminated by the Board of Trustees.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

| | | | |
|---------------|----------------|----------------|-----------------|
| <u>1 Year</u> | <u>3 Years</u> | <u>5 Years</u> | <u>10 Years</u> |
| \$26 | \$135 | \$255 | \$604 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities or other instruments (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. This rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. During the most recent fiscal year, the Fund's portfolio turnover rates was 292% of the average value of the portfolio.

Principal Investment Strategies

The Fund is an actively managed ETF and thus does not seek to replicate the performance of a specific index. Instead, the Fund uses an active management strategy to meet its investment objective. Consequently, investors should not expect the Fund's returns to track the returns of any index or market for any period of time.

The Fund, under normal circumstances, invests at least 80% of its net assets in fixed income securities. The Fund typically invests at least 80% of its assets in fixed income securities rated BBB- or A-2 or higher by S&P Global Ratings ("S&P"), BBB- or F-2 or higher by Fitch Ratings, Inc. ("Fitch"), or Baa3 or Prime-2 or higher by Moody's Investors Service, Inc. ("Moody's"), or, if unrated, determined by the Fund's management to be of equivalent

quality. The Fund may invest in ETFs and closed-end funds that invest substantially all of their assets in investment grade fixed-income securities. Debt securities in which the Fund may invest include all types of debt obligations such as U.S. government securities (including Treasury notes, and obligations, such as repurchase agreements, secured by such instruments), agency securities, corporate bonds, instruments of non-U.S. issuers, asset-backed securities ("ABS") (including collateralized debt and loan obligations, residential mortgage-backed securities, and commercial mortgage-backed securities), commercial paper, debentures, floating rate bonds, and convertible corporate bonds. The Fund will generally seek to maintain a weighted average duration of 1 year or less. Duration is a measure used to determine the sensitivity of a security's price to changes in interest rates. The longer a security's duration, the more sensitive it will be to changes in interest rates. Duration differs from maturity in that it considers, among other characteristics, an instrument's yield, coupon payments, principal payments and call features in addition to the amount of time until the instrument matures. As the value of an instrument changes over time, so will its duration.

The Fund may invest up to 20% of its total assets in options and futures contracts, including short positions in options and future contracts, to manage interest rate risk in the Fund.

NYL Investors LLC (the "Subadvisor") seeks to identify investment opportunities through analyzing individual securities and evaluating each security's relative value and relevance for the Fund. The Subadvisor takes into account multiple factors when allocating across sectors and individual securities, including spread, duration, yield, liquidity, among other factors. The Subadvisor implements a disciplined, value-oriented investment process designed to maintain limited price volatility, which is expected to lead to the preservation of capital by seeking to avoid principal loss through strategic duration management, yield curve positioning, tactical sector allocation and security selection.

The Subadvisor may sell a security if it no longer believes the security will contribute to meeting the investment objective of the Fund. In considering whether to sell a security, the Subadvisor may evaluate, among other things, the condition of the economy and meaningful changes in the issuer's financial condition.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. You should consider carefully the following risks before investing in the Fund. A more complete discussion of Principal Risks is included under "Description of the Principal Risks of the Fund."

Asset-Backed Securities Risk

Asset-backed securities are securities that represent interests in, and whose values and payments are based on, a "pool" of underlying assets, which may include, among others, lower-rated debt securities and corporate loans, consumer loans or mortgages and leases of property. Asset-backed securities include collateralized debt obligations, collateralized bond obligations, and collateralized loan obligations and other similarly structured vehicles. As with other debt securities, asset-backed securities are subject to credit risk, extension risk, interest rate risk, liquidity risk and valuation risk. The impairment of the value of collateral or other assets underlying an asset-backed security, such as a result of non-payment of loans or non-performance of underlying assets, may result in a reduction in the value of such asset-backed securities and losses to the Fund.

Investments in mortgage-related securities make an investor more susceptible to adverse economic, interest rate, political or regulatory events that affect the value of real estate. Mortgage-related securities are also significantly affected by the rate of prepayments. Impairment of the underlying obligations or collateral, such as by non-payment, will reduce a mortgage-related security's value.

Authorized Participant Concentration Risk

Only certain large institutions (an "Authorized Participant") may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Cash Transactions Risk

The Fund currently intends to effect creations and redemptions principally for cash, rather than for in-kind securities. For this reason, the Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. The Fund may recognize a capital gain on these sales that might not have been incurred if the Fund had made a redemption in-kind. This may decrease the tax efficiency of the Fund compared to ETFs that utilize an in-kind redemption process.

Convertible Securities Risk

A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. Convertible securities are typically subordinate to an issuer's other debt obligations. Issuers of convertible securities may be more vulnerable to changes in the economy, such as a recession or a sustained period of rising interest rates, which could affect their ability to make interest and principal payments. If an issuer stops making interest and/or principal payments, the Fund could lose its entire investment.

Credit Risk

Credit risk is the risk that the issuer or guarantor of a debt instrument or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities will be unable or unwilling to make its timely interest and/or principal payments when due or otherwise honor its obligations. Changes in an issuer's or counterparty's credit rating or the market's perception of an issuer's or counterparty's creditworthiness may also adversely affect the value of the Fund's investment in that issuer. The degree of credit risk depends on an issuer's or counterparty's financial condition and on the terms of an obligation.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund's third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Debt Securities Risk

The risks of investing in debt securities include (without limitation): (i) credit risk, e.g., the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations; (ii) interest rate risk, e.g., when interest rates go up, the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up; (iii) liquidity risk and valuation risk, e.g., debt securities generally do not trade on a securities exchange, making them generally less liquid and more difficult to value than common stock; (iv) call risk and income risk, e.g., during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates; and (v) extension risk, e.g., if interest rates rise, repayments of debt securities may occur more slowly than anticipated by the market, which may drive the prices of these securities down because their interest rates are lower than the current interest rate and the securities remain outstanding longer. Debt securities most frequently trade in institutional round lot size transactions. If the Fund purchases bonds in amounts less than the institutional round lot size, which are frequently referred to as "odd" lots, the odd lot size positions may have more price volatility than institutional round lot size positions. The Fund uses a third-party pricing service to value bond holdings and the pricing service values bonds assuming orderly transactions of an institutional round lot size.

Derivatives Risk

Derivatives are investments whose value depends on (or is derived from) the value of an underlying instrument, such as a security, asset, reference rate or index and involve risks different from, and possibly greater than, the risks associated with other investments. These risks include: (i) the risk that the counterparty to a derivatives transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to, changing supply and demand relationships, government programs and policies, national and international political and economic events, changes in interest rates, inflation and deflation, and changes in supply and demand relationships.

Unlike other investments, derivative contracts often have leverage inherent in their terms. The use of leveraged derivatives can magnify potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's Share price. The effects of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. The less developed a country's securities market is, the greater the likelihood of custody problems.

Foreign Securities Valuation Risk

The Fund's value may be impacted by events that cause the fair value of foreign securities to materially change between the close of the local exchange on which they trade and the time at which the Fund prices its Shares. Additionally, because foreign exchanges on which securities held by the Fund may be open on days when the Fund does not price its Shares, the potential exists for the value of the securities in the Fund's portfolio to change on days when shareholders will not be able to purchase or sell the Fund's Shares.

Income Risk

The Fund's income may decline when interest rates fall or if there are defaults in its portfolio. This decline can occur because the Fund may subsequently invest in lower-yielding securities when securities in its portfolio mature or the Fund otherwise needs to purchase additional securities.

Interest Rate Risk

An increase in interest rates may cause the value of securities held by the Fund to decline. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity. The Fund may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives.

When interest rates rise, certain obligations will be paid off by the issuer (or other obligated party) more slowly than anticipated, causing the value of these securities to fall. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value. The value of securities with longer maturities generally changes more in response to changes in interest rates than does the value of securities with shorter maturities.

During periods of falling interest rates, an issuer of a callable security held by the Fund may "call" or repay the security before its stated maturity, which may result in the Fund having to reinvest the proceeds in securities with lower yields, resulting in a decline in the Fund's income, or in securities with greater risks or with other less favorable features.

Liquidity Risk

Liquidity risk exists when particular investments are difficult to purchase or sell. Certain investments may be subject to restrictions on resale, trade over-the-counter or in limited volume, or lack an active trading market. Accordingly, the Fund may not be able to sell or close out of such investments at favorable times or prices (or at all), or at the prices approximating those at which the Fund currently values them. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value.

Market Risk

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund's value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Money Market/Short-Term Securities Risk

To the extent the Fund holds cash or invests in money market or short-term securities, the Fund may be less likely to achieve its investment objective. In addition, it is possible that the Fund's investments in these instruments could lose money.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Advisor and Subadvisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result or, while it may be the desired result, may underperform other types of investment strategies. There can be no guarantee that the Fund will meet its investment objective(s).

Portfolio Turnover Risk

The Fund's strategy may frequently involve buying and selling portfolio securities to rebalance the Fund's investment exposures. High portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund's performance to be less than expected.

Repurchase Agreement Risk

Repurchase agreements are subject to the risks that the seller will become bankrupt or insolvent before the date of repurchase or otherwise will fail to repurchase the security as agreed, which could cause losses to the Fund.

Secondary Market Trading Risk

Although the Fund's Shares are listed for trading on one or more securities exchanges, there can be no assurance that an active trading market for such Shares will develop or be maintained by market makers or Authorized Participants. In general, the trading of Shares on securities exchanges is subject to the risk of irregular trading activity and wide "bid/ask" spreads (which may be especially pronounced for smaller funds). Additionally, market makers are under no obligation to make a market in the Fund's Shares and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund's Shares or Authorized Participants stop submitting purchase or redemption orders for Creation Units, the Fund's Shares may trade at a larger premium or discount to its NAV. Wide bid-ask spreads and large premiums or discounts to NAV are likely to lead to an investor buying his or her shares at a market price that is more than their value, and selling those shares at a market price that is less than their value.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours

based on both market supply of and demand for Shares and the underlying value of the Fund's portfolio holdings or NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Valuation Risk

Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the value of the securities or other assets in the Fund's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell the Fund's Shares.

Performance Information

As of the date of this Prospectus, the Fund has not yet completed a full calendar year of operations and therefore does not report its performance information. The Fund's performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting nylinvestments.com/etfs.

Investment Advisor and Subadvisor

IndexIQ Advisors LLC is the investment advisor to the Fund.

NYL Investors LLC serves as the investment subadvisor to the Fund.

Portfolio Managers

The professionals jointly and primarily responsible for the day-to-day management of the Fund are:

| <u>Name & Title</u> | <u>Length of Service with Subadvisor</u> | <u>Length of Service as Fund's Portfolio Manager</u> |
|-----------------------------------|--|--|
| Kenneth Sommer, Managing Director | 4 years | Since inception |
| Matthew Downs, Senior Director | 4 years | Since inception |

Purchase and Sale of Fund Shares

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in blocks of 50,000 Shares or whole multiples thereof ("Creation Units"). The Fund's Creation Units are issued and redeemed principally in cash based on the then-current value of the securities included in the Fund. Retail investors may acquire Shares on the NYSE Arca through a broker-dealer. Shares of the Fund will trade at market price rather than NAV. As such, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

Tax Information

The Fund's distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Overview

The Trust is an investment company consisting of a number of separate investment portfolios (each, a "Fund") that are ETFs. ETFs are funds whose shares are listed on a stock exchange and traded like equity securities at market prices. ETFs, such as the Fund, allow you to buy or sell shares that represent the collective performance of a selected group of securities. ETFs are designed to add the flexibility, ease and liquidity of stock-trading to the benefits of traditional fund investing.

This Prospectus provides the information you need to make an informed decision about investing in the Fund. It contains important facts about the Trust as a whole and the Fund in particular.

IndexIQ Advisors LLC is the investment advisor to the Fund. NYL Investors LLC is the investment subadvisor to the Fund.

Description of the Principal Strategies of the Fund

Information about the Fund's investment objective and principal investment strategies appears in the summary section for the Fund at the beginning of the Prospectus. The information below describes in additional detail certain principal and other investments and investment practices of the Fund.

The Fund is an actively managed ETF and thus does not seek to replicate the performance of a specific index. Instead, the Fund uses an active investment strategy to meet its investment objective. The Subadvisor, subject to the oversight of the Advisor and Board of Trustees of the Trust (the "Board"), has discretion on a daily basis to manage the Fund's portfolio in accordance with the Fund's investment objective and investment policies.

To the extent the Fund makes investments on behalf of the Fund that are regulated by the Commodities Futures Trading Commission, it intends to do so in accordance with Rule 4.5 under the Commodity Exchange Act ("CEA"). The Advisor has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with Rule 4.5 and is therefore not subject to registration or regulation as a commodity pool operator under the CEA.

The Fund's portfolio holdings will be disclosed on the Trust's website (nylinvestments.com/etfs) daily after the close of trading on the NYSE Arca (the "Exchange") and prior to the opening of trading on the Exchange the following day.

Additional Investment Strategies

Each of the policies described herein, including the investment objective of the Fund, constitutes a non-fundamental policy that may be changed by the Board without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information (the "SAI") under "Investment Restrictions."

Temporary Defensive Positions

In times of unusual or adverse market, economic or political conditions or abnormal circumstances (such as large cash inflows or anticipated large redemptions), the Fund may, for temporary defensive purposes or for liquidity purposes (which may be for a prolonged period), invest outside the scope of its principal investment strategies. Under such conditions, the Fund may not invest in accordance with its investment objective or principal investment strategies and, as a result, there is no assurance that the Fund will achieve its investment objective. Under such conditions, the Fund may also invest without limit in cash, money market securities or other investments.

Description of the Principal Risks of the Fund

Investors in the Fund should carefully consider the risks of investing in the Fund as set forth in the Fund's Summary Information section under "Principal Risks." To the extent such risks apply, they are discussed hereunder in greater detail. See also the section on "Additional Risks" for other risk factors.

Asset-Backed Securities Risk

Asset-backed securities are securities that represent interests in, and whose values and payments are based on, a "pool" of underlying assets, which may include, among others, lower-rated debt securities and corporate loans, consumer loans or mortgages and leases of property. Asset-backed securities include collateralized debt

obligations, collateralized bond obligations, and collateralized loan obligations and other similarly structured vehicles. As with other debt securities, asset-backed securities are subject to credit risk, extension risk, interest rate risk, liquidity risk and valuation risk. Certain asset-backed securities do not have the benefit of the same security interest in the related collateral as do mortgage-backed securities, nor are they provided government guarantees of repayment. Credit card receivables are generally unsecured, and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. In addition, some issuers of automobile receivables permit the servicers to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related automobile receivables. The impairment of the value of collateral or other assets underlying an asset-backed security, such as a result of non-payment of loans or non-performance of underlying assets, may result in a reduction in the value of such asset-backed securities and losses to a Fund.

Investments in mortgage-related securities make an investor more susceptible to adverse economic, political or regulatory events that affect the value of real estate. Mortgage-related securities are also significantly affected by the rate of prepayments and modifications of the mortgage loans underlying those securities, as well as by other factors such as borrower defaults, delinquencies, realized or liquidation losses and other shortfalls. Mortgage-related securities are particularly sensitive to prepayment risk, given that the term to maturity for mortgage loans is generally substantially longer than the expected lives of those securities. As the timing and amount of prepayments cannot be accurately predicted, the timing of changes in the rate of prepayments of the mortgage loans may significantly affect a Fund's actual yield to maturity on any mortgage-related securities. Along with prepayment risk, mortgage-related securities are significantly affected by interest rate risk. In a low interest rate environment, mortgage loan prepayments would generally be expected to increase due to factors such as refinancings and loan modifications at lower interest rates. In contrast, if prevailing interest rates rise, prepayments of mortgage loans would generally be expected to decline and therefore extend the weighted average lives of mortgage-related securities held or acquired by a Fund. Fund investments in mortgage-backed securities issued by Ginnie Mae are backed by the full faith and credit of the U.S. government. Fund investments in mortgage-backed securities issued by Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government, and there can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities where it is not obligated to do so. Impairment of the underlying obligations or collateral, such as by non-payment, will reduce a mortgage-related security's value. Enforcing rights against such collateral in events of default may be difficult or insufficient. These securities may have a structure that makes their reaction to interest rate changes and other factors difficult to predict, making their value highly volatile.

Authorized Participant Concentration Risk

Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting. This risk may be heightened for ETFs that invest in non-U.S. securities because such securities often involve greater settlement and operational issues for Authorized Participants that may further limit the availability of Authorized Participants.

Cash Transactions Risk

The Fund currently intends to effect creations and redemptions principally for cash, rather than for in-kind securities. For this reason, the Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. The Fund may recognize a capital gain on these sales that might not have been incurred if the Fund had made a redemption in-kind. This may decrease the tax efficiency of the Fund compared to ETFs that utilize an in-kind redemption process.

Convertible Securities Risk

Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer, depending on the terms of the securities) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. If a convertible security held by a Fund is called for redemption or conversion, such Fund could be required to tender it for

redemption, convert it into the underlying equity security or sell it to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objective. The market values of convertible securities tend to decline as interest rates increase. However, a convertible security's market value also tends to reflect the market price of the equity security of the issuing company, particularly when the price of the equity security is greater than the convertible security's conversion price (i.e., the predetermined price or exchange ratio at which the convertible security can be converted or exchanged for the underlying equity security). Convertible securities are also exposed to the risk that an issuer will be unable to meet its obligation to make dividend or principal payments when due as a result of changing financial or market conditions. Convertible debt securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of their potential for capital appreciation. Moreover, there can be no assurance that convertible securities will provide current income prior to conversion because the issuers of the convertible securities may default on their obligations. If the convertible security has a conversion or call feature that allows the issuer to redeem the security before the conversion date, the potential for capital appreciation may be diminished. In the event that convertible securities are not optional but mandatory based upon the price of the underlying common stock, a Fund may be subject to additional exposure to loss of income in situations where it would prefer to hold debt.

Credit Risk

Credit risk is the risk that the issuer or guarantor of a debt instrument or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities will be unable or unwilling to make its timely interest and/or principal payments or to otherwise honor its obligations. There are varying degrees of credit risk, depending on an issuer's or counterparty's financial condition and on the terms of an obligation, which may be reflected in the issuer's or counterparty's credit rating. There is the chance that the Fund's portfolio holdings will have their credit ratings downgraded or will default (i.e., fail to make scheduled interest or principal payments), or that the market's perception of an issuer's or counterparty's creditworthiness may worsen, potentially reducing the Fund's income level or Share price. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio securities and/or perceptions related thereto.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. These risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of security issuers, the Advisor, distributor and other service providers (including, but not limited to, sub-advisors, index providers, fund accountants, custodians, transfer agents and administrators), market makers, Authorized Participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines and other penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, Authorized Participants or market makers. There is no guarantee that such preventative efforts will succeed, and the Fund and its shareholders could be negatively impacted as a result.

Debt Securities Risk

The risks of investing in debt securities include (without limitation): (i) credit risk, e.g., the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations; (ii) interest rate risk, e.g., when interest rates go up,

the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up; (iii) liquidity risk and valuation risk, e.g., debt securities generally do not trade on a securities exchange, making them generally less liquid and more difficult to value than common stock; (iv) call risk and income risk, e.g., during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce a Fund's income if the proceeds are reinvested at lower interest rates; and (v) extension risk, e.g., if interest rates rise, repayments of debt securities may occur more slowly than anticipated by the market, which may drive the prices of these securities down because their interest rates are lower than the current interest rate and the securities remain outstanding longer. Debt securities most frequently trade in institutional round lot size transactions. If the Fund purchases bonds in amounts less than the institutional round lot size, which are frequently referred to as "odd" lots, the odd lot size positions may have more price volatility than institutional round lot size positions. The Fund uses a third-party pricing service to value bond holdings and the pricing service values bonds assuming orderly transactions of an institutional round lot size.

Derivative Risks

Derivatives are investments whose value depends on (or is derived from) the value of an underlying instrument, such as a security, asset, reference rate or index and involve risks different from, and possibly greater than, the risks associated with other investments. These risks include: (i) the risk that the counterparty to a derivatives transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to, changing supply and demand relationships, government programs and policies, national and international political and economic events, changes in interest rates, inflation and deflation, and changes in supply and demand relationships. Unlike other investments, derivative contracts often have leverage inherent in their terms. This leverage creates a disconnect between the initial amount of an investment relative to the risk assumed and introduces the possibility that a relatively small movement in the value of an underlying reference asset can result in an immediate and substantial loss to a party to a derivative contract. In general, the use of leveraged derivatives can magnify potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's Share price. The effects of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. In the event of the bankruptcy or insolvency of a counterparty, the Fund could experience the loss of some or all of its investment in a derivative or experience delays in liquidating its positions, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, and an inability to realize any gains on its investment during such period. The Fund may also incur fees and expenses in enforcing its rights. Certain derivatives are subject to mandatory clearing. Central clearing is intended to reduce counterparty credit risk and increase liquidity, but central clearing does not make derivatives transactions risk-free.

Foreign Securities Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Some countries and regions have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, custody, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent a Fund from repatriating its investments. Non-U.S. transaction costs, such as brokerage commissions and custody costs, may be higher than in the United States. In some non-U.S. markets, custody arrangements for securities provide significantly less protection than custody arrangements in U.S. markets. Prevailing custody and trade settlement practices (e.g., the requirement to pay for securities prior to receipt) could similarly expose a Fund to credit and other risks it does not have in the United States with respect to participating brokers, custodians, clearing banks or other clearing agents, escrow agents and issuers. In addition, the Fund may not receive shareholder communications or be permitted to vote the securities it holds, as the issuers may be under no legal obligation to distribute them.

Less developed securities markets are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Low trading volumes and volatile prices in less developed markets make trades harder to complete and settle, and governments or trade groups may compel local agents to hold securities in designated depositories that are not subject to independent evaluation. Local agents are held only to the standards of care of their local markets. The less developed a country's securities market is, the greater the likelihood of custody problems.

Income Risk

The Fund's income may decline when interest rates fall. This decline can occur because the Fund must invest in lower-yielding securities as bonds or other fixed-income securities in its portfolio mature or the Fund otherwise needs to purchase additional securities.

Interest Rate Risk

An increase in interest rates may cause the value of certain fixed income securities held by the Fund to decline. Many factors can cause interest rates to rise, such as central bank monetary policies, inflation rates, general economic conditions and expectations about the foregoing. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity. Substantial shareholder redemptions may worsen this impact. An increase in interest rates could also cause principal payments on a fixed income security to be repaid at a slower rate than expected. This risk is particularly prevalent for a callable debt security where an increase in interest rates could cause the issuer of that security to not redeem the security as anticipated on the call date, effectively lengthening the security's expected maturity, in turn making that security more vulnerable to interest rate risk and reducing its market value. The Fund may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives.

When interest rates rise, certain obligations will be paid off by the issuer (or other obligated party) more slowly than anticipated, causing the value of these securities to fall. Rising interest rates tend to extend the duration of fixed income securities, making their market value more sensitive to changes in interest rates. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value. The value of securities with longer maturities generally changes more in response to changes in interest rates than does the value of securities with shorter maturities. Extension risk is particularly prevalent for a callable fixed income security where an increase in interest rates could result in the issuer of that security choosing not to redeem the security as anticipated on the security's call date. Such a decision by the issuer could have the effect of lengthening the security's expected maturity, making it more vulnerable to interest rate risk and reducing its market value.

Some securities may be redeemed at the option of the issuer, or "called," before their stated maturity date. In general, an issuer will call its debt securities if they can be refinanced by issuing new debt securities which bear a lower interest rate. The Fund is subject to the possibility that during periods of falling interest rates an issuer will call its high-yielding debt securities. The Fund may then be forced to invest the unanticipated proceeds in securities with lower yields, resulting in a decline in the Fund's income, or in securities with greater risks or with other less favorable features. Such redemptions and subsequent reinvestments would also increase the Fund's portfolio turnover. If a called debt security was purchased by the Fund at a premium, the value of the premium may be lost in the event of a redemption.

Liquidity Risk

Liquidity risk exists when particular investments are difficult to purchase or sell. To the extent the Fund invests in illiquid securities or securities that become less liquid, such investments may have a negative effect on the returns of the Fund because the Fund may be unable to sell the illiquid securities at an advantageous time or price. Securities with substantial market and/or credit risk may be especially susceptible to liquidity risk. Liquidity risk may be the result of, among other things, an investment being subject to restrictions on resale, trading over-the-counter or in limited volume, or lacking an active trading market. Liquid investments may become illiquid or less liquid after purchase by the Fund, particularly during periods of market turmoil or economic uncertainty. Illiquid and relatively less liquid investments may be harder to value, especially in changing markets. If the Fund is forced to sell underlying investments at reduced prices or under unfavorable conditions to meet redemption requests or for other cash needs, the Fund may suffer a loss. This may be magnified in a

rising interest rate environment or under other circumstances where redemptions from the Fund may be higher than normal. It may also be the case that other market participants may be attempting to liquidate similar holdings at the same time as the Fund, causing increased supply in the market and contributing to liquidity risk and downward pricing pressure. There can be no assurance that a security that is deemed to be liquid when purchased will continue to be liquid or as long as it is held by the Fund.

Market Risk

The value of the Fund's investments may fluctuate and/or decline because of changes in the markets in which the Fund invests, which could cause the Fund to underperform other funds with similar investment objectives and strategies. Security markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Changes in these markets may be rapid and unpredictable. Fluctuations in the markets generally or in a specific industry or sector may impact the securities in which the Fund invests. From time to time, markets may experience periods of stress for potentially prolonged periods that may result in: (i) increased market volatility; (ii) reduced market liquidity; and (iii) increased redemptions of Fund shares. Such conditions may add significantly to the risk of volatility in the NAV of the Fund's Shares and the market prices at which Shares of the Fund trade on a securities exchange. During periods of market stress Shares of the Fund may also experience significantly wider "bid/ask" spreads and premiums and discounts between the Fund's NAV and market price.

Market changes may impact equity and fixed income securities in different and, at times, conflicting manners. The Fund potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations or market closures. Thus, investments that the Advisor or Subadvisor believes best enable the Fund to track the performance of its Underlying Index may be unavailable entirely or in the specific quantities sought by the Advisor or Subadvisor and the Fund may need to obtain the exposure through less advantageous or indirect investments or forgo the investment at the time. Securities and investments included as components of an Underlying Index may be susceptible to declines in value, including declines in value that are not believed to be representative of the issuer's value or fundamentals, due to investor reactions to such events. In response to market volatility and disruption, an Underlying Index may delay rebalancing, implement temporary or permanent modifications to its methodology or take other actions.

Political and diplomatic events within the United States and abroad, such as the U.S. budget and deficit reduction plans, protectionist measures, trade tensions central bank policy and government intervention in the economy, has in the past resulted, and may in the future result, in developments that present additional risks to the Fund's investments and operations. Geopolitical and other events, such as war, acts of terrorism, natural disasters, the spread of infectious illnesses, epidemics and pandemics, environmental and other public health issues, recessions or other events, and governments' reactions to such events, may lead to increased market volatility and instability in world economies and markets generally and may have adverse effects on the performance of the Fund and its investments. Additional and/or prolonged geopolitical or other events may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Any such market, economic and other disruptions could also prevent the Fund from executing its investment strategies and processes in a timely manner.

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares, they could be worth less than what you paid for them.

Market Disruption Risk and Recent Market Events

Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. Recent market disruption events include the pandemic spread of the novel coronavirus known as COVID-19, and the significant restrictions, market volatility, decreased economic and other activity and increased government activity that it has caused. Specifically, COVID-19 has led to significant death and morbidity, and

concerns about its further spread have resulted in the closing of schools and non-essential businesses, cancellations, shelter-in-place orders, lower consumer spending in certain sectors, social distancing, bans on large social gatherings and travel, quarantines, government economic stimulus measures, reduced productivity, rapid increases in unemployment, increased demand for and strain on government and medical resources, border closings and global trade and supply chain interruptions, among others. The full effects, duration and costs of the COVID-19 pandemic are impossible to predict, and the circumstances surrounding the COVID-19 pandemic will continue to evolve. The pandemic may affect certain countries, industries, economic sectors, companies and investment products more than others, may exacerbate existing economic, political, or social tensions and may increase the probability of an economic recession or depression. The Fund and its investments may be adversely affected by the effects of the COVID-19 pandemic, and a prolonged pandemic may result in the Fund and its service providers experiencing operational difficulties in coordinating a remote workforce and implementing their business continuity plans, among others.

Money Market/Short-Term Securities Risk

To the extent that the Fund invests in money market or short-term securities, the Fund may be subject to certain risks associated with such investments. An investment in a money market fund or short-term securities is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. It is possible for the Fund to lose money by investing in money market funds. A money market fund may not achieve its investment objective. Changes in government regulations may affect the value of an investment in a money market fund.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Advisor and Subadvisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Portfolio Management Risk

The Fund is subject to portfolio management risk because it is an actively managed portfolio. In managing the Fund's investment portfolio, the portfolio managers will apply investment techniques and risk analyses that may not produce the desired result, or, while it may be the desired result, may underperform other types of investment strategies. There can be no guarantee that the Fund will meet its investment objective(s). In addition, the Fund may not achieve its investment objective if the portfolio managers take temporary positions in response to unusual or adverse market, economic or political conditions, or other unusual or abnormal circumstances. The investments selected by the Fund's portfolio managers may underperform the market or other investments.

Repurchase Agreement Risk

Repurchase agreements are subject to counterparty risks, including the risk that the seller of the underlying security will become bankrupt or insolvent before the date of repurchase or otherwise will fail to repurchase the security as agreed, which could cause losses to a Fund. If the seller defaults on its obligations under the agreement, a Fund may incur costs, lose money or suffer delays in exercising its rights under the agreement. If the seller fails to repurchase the underlying instruments collateralizing the repurchase agreement, a Fund may lose money. The credit, liquidity and other risks associated with repurchase agreements are heightened when a repurchase agreement is secured by collateral other than cash or U.S. government securities.

Secondary Market Trading Risk

Although the Fund's Shares are listed for trading on one or more securities exchanges, there can be no assurance that an active trading market for such Shares will develop or be maintained by market makers or Authorized Participants. The trading of Shares on securities exchanges is subject to the risk of irregular trading activity. Additionally, market makers are under no obligation to make a market in the Fund's Shares and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund's Shares or Authorized Participants stop submitting purchase or redemption orders for Creation Units, the Fund's Shares may trade at a larger premium or discount to its NAV.

Buying or selling Shares on an exchange involves two types of costs that apply to all securities transactions. When buying or selling Shares through a broker, you will likely incur a brokerage commission and other charges. In addition, you may incur the cost of the "spread"—the difference between what investors are willing to pay

for Shares (the "bid" price) and the price at which they are willing to sell Fund Shares (the "ask" price). The spread, which varies over time for Shares based on trading volume and market liquidity, is generally narrower if the Fund has more trading volume and market liquidity and wider if the Fund has less trading volume and market liquidity. The risk of wide bid and ask spreads may be especially pronounced for smaller funds. In addition, increased market volatility may cause wider spreads. There may also be regulatory and other charges that are incurred as a result of trading activity. Because of the costs inherent in buying or selling Shares, frequent trading may detract significantly from investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments through a brokerage account.

Securities exchanges have requirements that must be met in order for Shares to be listed. There can be no assurance that the requirements of an exchange necessary to maintain the listing of Shares will continue to be met. This risk is particularly acute for funds that fail to attract a large number of shareholders. Pursuant to an exchange's "circuit breaker" rules, trading in the Fund's Shares may be halted due to extraordinary market volatility.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the Fund's NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. The market price of the Fund's Shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade the Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that an investor most wants to sell their Shares. Although it is generally expected that the market price of the Fund's Shares will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares. While the creation/redemption feature is designed to make it more likely that the Fund's Shares normally will trade on securities exchanges at prices close to the Fund's next calculated NAV, exchange prices are not expected to correlate exactly with the Fund's NAV due to timing reasons, supply and demand imbalances and other factors. In addition, disruptions to creations and redemptions, including disruptions at market makers, Authorized Participants, or other market participants, and during periods of significant market volatility, may result in trading prices for Shares of the Fund that differ significantly from its NAV. Authorized Participants may be less willing to create or redeem Shares if there is a lack of an active market for such Shares or its underlying investments, which may contribute to the Fund's Shares trading at a premium or discount to NAV. Additionally, similar to shares of other issuers listed on a securities exchange, the Fund's Shares may be sold short and are therefore subject to the risk of increased volatility and price decreases associated with being sold short. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV.

Valuation Risk

Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the value of the securities or other assets in the Fund's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell the Fund's Shares. Authorized Participants who purchase or redeem Shares on days when the Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received had the Fund not fair-valued securities or used a different valuation methodology. The Fund's ability to value investments may be impacted by technological issues or errors by pricing services or other third-party service providers.

Additional Risks

Absence of Prior Active Market

Although Shares are approved for listing on the NYSE Arca, there can be no assurance that an active trading market will develop and be maintained for the Shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience more difficulty achieving its investment objectives than it otherwise would at higher asset levels, or the Fund may ultimately liquidate.

Large Investments Risk

From time to time, the Fund may receive large purchase or redemption orders from affiliated or unaffiliated funds or other investors. In addition, any third-party investor, investment adviser affiliate, authorized participant, lead market maker or other entity may make a large investment in the Fund and hold its investment for any number of reasons, including to facilitate the Fund's commencement of operations or to facilitate the Fund's achieving a specified size or scale. There can be no assurance that any large shareholder would not sell or redeem its investment at any given time, either in a single transaction or over time. These large transactions, and particularly redemptions, could have adverse effects on the Fund, including: (i) negative impacts to performance if the Fund were required to sell securities, invest cash or hold significant cash at times when it otherwise would not do so; (ii) wider price spreads or greater premiums/discounts that could materialize as a result of lower secondary market volume of shares; and (iii) negative federal income tax consequences if this activity accelerated the realization of capital gains.

U.S. Tax Risk

To qualify for the favorable U.S. federal income tax treatment accorded to regulated investment companies, the Fund must satisfy certain income, asset diversification and distribution requirements. If for any taxable year, the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to its shareholders, and such distributions would be taxable to its shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits.

Buying and Selling Shares in the Secondary Market

Most investors will buy and sell Shares of the Fund in Secondary Market transactions through brokers. Shares of the Fund will be listed for trading on the Secondary Market on the NYSE Arca. Shares can be bought and sold throughout the trading day like other publicly-traded shares. Unless imposed by your broker or dealer, there is no minimum dollar amount you must invest and no minimum number of Shares you must buy in the Secondary Market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the Secondary Market on each leg of a round trip (purchase and sale) transaction. In addition, because transactions in the Secondary Market occur at market prices, you may pay more than NAV when you buy Shares and receive less than NAV when you sell those Shares.

Share prices are reported in dollars and cents per Share. For information about buying and selling Shares in the Secondary Market, please contact your broker or dealer.

Book Entry

Shares of the Fund are held in book-entry form and no stock certificates are issued. DTC, through its nominee Cede & Co., is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants.

These procedures are the same as those that apply to any securities that you hold in book entry or "street name" form for any publicly-traded company. Specifically, in the case of a shareholder meeting of the Fund, DTC assigns applicable Cede & Co. voting rights to its participants that have Shares credited to their accounts on the record date, issues an omnibus proxy and forwards the omnibus proxy to the Fund. The omnibus proxy transfers the voting authority from Cede & Co. to the DTC participant. This gives the DTC participant through whom you own Shares (namely, your broker, dealer, bank, trust company or other nominee) authority to vote the shares, and, in turn, the DTC participant is obligated to follow the voting instructions you provide.

Management

The Board is responsible for the general supervision of the Fund. The Board appoints officers who are responsible for the day-to-day operations of the Fund,

Investment Advisor

The Advisor has been registered as an investment advisor with the SEC since August 2007 and is a wholly-owned indirect subsidiary of New York Life Investment Management Holdings LLC. The Advisor's principal office is at 51 Madison Avenue, New York, New York 10010. As of June 30, 2020, the Advisor had approximately \$3.1 billion in assets under management.

The Advisor has overall responsibility for the general management and administration of the Trust. The Advisor provides an investment program for the Fund. The Advisor has delegated certain advisory duties with regard to the Fund (including management of all of the Fund's assets) to the Subadvisor. The Advisor has also arranged for custody, fund administration, transfer agency and all other non-distribution related services necessary for the Fund to operate.

As compensation for its services and its assumption of certain expenses, the Fund pays the Advisor a management fee equal to 0.24% of the Fund's average daily net assets that is calculated daily and paid monthly. The Advisor may voluntarily waive any portion of its advisory fee from time to time, and may discontinue or modify any such voluntary limitations in the future at its discretion.

The Advisor serves as advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). The Advisory Agreement was approved by the Independent Trustees of the Trust at its annual meeting. The basis for the Board's approval of the Advisory Agreement will be available in the Trust's Annual or Semiannual Report to Shareholders.

Section 15(a) of the 1940 Act requires that all contracts pursuant to which persons serve as investment advisors to investment companies be approved by shareholders. As interpreted, this requirement also applies to the appointment of subadvisors to the Fund. The Advisor and the Fund have obtained an exemptive order (the "Order") from the SEC permitting the Advisor, on behalf of the Fund and subject to the approval of the Board, including a majority of the Independent Trustees, to hire or terminate unaffiliated subadvisors and to modify any existing or future subadvisory agreement with unaffiliated subadvisors without shareholder approval. This authority is subject to certain conditions. The Fund will notify shareholders and provide them with certain information required by the Order within 90 days of hiring a new subadvisor. The Fund's sole shareholder has approved the use of the Order. Please see the SAI for more information on the Order.

Expense Limitation Agreement

The Advisor has entered into an Expense Limitation Agreement with the Fund under which it has agreed to waive or reduce its fees and to assume other expenses of the Fund, if necessary, in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage commissions and other expenses that are capitalized in accordance with generally accepted accounting principles, dividend, interest and brokerage expenses paid on short sales, acquired fund fees and expenses, extraordinary expenses, if any, and payments, if any, under the Rule 12b-1 Plan) to not more than 0.25% of the average daily net assets for the Fund.

The agreement will remain in effect until August 31, 2021, unless terminated by the Trust's Board. The Advisor currently expects that the contractual agreement will continue from year-to-year, provided such continuance is approved by the Trust's Board on behalf of the Fund. The Fund may terminate the Expense Limitation Agreement at any time. The Advisor may also terminate the Expense Limitation Agreement at the end of the then-current term upon not less than 90 days' notice to the Fund. The terms of the Expense Limitation Agreement may be revised upon renewal. The Advisor is permitted to recoup from the Fund previously waived fees or reimbursed expenses for three years from the date of such fee waiver or expense reimbursement, as long as such recoupment does not cause the Fund's operating expenses to exceed the expense cap set forth in the Expense Limitation Agreement or any then applicable expense limit.

Subadvisor

Pursuant to an Investment Subadvisory Agreement (the "Subadvisory Agreement") with the Advisor, NYL Investors LLC (the "Subadvisor"), located at 51 Madison Avenue, New York, NY 10010, serves as the subadvisor to the Fund and makes investment decisions, and buys and sells securities for the Fund. For its services to the Fund, the Subadvisor is compensated by the Advisor based on a percentage of net assets. To the extent that the Advisor has agreed to waive its management fee or reimburse expenses, the Subadvisor has agreed to waive or reimburse its fee proportionately. The basis for the Board's approval of the Subadvisory Agreement will be available in the Trust's Annual or Semiannual report to shareholders.

NYL Investors LLC was established in 2014 as an independent investment advisor. Previously, NYL Investors LLC operated as a division of New York Life Investment Management LLC. NYL Investors is a wholly-owned subsidiary of New York Life. As of June 30, 2020, NYL Investors managed approximately \$267 billion in assets.

Portfolio Management

The Advisor acts as advisor to the Fund and is responsible for the overall management of the investment portfolios of the Fund. Under the supervision of the Advisor, the Subadvisor is responsible for making the specific decisions about the following: (i) buying, selling and holding securities; (ii) selecting brokers and brokerage firms to trade for them; (iii) maintaining accurate records; and, if possible, (iv) negotiating favorable commissions and fees with the brokers and brokerage firms for all the Funds they oversee. For these services, the Subadvisor is paid a monthly fee by the Advisor out of the Advisor's management fee, not the Fund. See the SAI for a breakdown of fees.

The following portfolio managers are primarily responsible for the day-to-day management of the Fund:

Kenneth Sommer, Managing Director

Mr. Sommer is a Managing Director and the Head of the Investment Grade Portfolio Management team of NYL Investors LLC. He joined NYL Investors in 2005. Previously, he was an investment analyst at MetLife Investments. Mr. Sommer earned his B.S. from Binghamton University, SUNY and a MA from Fordham University.

Matthew Downs, Senior Director

Mr. Downs is a Senior Director of NYL Investors LLC. He joined New York Life Investment Management LLC in 2005 and is a portfolio manager in the Investment Grade Portfolio Management Group. Mr. Downs earned his BBA from Fordham University and a MBA from Pace University Lubin School of Business.

For more information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund, see the SAI.

Other Service Providers

Fund Administrator, Custodian, Transfer Agent and Securities Lending Agent

The Bank of New York Mellon ("BNY Mellon"), located at 240 Greenwich Street, New York, New York 10286, serves as the Fund's Administrator, Custodian, Transfer Agent and Securities Lending Agent. BNY Mellon is the principal operating subsidiary of The Bank of New York Mellon Corporation.

Under the Fund Administration and Accounting Agreement (the "Administration Agreement"), BNY Mellon serves as Administrator for the Fund. Under the Administration Agreement, BNY Mellon provides necessary administrative, legal, tax, accounting services, and financial reporting for the maintenance and operations of the Trust. In addition, BNY Mellon makes available the office space, equipment, personnel and facilities required to provide such services.

BNY Mellon supervises the overall administration of the Trust, including, among other responsibilities, assisting in the preparation and filing of documents required for compliance by the Fund with applicable laws and regulations and arranging for the maintenance of books and records of the Fund. BNY Mellon provides persons satisfactory to the Board to serve as officers of the Trust.

Distributor

ALPS Distributors, Inc., 1290 Broadway, Suite 1100, Denver, Colorado 80203 serves as the Distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a Secondary Market in Shares. NYLIFE Distributors LLC has entered into a Services Agreement with ALPS to market the Fund.

Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, NY 10017, serves as the independent registered public accounting firm for the Trust.

Legal Counsel

Chapman and Cutler LLP, 1717 Rhode Island Avenue N.W., Washington, D.C. 20036, serves as counsel to the Trust and the Fund.

Frequent Trading

The Trust's Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Fund Shares by Shareholders ("market timing"). In determining not to adopt market timing policies and procedures, the Board noted that the Fund is expected to be attractive to active institutional and

retail investors interested in buying and selling Shares on a short-term basis. In addition, the Board considered that, unlike traditional mutual funds, Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants, and that the vast majority of trading in the Fund's Shares occurs on the Secondary Market. Because Secondary Market trades do not involve the Fund directly, it is unlikely those trades would cause many of the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With respect to trades directly with the Fund, to the extent effected in-kind (namely, for securities), those trades do not cause any of the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs (the Fund may impose higher transaction fees to offset these increased costs), which could negatively impact the Fund's ability to achieve its investment objective. However, the Board noted that direct trading on a short-term basis by Authorized Participants is critical to ensuring that the Fund's Shares trade at or close to NAV. Given this structure, the Board determined that it is not necessary to adopt market timing policies and procedures. The Fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive or excessive trading in Creation Units.

The Board has instructed the officers of the Trust to review reports of purchases and redemptions of Creation Units on a regular basis to determine if there is any unusual trading in the Fund. The officers of the Trust will report to the Board any such unusual trading in Creation Units that is disruptive to the Fund. In such event, the Board may reconsider its decision not to adopt market timing policies and procedures.

Distribution and Service Plan

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to finance activities primarily intended to result in the sale of Creation Units of the Fund or the provision of investor services. No Rule 12b-1 fees are currently paid by the Fund and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, they will be paid out of the respective Fund's assets, and over time these fees will increase the cost of your investment and they may cost you more than certain other types of sales charges.

The Advisor and its affiliates may, out of their own resources, pay amounts ("Payments") to third-parties for distribution or marketing services on behalf of the Fund. The making of these payments could create a conflict of interest for a financial intermediary receiving such payments. The Advisor may make Payments for such third-parties to organize or participate in activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about ETFs, including ETFs advised by the Advisor, or for other activities, such as participation in marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems. The Advisor also may make Payments to third-parties to help defray costs typically covered by a trading commission, such as certain printing, publishing and mailing costs or materials relating to the marketing of services related to exchange-traded products (such as commission-free trading platforms) or exchange-traded products in general.

Determination of Net Asset Value (NAV)

The NAV of the Shares for the Fund is equal to the Fund's total assets minus the Fund's total liabilities divided by the total number of Shares outstanding. Interest and investment income on the Trust's assets accrue daily and are included in the Fund's total assets. Expenses and fees (including investment advisory, management, administration and distribution fees, if any) accrue daily and are included in the Fund's total liabilities. The NAV that is published is rounded to the nearest cent; however, for purposes of determining the price of Creation Units, the NAV is calculated to eight decimal places. The NAV is calculated by the Administrator and Custodian and determined each day the NYSE Arca is open for trading as of the close of regular trading on the NYSE Arca (ordinarily 4:00 p.m. Eastern time).

The Fund typically values fixed-income portfolio securities using last available bid prices or current market quotations provided by dealers or prices (including evaluated prices) supplied by the Fund's approved independent third-party pricing services. Pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values. Pricing services generally value fixed-income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such

securities in smaller odd lot sizes. Odd lots often trade at different prices that may be above or below the price at which the pricing service has valued the security. An amortized cost method of valuation may be used with respect to debt obligations with sixty days or less remaining to maturity unless the Advisor determines in good faith that such method does not represent fair value.

Generally, trading in U.S. government securities, money market instruments and certain fixed-income securities is substantially completed each day at various times prior to the close of business on the NYSE Arca. The values of such securities used in computing the NAV of the Fund are determined as of such times.

When market quotations or prices are not readily available or are deemed unreliable or not representative of an investment's fair value, investments are valued using fair value pricing as determined in good faith by the Advisor under procedures established by and under the general supervision and responsibility of the Board. The Advisor may conclude that a market quotation is not readily available or is unreliable if a security or other asset or liability does not have a price source due to its lack of liquidity or other reason, if a market quotation differs significantly from recent price quotations or otherwise no longer appears to reflect fair value, where the security or other asset or liability is thinly traded, or if the trading market on which a security is listed is suspended or closed and no appropriate alternative trading market is available.

The frequency with which the Fund's investments are valued using fair value pricing is primarily a function of the types of securities and other assets in which the Fund invests pursuant to its investment objective, strategies and limitations. If the Fund invests in other open-end management investment companies registered under the 1940 Act, they may rely on the NAVs of those companies to value the shares they hold of them. Those companies may also use fair value pricing under some circumstances.

Valuing the Fund's investments using fair value pricing results in using prices for those investments that may differ from current market valuations. Accordingly, fair value pricing could result in a difference between the prices used to calculate NAV and the prices used to determine the Fund's indicative intra-day value ("IIV"), which could result in the market prices for Shares deviating from NAV.

Indicative Intra-Day Value

The approximate value of the Fund's investments on a per-Share basis, the Indicative Intra-Day Value, or IIV, is disseminated every 15 seconds during hours of trading on the NYSE Arca. The IIV should not be viewed as a "real-time" update of NAV because the IIV may not be calculated in the same manner as NAV, which is computed once per day.

Solactive AG, an independent third party calculator calculates the IIV for the Fund during hours of trading on the NYSE Arca by dividing the "Estimated Fund Value" as of the time of the calculation by the total number of outstanding Shares of that Fund. "Estimated Fund Value" is the sum of the estimated amount of cash held in the Fund's portfolio, the estimated amount of accrued interest owed to the Fund and the estimated value of the securities held in the Fund's portfolio, minus the estimated amount of the Fund's liabilities. The IIV will be calculated based on the same portfolio holdings disclosed on the Trust's website.

The Fund provides the independent third party calculator with information to calculate the IIV, but the Fund is not involved in the actual calculation of the IIV and is not responsible for the calculation or dissemination of the IIV. The Fund makes no warranty as to the accuracy of the IIV.

Premium/Discount Information

Information regarding the extent and frequency with which market prices of Shares have tracked the Fund's NAV for the most recently completed calendar year and the quarters since that year will be available without charge on the Fund's website at nylinvestments.com/effs.

Dividends, Distributions and Taxes

Net Investment Income and Capital Gains

As the Fund's shareholder, you are entitled to your share of the Fund's distributions of net investment income and net realized capital gains on its investments. The Fund pays out substantially all of their net earnings to their shareholders as "distributions."

The Fund typically earns interest from debt securities. These amounts, net of expenses, typically are passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains or losses whenever they sell securities. Net capital gains typically are passed along to shareholders as "capital gain distributions."

Net investment income and net capital gains typically are distributed to shareholders at least annually. Dividends may be declared and paid more frequently to comply with the distribution requirements of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). In addition, the Fund may decide to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period, in which case some portion of each distribution may result in a return of capital. You will be notified regarding the portion of a distribution that represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of the Fund only if the broker through which you purchased Shares makes such option available.

U.S. Federal Income Taxation

The following is a summary of certain U.S. federal income tax considerations applicable to an investment in Shares of the Fund. The summary is based on the Code, U.S. Treasury Department regulations promulgated thereunder, and judicial and administrative interpretations thereof, all as in effect on the date of this Prospectus and all of which are subject to change, possibly with retroactive effect. In addition, this summary assumes that the Fund shareholder holds Shares as capital assets within the meaning of the Code and does not hold Shares in connection with a trade or business. This summary does not address all potential U.S. federal income tax considerations possibly applicable to an investment in Shares of the Fund, and does not address the consequences to Fund shareholders subject to special tax rules, including, but not limited to, partnerships and the partners therein, tax-exempt shareholders, those who hold Shares through an IRA, 401(k) plan or other tax-advantaged account, and, except to the extent discussed below, "non-U.S. shareholders" (as defined below). This discussion does not discuss any aspect of U.S. state, local, estate, and gift, or non-U.S., tax law. Furthermore, this discussion is not intended or written to be legal or tax advice to any shareholder in the Fund or other person and is not intended or written to be used or relied on, and cannot be used or relied on, by any such person for the purpose of avoiding any U.S. federal tax penalties that may be imposed on such person. Prospective Fund shareholders are urged to consult their own tax advisors with respect to the specific U.S. federal, state and local, and non-U.S., tax consequences of investing in Shares, based on their particular circumstances.

The Fund has not requested and will not request an advance ruling from the U.S. Internal Revenue Service (the "IRS") as to the U.S. federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. Prospective investors should consult their own tax advisors with regard to the U.S. federal tax consequences of the purchase, ownership and disposition of Shares, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country or other taxing jurisdiction. The following information supplements, and should be read in conjunction with, the section in the SAI entitled "U.S. Federal Income Taxation."

Tax Treatment of the Fund

The Fund intends to qualify and elect to be treated as a separate "regulated investment company" (a "RIC") under the Code. To qualify and remain eligible for the special tax treatment accorded to RICs, the Fund must meet certain annual income and quarterly asset diversification requirements and must distribute annually at least 90% of the sum of (i) its "investment company taxable income" (which includes dividends, interest and net short-term capital gains) and (ii) its net tax-exempt interest.

As a RIC, the Fund generally will not be required to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that it distributes to its shareholders. If the Fund fails to qualify as a RIC for any year (subject to certain curative measures allowed by the Code), the Fund will be subject to regular corporate-level U.S. federal income tax in that year on all of its taxable income, regardless of whether the Fund makes any distributions to its shareholders. In addition, in such case, distributions will be taxable to the Fund's shareholders generally as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. The remainder of this discussion assumes that the Fund will qualify for the special tax treatment accorded to RICs.

The Fund will be subject to a 4% excise tax on certain undistributed income if the Fund does not distribute to its shareholders in each calendar year at least 98% of its ordinary income for the calendar year, 98.2% of its capital gain net income for the twelve months ended October 31 of such year, plus 100% of any undistributed amounts from prior years. For these purposes, the Fund will be treated as having distributed any amount on which it has been subject to U.S. corporate income tax for the taxable year ending within the calendar year. The Fund intends to make distributions necessary to avoid this 4% excise tax, although there can be no assurance that it will be able to do so.

The Fund may be required to recognize taxable income in advance of receiving the related cash payment. For example, if the Fund invests in taxable original issue discount obligations (such as zero coupon debt instruments or debt instruments with payment-in-kind interest), the Fund will be required to include in income each year a portion of the original issue discount that accrues over the term of the obligation, even if the related cash payment is not received by the Fund until a later year. Under the "wash sale" rules, the Fund may not be able to deduct currently a loss on a disposition of a portfolio security. As a result, the Fund may be required to make an annual income distribution greater than the total cash actually received during the year. Such distribution may be made from the existing cash assets of the Fund or cash generated from selling portfolio securities. The Fund may realize gains or losses from such sales, in which event its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Tax Treatment of Fund Shareholders

Taxation of U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "U.S. shareholders." For purposes of this discussion, a "U.S. shareholder" is a beneficial owner of Shares who, for U.S. federal income tax purposes, is (i) an individual who is a citizen or resident of the U.S.; (ii) a corporation (or an entity treated as a corporation for U.S. federal income tax purposes) created or organized in the U.S. or under the laws of the U.S., or of any state thereof, or the District of Columbia; (iii) an estate, the income of which is includable in gross income for U.S. federal income tax purposes regardless of its source; or (iv) a trust, if (1) a U.S. court is able to exercise primary supervision over the administration of such trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (2) the trust has a valid election in place to be treated as a U.S. person.

Fund Distributions. In general, taxable Fund distributions are subject to U.S. federal income tax when paid, regardless of whether they consist of cash or property, and regardless of whether they are re-invested in Shares. However, any Fund distribution declared in October, November or December of any calendar year and payable to shareholders of record on a specified date during such month will be deemed to have been received by the Fund shareholder on December 31 of such calendar year, provided such dividend is actually paid during January of the following calendar year.

Distributions of the Fund's net investment income (except, as discussed below, qualified dividend income) and net short-term capital gains are taxable as ordinary income to the extent of the Fund's current and accumulated earnings and profits. To the extent designated as capital gain dividends by the Fund, distributions of the Fund's net long-term capital gains in excess of net short-term capital losses ("net capital gain") are taxable at long-term capital gain tax rates to the extent of the Fund's current and accumulated earnings and profits, regardless of the Fund's shareholder's holding period in the Shares. Distributions of qualified dividend income are, to the extent of the Fund's current and accumulated earnings and profits, taxed to certain non-corporate Fund shareholders at the rates generally applicable to long-term capital gain, provided that the Fund shareholder meets certain holding period and other requirements with respect to the distributing Shares and the distributing Fund meets certain holding period and other requirements with respect to its dividend-paying stocks. Substitute payments received on Shares that are lent out will be ineligible for being reported as qualified dividend income. Given their investment strategy, the Fund does not anticipate that a significant portion of their distributions will be eligible for qualifying dividend treatment. If the Fund pays a dividend that would be "qualified" dividend income for individuals, corporate shareholders may be entitled to a dividend received deduction.

The Fund intends to distribute its net capital gain at least annually. However, by providing written notice to its shareholders no later than 60 days after its year-end, the Fund may elect to retain some or all of its net capital gain and designate the retained amount as a "deemed distribution." In that event, the Fund pays U.S. federal income tax on the retained net capital gain, and the Fund shareholder recognizes a proportionate share of the Fund's undistributed net capital gain. In addition, the Fund shareholder can claim a tax credit or refund for the

shareholder's proportionate share of the Fund's U.S. federal income taxes paid on the undistributed net capital gain and increase the shareholder's tax basis in the Shares by an amount equal to the shareholder's proportionate share of the Fund's undistributed net capital gain, reduced by the amount of the shareholder's tax credit or refund.

Distributions in excess of the Fund's current and accumulated earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholder's tax basis in its Shares of the Fund, and generally as capital gain thereafter.

In addition, high-income individuals (and certain trusts and estates) generally are subject to a 3.8% Medicare tax on "net investment income" in addition to otherwise applicable U.S. federal income tax. "Net investment income" generally will include taxable dividends (including capital gain dividends) received from the Fund and net gains from the redemption or other disposition of Shares. Please consult your tax advisor regarding this tax.

Investors considering buying Shares just prior to a distribution should be aware that, although the price of the Shares purchased at such time may reflect the forthcoming distribution, such distribution nevertheless may be taxable (as opposed to a non-taxable return of capital).

Sales of Shares. Any capital gain or loss realized upon a sale or exchange of Shares (including an exchange of Shares of one Fund for Shares of another Fund) generally is treated as a long-term gain or loss if the Shares have been held for more than one year. Any capital gain or loss realized upon a sale or exchange of Shares held for one year or less generally is treated as a short-term gain or loss, except that any capital loss on the sale or exchange of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to the Shares. Furthermore, a loss realized by a shareholder on the sale or exchange of Shares of the Fund with respect to which exempt-interest dividends have been paid may, to the extent of such exempt-interest dividends, be disallowed if such Shares have been held by the shareholder for six months or less at the time of their disposition.

Creation Unit Issues and Redemptions. On an issue of Shares of the Fund as part of a Creation Unit where the creation is conducted in-kind, an Authorized Participant recognizes capital gain or loss equal to the difference between (i) the fair market value (at issue) of the issued Shares (plus any cash received by the Authorized Participant as part of the issue) and (ii) the Authorized Participant's aggregate basis in the exchanged securities (plus any cash paid by the Authorized Participant as part of the issue). On a redemption of Shares as part of a Creation Unit where the redemption is conducted in-kind, an Authorized Participant recognizes capital gain or loss equal to the difference between (i) the fair market value (at redemption) of the securities received (plus any cash received by the Authorized Participant as part of the redemption) and (ii) the Authorized Participant's basis in the redeemed Shares (plus any cash paid by the Authorized Participant as part of the redemption). However, the IRS may assert, under the "wash sale" rules or on the basis that there has been no significant change in the Authorized Participant's economic position, that any loss on creation or redemption of Creation Units cannot be deducted currently.

In general, any capital gain or loss recognized upon the issue or redemption of Shares (as components of a Creation Unit) is treated either as long-term capital gain or loss, if the deposited securities (in the case of an issue) or the Shares (in the case of a redemption) have been held for more than one year, or otherwise as short-term capital gain or loss. However, any capital loss on a redemption of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid (or deemed to be paid) with respect to such Shares. Furthermore, a loss realized on the redemption of Shares of the Fund with respect to which exempt-interest dividends have been paid may, to the extent of such exempt-interest dividends, be disallowed if such Shares have been held for six months or less at the time of their disposition.

Taxation of Non-U.S. Shareholders

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of Shares applicable to "non-U.S. shareholders." For purposes of this discussion, a "non-U.S. shareholder" is a beneficial owner of Shares that is not a U.S. shareholder (as defined above) and is not an entity or arrangement treated as a partnership for U.S. federal income tax purposes. The following discussion is based on current law and is for general information only. It addresses only selected, and not all, aspects of U.S. federal income taxation.

With respect to non-U.S. shareholders of the Fund, the Fund's ordinary income dividends generally will be subject to U.S. federal withholding tax at a rate of 30% (or at a lower rate established under an applicable tax treaty), subject to certain exceptions for "interest-related dividends" and "short-term capital gain dividends"

discussed below. U.S. federal withholding tax generally will not apply to any gain realized by a non-U.S. shareholder in respect of the Fund's net capital gain. Special rules apply with respect to dividends of the Fund that are attributable to gain from the sale or exchange of "U.S. real property interests."

In general, all "interest-related dividends" and "short-term capital gain dividends" (each defined below) will not be subject to U.S. federal withholding tax, provided that the non-U.S. shareholder furnished the Fund with a completed IRS Form W-8BEN or W-8BEN-E, as applicable, (or acceptable substitute documentation) establishing the non-U.S. shareholder's non-U.S. status and the Fund does not have actual knowledge or reason to know that the non-U.S. shareholder would be subject to such withholding tax if the non-U.S. shareholder were to receive the related amounts directly rather than as dividends from the Fund. "Interest-related dividends" generally means dividends designated by the Fund as attributable to the Fund's U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the Fund is at least a 10% shareholder, reduced by expenses that are allocable to such income. "Short-term capital gain dividends" generally means dividends designated by the Fund as attributable to the excess of the Fund's net short-term capital gain over its net long-term capital loss. Depending on its circumstances, the Fund may treat such dividends, in whole or in part, as ineligible for these exemptions from withholding.

In general, subject to certain exceptions, non-U.S. shareholders will not be subject to U.S. federal income or withholding tax in respect of a sale or other disposition of Shares of the Fund.

To claim a credit or refund for any Fund-level taxes on any undistributed net capital gain (as discussed above) or any taxes collected through back-up withholding (discussed below), a non-U.S. shareholder must obtain a U.S. taxpayer identification number and file a U.S. federal income tax return even if the non-U.S. shareholder would not otherwise be required to do so.

Back-Up Withholding.

The Fund (or a financial intermediary such as a broker through which a shareholder holds Shares in the Fund) may be required to report certain information on the Fund shareholder to the IRS and withhold U.S. federal income tax ("backup withholding") at a current rate of 24% from taxable distributions and redemption or sale proceeds payable to the Fund shareholder if (i) the Fund shareholder fails to provide the Fund with a correct taxpayer identification number or make required certifications, or if the IRS notifies the Fund that the Fund shareholder is otherwise subject to backup withholding, and (ii) the Fund shareholder is not otherwise exempt from backup withholding. Non-U.S. shareholders can qualify for exemption from backup withholding by submitting a properly completed IRS Form W-8BEN or W-8BEN-E. Backup withholding is not an additional tax and any amount withheld may be credited against the Fund shareholder's U.S. federal income tax liability.

Foreign Account Tax Compliance Act.

The U.S. Foreign Account Tax Compliance Act ("FATCA") generally imposes a 30% withholding tax on "withholdable payments" (defined below) made to (i) a "foreign financial institution" ("FFI"), unless the FFI enters into an agreement with the IRS to provide information regarding certain of its direct and indirect U.S. account holders and satisfy certain due diligence and other specified requirements, and (ii) a "non-financial foreign entity" ("NFFE") unless such NFFE provides certain information about its direct and indirect "substantial U.S. owners" to the withholding agent or certifies that it has no such U.S. owners. The beneficial owner of a "withholdable payment" may be eligible for a refund or credit of the withheld tax. The U.S. government also has entered into intergovernmental agreements with other jurisdictions to provide an alternative, and generally easier, approach for FFIs to comply with FATCA. If the shareholder is a tax resident in a jurisdiction that has entered into an intergovernmental agreement with the U.S. government, the shareholder will be required to provide information about the shareholder's classification and compliance with the intergovernmental agreement.

"Withholdable payments" generally include, among other items, (i) U.S.-source interest and dividends, and (ii) gross proceeds from the sale or disposition, occurring on or after January 1, 2019, of property of a type that can produce U.S.-source interest or dividends.

The Fund or a shareholder's broker may be required to impose a 30% withholding tax on withholdable payments to a shareholder if the shareholder fails to provide the Fund with the information, certifications or documentation required under FATCA, including information, certification or documentation necessary for the Fund to determine if the shareholder is a non-U.S. shareholder or a U.S. shareholder and, if it is a non-U.S. shareholder, if the non-U.S. shareholder has "substantial U.S. owners" and/or is in compliance with (or meets an

exception from) FATCA requirements. The Fund will not pay any additional amounts to shareholders in respect of any amounts withheld. The Fund may disclose any shareholder information, certifications or documentation to the IRS or other parties as necessary to comply with FATCA.

The requirements of, and exceptions from, FATCA are complex. All prospective shareholders are urged to consult their own tax advisors regarding the potential application of FATCA with respect to their own situation.

For a more detailed tax discussion regarding an investment in the Fund, please see the section of the SAI entitled "U.S. Federal Income Taxation."

Code of Ethics

The Trust, Advisor, Subadvisor and Distributor each have adopted a code of ethics under Rule 17j-1 of the 1940 Act that is designed to prevent affiliated persons of the Trust, the Advisor, Subadvisor and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to a code). There can be no assurance that the codes will be effective in preventing such activities. The codes permit personnel subject to them to invest in securities, including securities that may be held or purchased by the Fund. The codes are on file with the SEC and are available to the public.

Fund Website and Disclosure of Portfolio Holdings

The Advisor maintains a website for the Fund at nylinvestments.com/etfs. The website for the Fund contains the following information, on a per-Share basis, for the Fund: (1) the prior Business Day's NAV; (2) the reported midpoint of the bid-ask spread at the time of NAV calculation (the "Bid-Ask Price"); (3) a calculation of the premium or discount of the Bid-Ask Price against such NAV; and (4) data in chart format displaying the frequency distribution of discounts and premiums of the Bid-Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters (or for the life of the Fund if, shorter). In addition, on each Business Day, before the commencement of trading in Shares on the NYSE Arca, the Fund will disclose on its website (nylinvestments.com/etfs) the identities and quantities of the portfolio securities and other assets held by the Fund that will form the basis for the calculation of NAV at the end of the Business Day.

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the SAI.

Other Information

The Fund is not sponsored, endorsed, sold or promoted by the NYSE Arca. The NYSE Arca makes no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the Fund to achieve their objectives. The NYSE Arca has no obligation or liability in connection with the administration, marketing or trading of the Fund.

For purposes of the 1940 Act, the Fund is registered investment company, and the acquisition of Shares by other registered investment companies and companies relying on exemption from registration as investment companies under Section 3(c)(1) or 3(c)(7) of the 1940 Act is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as permitted by an exemptive order that permits registered investment companies to invest in the Fund beyond those limitations.

Financial Highlights

Selected Data for a Share of Capital Stock Outstanding

The financial highlights tables are intended to help you understand the Fund's financial performance for the past five fiscal years or, if shorter, the period of the Fund's operations. Certain information reflects financial results for a single Fund Share. The total returns in the table represents the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Fund's Annual Report, which is available upon request.

| | IQ Ultra Short Duration ETF |
|--|---|
| | For the Period July 31, 2019^(a) to April 30, 2020 |
| Net asset value, beginning of period | \$ 50.01 |
| Income from Investment Operations | |
| Net investment income ^(b) | 0.74 |
| Net realized and unrealized gain (loss) | <u>(1.07)</u> |
| Net increase (decrease) in net assets resulting from investment operations | <u>(0.33)</u> |
| Distributions from: | |
| Net investment income | (0.75) |
| Net realized gain | <u>(0.02)</u> |
| Total distributions from net investment income and realized gains | <u>(0.77)</u> |
| Net asset value, end of period | <u>\$ 48.91</u> |
| Market price, end of period | \$ 48.99 |
| Total Return | |
| Total investment return based on net asset value ^(c) | (0.68)% |
| Total investment return based on market price ^(d) | (0.52)% ^(e) |
| Ratios/Supplemental Data | |
| Net assets, end of period (000's omitted) | \$ 149,182 |
| Ratio to average net assets of: | |
| Expenses net of waivers | 0.24% ^(f) |
| Expenses excluding waivers | 0.49% ^(f) |
| Net investment income | 2.00% ^(f) |
| Portfolio turnover rate ^(g) | 292% |

(a) Commencement of operations.

(b) Based on average shares outstanding.

(c) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions, if any, at net asset value during the period, and redemption on the last day of the period. Total return calculated for a period less than one year is not annualized.

(d) The market price returns are calculated using the mean between the last bid and ask prices.

(e) Since the Shares of the Funds did not trade in the secondary market until the day after the Fund's inception, for the period from the inception to the first day of the secondary market trading, the NAV is used as a proxy for the secondary market trading price to calculate the market returns.

(f) Annualized.

(g) Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as in-kind creations or redemptions in connection with the Fund's capital share transactions.

Privacy Policy

The Trust is committed to respecting the privacy of personal information you entrust to us in the course of doing business with us.

The Trust may collect non-public personal information from various sources. The Trust uses such information provided by you or your representative to process transactions, to respond to inquiries from you, to deliver reports, products, and services, and to fulfill legal and regulatory requirements.

We do not disclose any non-public personal information about our customers to anyone unless permitted by law or approved by the customer. We may share this information within the Trust's family of companies in the course of providing services and products to best meet your investing needs. We may share information with certain third-parties who are not affiliated with the Trust to perform marketing services, to process or service a transaction at your request or as permitted by law. For example, sharing information with companies that maintain or service customer accounts for the Trust is essential. We may also share information with companies that perform administrative or marketing services for the Trust, including research firms. When we enter into such a relationship, we restrict the companies' use of our customers' information and prohibit them from sharing it or using it for any purposes other than those for which they were hired.

We maintain physical, electronic, and procedural safeguards to protect your personal information. Within the Trust, we restrict access to personal information to those employees who require access to that information in order to provide products or services to our customers such as handling inquiries. Our employment policies restrict the use of customer information and require that it be held in strict confidence.

We will adhere to the policies and practices described in this notice for both current and former customers of the Trust.

IndexIQ Active ETF Trust

PROSPECTUS | AUGUST 28, 2020

FOR MORE INFORMATION

If you would like more information about the Trust, the Funds and the Shares, the following documents are available free upon request:

Annual/Semi-annual Report

Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders, once available. In the Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Funds' performance during the last fiscal year.

Statement of Additional Information

Additional information about the Funds and their policies is also available in the Funds' SAI. The SAI is incorporated by reference into this Prospectus (and is legally considered part of this Prospectus). The Funds' annual and semi-annual reports, once available, and the SAI are available free upon request by calling IndexIQ at 1-888-474-7725. You can also access and download the annual and semi-annual reports, once available, and the SAI at the Fund's website: nylinvestments.com/etfs.

To obtain other information and for shareholder inquiries:

By telephone: 1-888-474-7725

By mail: IndexIQ Active ETF Trust

c/o IndexIQ

51 Madison Avenue

New York, NY 10010

On the Internet: SEC Edgar database: <http://www.sec.gov>; or nylinvestments.com/etfs

You may review and obtain copies of Fund documents (including the SAI) by visiting the SEC's public reference room in Washington, D.C. You may also obtain copies of Fund documents, after paying a duplicating fee, by writing to the SEC's Public Reference Section, Washington, D.C. 20549-0102 or by electronic request to: publicinfo@sec.gov. Information on the operation of the public reference room may be obtained by calling the SEC at (202) 942-8090.

No person is authorized to give any information or to make any representations about the Funds and their Shares not contained in this Prospectus and you should not rely on any other information. Read and keep the Prospectus for future reference.

Dealers effecting transactions in the Funds' Shares, whether or not participating in this distribution, may be generally required to deliver a Prospectus. This is in addition to any obligation dealers have to deliver a Prospectus when acting as underwriters.

"New York Life Investments" is both a service mark, and the common trade name, of certain investment advisors affiliated with New York Life Insurance Company.

IQ® and IndexIQ® are registered service marks of New York Life Insurance Company.

The Funds' investment company registration number is 811-22739.
