

IndexIQ ETF Trust

Summary Prospectus

October 6, 2022

IQ Candriam ESG U.S. Mid Cap Equity ETF IQSM

This summary prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's full prospectus, which contains more information about the Fund and its risks. The Fund's full prospectus dated October 6, 2022 and statement of additional information dated October 6, 2022, are all incorporated by reference into this Summary Prospectus. All this information may be obtained at no cost either: online at newyorklifeinvestments.com/documents; by calling IndexIQ Funds at 888-474-7725 or by sending an email request to info@indexiq.com

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold accounts through a financial intermediary, you may contact your financial intermediary to enroll in electronic delivery. Please note that not all financial intermediaries may offer this service.

You may elect to receive all future reports in paper free of charge. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

IQSM LISTED ON NYSE ARCA | CUSIP # 45409B248

Summary Information

IQ Candriam ESG U.S. Mid Cap Equity ETF

Investment Objective

The IQ Candriam ESG U.S. Mid Cap Equity ETF (the "Fund") seeks investment results that correspond (before fees and expenses) generally to the price and yield performance of its underlying index, the IQ Candriam ESG U.S. Mid Cap Equity Index (the "Underlying Index").

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund ("Shares"). Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example set forth below.

Shareholder Fees (fees paid directly from your investment):

None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fee	0.15%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ^(a)	0.01%
Total Annual Fund Operating Expenses^(b)	0.16%
Expense Waiver/Reimbursement ^(b)	0.01%
Total Annual Fund Operating Expenses After Expense Waiver/Reimbursement	<u>0.15%</u>

(a) The Fund has not yet commenced operations and Other Expenses are based on estimated amounts for the current fiscal year.

(b) IndexIQ Advisors LLC (the "Advisor") has contractually agreed to waive or reduce its management fee and/or reimburse expenses of the Fund in an amount that limits "Total Annual Fund Operating Expenses" (exclusive of interest, taxes, brokerage fees and commissions, dividends paid on short sales, acquired fund fees and expenses, and extraordinary expenses) to not more than 0.15% of the average daily net assets of the Fund. The agreement will remain in effect permanently unless terminated by the Board of Trustees of the Fund.

Example. This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. The return of 5% and estimated expenses are for illustration purposes only, and should not be

considered indicators of expected Fund expenses or performance, which may be greater or less than the estimates. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$15	\$47

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Shares. The Fund is newly organized and, as of the date of the Prospectus, has not yet commenced operations.

Principal Investment Strategies

The Fund employs a "passive management" — or indexing — investment approach designed to track the performance of the Underlying Index, which was developed by IndexIQ LLC ("IndexIQ") with Candriam ("Candriam") acting as index consultant to IndexIQ. In its role as index consultant, Candriam assists IndexIQ with the development, calculation and maintenance of the Underlying Index, including the ESG security selection process for the Underlying Index. The Underlying Index is designed to deliver exposure to equity securities of companies meeting environmental, social and corporate governance (ESG) criteria developed by Candriam and weighted using a market-capitalization weighting methodology. As of September 16, 2022, the market capitalization range of the Underlying Index was approximately \$3.2 billion to \$18.6 billion. The Fund will be concentrated in an industry or group of industries to the extent the Underlying Index is concentrated in an industry or group of industries. As of September 16, 2022, the primary sectors within the Underlying Index are Industrials, Information Technology, and Consumer Discretionary.

The first step in the ESG security selection process scores companies on stakeholder criteria and an issuer's exposure to global sustainability trends. Companies are scored relative to other companies within the same industry. The stakeholder criteria are:

- Treatment of customers, including advertising practices, after sales service and support, and anti-competitive behaviors.
- Treatment of employees, including working conditions, employee retention, gender equality, training and career opportunities.
- Environmental initiatives and compliance with new environmental legislation.

- Supplier standards and oversight, including supplier adherence to fair labor standards.
- Corporate governance, including quality of governance and ethics, adherence to accounting standards and anti-bribery efforts.
- Societal impact and how the company is viewed by populations in the area where the company operates.

The global sustainability trends include:

- **Climate Change:** Activities related to the production of renewable energy and decarbonizing business activities.
- **Resources and Waste:** Activities related to the efficient utilization of resources, recycling, and mitigating the impact on ecosystems.
- **Digitalization and Innovation:** Activities that drive higher industrial and resource efficiencies and protecting data privacy and the resilience of digital networks.
- **Health and Wellness:** Activities related to providing healthy products and services, improving air quality, and investing in human capital through job creation, gender equality and decent working conditions.
- **Demographic Shifts:** Activities related to providing products and services to aging populations in developed countries and supporting population growth in emerging countries through investment in infrastructure and the food supply chain.

This sector-specific analysis evaluates companies within the same sector each other, using criteria specific to the particular sector. Except for the excluded activities described below, the ESG security selection process seeks to maintain exposure to all industry sectors of the economy (e.g., financials, industrials, consumer discretionary, consumer staples, materials, health care, energy, utilities and information technology). The ESG selection process analyzes securities comprising approximately 95% of the market capitalization of equity securities domiciled in the United States. The companies with an overall ranking in the top 70% of the eligible universe within each industry sector based on this ESG selection process and that are part of the Solactive GBS United States 400 Index, which seeks to track the performance of the largest 400 mid-capitalization companies listed on an exchange in the U.S., are included in the Underlying Index, unless a company is excluded as a result of the second step in the ESG security selection process. The Underlying Index identifies U.S. issuers primarily based on the location the issuer's shares are principally traded and its location of incorporation.

The second step in the ESG security selection process is an exclusionary screen based on any continued and significant non-compliance with the Principles of the United Nation's Global Compact, which address human rights, labor, environmental, and anti-corruption matters, as well as the exclusion of companies engaged in certain businesses beyond minimum thresholds (e.g., companies that operate in countries with oppressive regimes, that operate in adult content, alcohol, armament, gambling, nuclear, and tobacco sectors, or that utilize animal testing or genetic modification in research and development). As a result of this second step, the companies selected for inclusion in the Underlying Index represent less than 70% of the eligible universe. As of September 16, 2022, the Underlying Index consisted of 215 component securities. Under normal circumstances, the Fund will invest at least 80% of its assets in securities of companies that meet the ESG selection process of the Underlying Index.

The Underlying Index is reconstituted and rebalanced quarterly.

The Fund generally will invest in all of the securities that comprise its Underlying Index in proportion to their weightings in the Underlying Index. Under normal circumstances, the Fund will invest at least 80% of its assets in instruments that meet the Underlying Index's environmental, social, and corporate governance (ESG) criteria. The Fund has adopted a policy to invest, under normal circumstances, at least 80% of the value of its assets (net assets plus the amount of any borrowings for investment purposes) in U.S. equity securities of mid-capitalization companies.

Principal Risks

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in the Fund does not represent a complete investment program. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, the Advisor or any of its affiliates. You should consider carefully the following risks before investing in the Fund.

Authorized Participant Concentration Risk

Only certain large institutions may engage in creation or redemption transactions directly with the Fund (each, an "Authorized Participant"). The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that those Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with the Fund and no other Authorized Participant is able to step forward to engage in creation and redemption transactions with the Fund, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Cyber Security Risk

The Fund is susceptible to operational risks through breaches in cyber security. Such events may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity and could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. In addition, cyber security breaches of the securities issuers or the Fund's third-party service providers can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed.

Equity Securities Risk

Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Focused Investment Risk

To the extent that the Fund invests a large percentage of its assets in a single asset class or the securities of issuers within the same country, group of countries, region, industry, group of industries or sector, an adverse economic, market, political or regulatory development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. Different asset classes, countries, groups of countries, regions, industries, groups of industries or sectors tend to go through cycles of outperformance and underperformance in comparison to each other and to the general financial markets.

Index Risk

There is no guarantee that the Fund's investment results will have a high degree of correlation to those of the Underlying Index or that the Fund will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

Industry/Sector Concentration Risk

The Fund's investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated.

- *Consumer Discretionary Sector Risk.* Companies in the consumer discretionary sector may be adversely affected by, among other things, the performance of domestic and international economies, exchange and interest rates, worldwide demand, competition, consumer confidence, consumers' disposable income levels, propensity to spend and consumer preferences, social trends and marketing campaigns.
- *Industrials Sector Risk.* Companies in the industrials sector may be affected by, among other things, worldwide economic growth, supply and demand for specific products and services, product obsolescence, environmental damages or product liability claims, rapid technological developments and government regulation. Government spending policies may impact the profitability of the industrials sector since industrials companies, especially aerospace and defense companies, often rely on government demand for their products and services.
- *Information Technology Sector Risk.* Companies in the information technology sector may be adversely affected by, among other things, domestic and international market competition, obsolescence due to rapid technological developments, new product introduction, unpredictable growth rates and competition for qualified personnel. Aggressive pricing and reduced profit margins, intellectual property rights protections, cyclical market patterns and evolving industry standards and government regulations may also impact information technology companies. The market prices of information technology securities may exhibit a greater degree of market risk and more frequent, sharp price fluctuations than other types of securities. These securities may fall in and out of favor with investors rapidly, which may cause sudden selling and dramatically lower market prices.

Investment Style Risk

The Underlying Index seeks to allocate investment exposure based upon a particular style of investing. Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. As a consequence, the Fund may underperform as

compared to the market generally or to other funds that invest in similar asset classes but employ different investment styles. Further, there is no guarantee that the Underlying Index will accurately or optimally utilize the investment style or that it will successfully provide the desired investment exposure. The degree to which the Underlying Index accurately or optimally utilizes the investment style is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the factors relevant to a particular investment.

- *ESG Investing Style Risk.* The Underlying Index seeks to provide exposure to the equity securities of companies meeting environmental, social and corporate governance investing criteria. The Underlying Index excludes or limits exposure to securities of certain issuers for non-financial reasons, and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of environmental, social and corporate governance investing criteria may affect the Fund's exposure to certain sectors or types of investments and may impact the Fund's relative investment performance depending on whether such sectors or investments are in or out of favor in the market. In addition, there is no guarantee that the construction methodology of the Underlying Index will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria.

Issuer Risk

The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes to the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

Market Risk

Market risks include political, regulatory, market and economic developments, including developments that impact specific economic sectors, industries or segments of the market, which may affect the Fund's value. Turbulence in financial markets, tariffs and other protectionist measures, political developments and uncertainty, central bank policy, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers worldwide, which could have an adverse effect on the Fund. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to disruptions in the U.S. and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its

investments. Market disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Mid-Capitalization Companies Risk

Mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

New Fund Risk

As a new fund, there can be no assurance that the Fund will grow to or maintain an economically viable size. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected.

Operational Risk

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Passive Management Risk

The Fund is not actively managed and instead seeks to track the performance of an Index. Passive management has the following risks associated with it:

- The Fund invests in the securities included in, or representative of, the Underlying Index. The provider of the Index or the Index calculation agent may make errors. The Index provider may include Index constituents that should have been excluded, or it may exclude Index constituents that should have been included. It also may include or exclude constituents at incorrect levels. This may result in the Fund, in turn, being correctly positioned to an Index that has been incorrectly calculated. This could lead to losses to the Fund.
- In seeking to track the Index's performance, the Fund may be subject to tracking error, which is the divergence of the Fund's performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund's portfolio and those included in the Underlying Index, pricing differences (including, as applicable,

differences between a security's price at the local market close and the Fund's valuation of a security at the time of calculation of the Fund's NAV), differences in transaction costs, the Fund's holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass-through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. This risk may be heightened during times of increased market volatility or other unusual market conditions.

- The Fund generally will not attempt to take defensive positions in declining markets and generally will not sell a security because its issuer is in financial trouble, unless that security is removed from (or was no longer useful in tracking a component of) the Underlying Index.

Trading Price Risk

Shares of the Fund trade on securities exchanges at prices at, above or below the Fund's most recent NAV. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates continuously throughout trading hours based on both market supply of and demand for Shares and the underlying value of the Fund's portfolio holdings or NAV. As a result, the trading prices of the Fund's Shares may deviate significantly from NAV during periods of market volatility. Any of these factors, among others, may lead to the Fund's Shares trading at a premium or discount to NAV. Although it is generally expected that the market price of the Shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Performance Information

As of the date of this Prospectus, the Fund has not commenced operations and therefore does not report its performance information. The Fund's performance current to the most recent month-end is available by calling 1-888-474-7725 or by visiting newyorklifeinvestments.com/eff.

Investment Advisor

IndexIQ Advisors LLC is the investment advisor to the Fund.

Portfolio Managers

The professionals jointly and primarily responsible for the day-to-day management of the Fund are Greg Barrato and James Harrison. Both Mr. Barrato, Senior Vice President of the Advisor, and Mr. Harrison, Vice President of the Advisor, have been a portfolio manager of the Fund since its inception.

Purchase and Sale of Fund Shares

Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large blocks of Shares called "Creation Units." Individual Shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since Shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their NAV, the Fund's Shares may trade at a price greater than (premium) or less than (discount) the Fund's NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares of the Fund (ask) when buying or selling Shares in the secondary market (the "bid-ask spread"). Recent information, including the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at newyorklifeinvestments.com/etf.

Tax Information

The Fund's distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your tax advisor about your specific situation.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
