Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). The price used to calculate the market price returns ("MP") is the mean between the day's last bid and ask prices on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

Before considering an investment in the Fund, you should understand that you could lose money.

As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. The Fund is a new fund. As a new fund, there can be no assurance that it will grow to or maintain an economically viable size, in which case it may experience greater tracking error to its Underlying Index or it could ultimately liquidate. The Fund employs a "passive management" investment approach designed to track the performance of the Underlying Index. There is no guarantee that the Fund's investment results will have a high degree of correlation to those of the Underlying Index or that the Fund will achieve its investment objective. The Underlying Index seeks to provide exposure to the equity securities of companies meeting environmental, social and corporate governance investing criteria and the Fund may forgo some market opportunities available to funds that do not use these criteria. The application of environmental, social and corporate governance investing may impact the Fund's relative investment performance. There is no guarantee that the construction methodology of the Underlying Index will accurately provide exposure to issuers meeting environmental, social and corporate governance criteria. Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies.

The IQ Candriam ESG US Equity Index is designed to deliver exposure to equity securities of companies meeting environmental, social and corporate governance (ESG) criteria developed by Candriam and weighted using a market capitalization weighting methodology. The Underlying Index was developed by IndexIQ LLC with Candriam Belgium S.A. acting as index consultant.

The S&P 500[®] Index is widely regarded as the standard index for measuring large-cap U.S. stock market performance.
