

QED IQ Hedge Event-Driven Tracker ETF

All data as of 6/30/22

Fund description: The Fund seeks investment results that track, before fees and expenses, the price and yield performance of the IQ Hedge Event-Driven Index. The IQ Hedge Event-Driven Index seeks to replicate the risk-adjusted return characteristics of hedge funds pursuing an event-driven strategy. The Fund does not invest in hedge funds, and the Index does not include hedge funds as components. The Fund is not suitable for all investors.

Event-driven exposure

Transparent, low-cost ETF exposure to the universe of event-driven hedge funds.

Low correlation to equities

Invests in a combination of credit opportunities, such as high yield, leveraged loans, capital structure arbitrage, and event-driven equities.

Portfolio diversifier

Provides diversification benefits and low correlation to other asset classes, which may improve a portfolio's risk/return profile†.

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect through 8/31/22, without which total returns may have been lower. Visit www.newyorklifeinvestments.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

*Since Inception Performance as 3/31/2015.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). Since May 31, 2016, the price used to calculate the market price returns ("MP") is the mean between the day's last bid and ask prices on the fund's primary exchange. Any market price returns prior to May 31, 2016 were calculated using the day's closing price on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

Before considering an investment in the Fund, you should understand that you could lose money.

The Fund's investment performance, because it is a fund of funds, depends on the investment performance of the underlying ETFs in which it invests. There is no guarantee that the Fund itself, or any of the ETFs in the Fund's portfolio, will perform exactly as its underlying index. The Fund's underlying ETFs invest in: foreign securities, which are subject to interest rate, currency exchange rate, economic, and political risks. These risks may be greater for emerging markets. Fixed income securities also carry inflation risk, liquidity risk, call risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Leverage, including borrowing, will cause some of the Fund's underlying ETFs to be more volatile than if the underlying ETFs had not been leveraged.

The IQ Hedge Event-Driven Index is the exclusive property of IndexIQ which has contracted with Solactive AG. IndexIQ® and IQ® registered service marks of IndexIQ.

The IQ Hedge Event-Driven Index seeks to replicate the collective hedge funds pursuing an event-driven strategy. Event-Driven hedge funds typically invest in a combination of credit opportunities and event-driven equities.

The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities.

The Barclay Event Driven Index is a measure of the average net returns of all reporting event driven and special situations funds in the Barclay Hedge database.

The S&P 500® Index is widely regarded as the standard index for measuring large-cap U.S. stock market performance.

Liquid alternatives (liquid alts) are alternative investment strategies that are available through alternative investment vehicles such as mutual funds, ETFs, and closed-end funds that provide daily liquidity.

[†]Diversification cannot prevent a loss or guarantee a profit.

1. Percentages based on total net assets and subject to change without notice. **2.** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance (this does not include the effects of sales charges, loads, and redemption fees). The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Consider the Fund's investment objectives, risks, and charges and expenses carefully before investing. The prospectus and the statement of additional information include this and other relevant information about the Fund and are available by visiting www.newyorklifeinvestments.com or calling 888-474-7725. Read the prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units", and otherwise, can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in-kind.
