Why invest in insured municipal bonds

- Municipal bond insurance is a guarantee from an insurance company that the holder of a muni bond will receive scheduled interest and principal payments when due, even in the event of a default by its issuer.
- Bond insurance may provide increased price stability and greater market liquidity.
- Insured municipal bonds have historically outperformed the broader muni market, leading to higher Sharpe ratios over time.

| Name | Total Return (%) | | | | Standard Deviation (Risk) (%) | | | | Sharpe Ratio | | | |
|---------------------------------------|------------------|------|------|-------|-------------------------------|------|------|-------|--------------|------|------|-------|
| | 1 Yr | 3 Yr | 5 Yr | 10 Yr | 1 Yr | 3 Yr | 5 Yr | 10 Yr | 1 Yr | 3 Yr | 5 Yr | 10 Yr |

As of 9/30/20. Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Visit nylinvestments.com/etfs for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). The price used to calculate the market price returns ("MP") is the mean between the day's last bid and ask prices on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

Alpha is a measure of performance on a risk-adjusted basis. The excess return of a fund relative to the return of the benchmark index is a fund's alpha.

*The 30-Day SEC Yield is based on net investment income for the 30-day period ended 9/30/20, divided by the offering price per share on that date. Yield reflects a fee waiver and/or expense limitation agreement without which the 30-Day SEC Yield would have been 0.98%.

[†]As stated in the Fund's prospectus, the management fee of 0.40% is expressed as a unitary fee to cover expenses incurred in connection with managing the portfolio. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect through 8/31/21, without which total returns may have been lower. This agreement renews automatically for one-year terms unless written notice is provided before the start of the next term or upon approval of the Board.

Before considering an investment in the Fund, you should understand that you could lose money.

The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investments more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, region, market, industry, group of industries, project types, group of project types, sector or asset class. Municipal Bond risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers, and the possibility of future tax and legislative changes, which could affect the market for and value of municipal securities. Fixed income securities most frequently trade in institutional round lot size transactions. Until the Fund grows significantly in size, the Fund expects to purchase a significant number of bonds in amounts less than the institutional round lot size, which are frequently referred to as "odd" lots. Odd lot size positions may have more price volatility than institutional round lot size positions. Insured Municipal Bonds are covered by insurance policies that guarantee the timely payment of principal and interest. The insurance does not

guarantee the market value of an insured security, or the Fund's share price or distributions, and shares of the Fund are not insured. The Fund may purchase insurance for an uninsured bond directly from a qualified Municipal Bond insurer. The supply of insured municipal securities which meet the Fund's investment guidelines is limited. A portion of the Fund's income may be subject to state and local taxes or the alternative minimum tax. Funds that invest in bonds are subject to interest-rate risk and can lose principal value when interest rates rise. Bonds are also subject to credit risk, in which the bond issuer may fail to pay interest and principal in a timely manner. Municipal bond risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers, and the possibility of future tax and legislative changes, which could affect the market for and value of municipal securities.

The Bloomberg Barclays Municipal Bond Index is considered representative of the broad market for investment-grade tax-exempt bonds with a maturity of at least one year. Bonds subject to the alternative minimum tax or with floating or zero coupons are excluded. Index results assume the reinvestment of all capital gain and dividend distributions

ICE BofA US Insured Bond Municipal Securities Index is a subset of ICE BofA US Municipal Securities Index including all insured securities. ICE BofA US Municipal Securities Index tracks the performance of US dollar denominated investment grade tax-exempt debt publicly issued by US states and territories, and their political subdivisions, in the US domestic market.

Consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus and the statement of additional information include this and other relevant information about the Fund and are available by visiting nylinvestments.com/etfs or calling 888-474-7725. Read the prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units," and otherwise, can be bought and sold only through exchange trading.
