## Message from the President

Against a backdrop of easing inflationary pressures and continued economic growth, stocks and bonds generally gained ground during the 12-month period ended December 31, 2023, despite high levels of volatility and sharp disparities between the performance of the different market sectors.

Although the war in Ukraine, the outbreak of hostilities in the Middle East and several other notable events affected financial assets, inflation, interest rate, and economic growth trends stood at the forefront of market developments during most of the period. As the reporting period began, high levels of inflation already showed signs of easing in the face of aggressive rate hikes by U.S. Federal Reserve (the "Fed"). From a peak of $9.1 \%$ in June 2022, the annualized U.S. inflation rate dropped to $6.4 \%$ in January, and 3.4\% in December 2023. At the same time, the Fed increased the benchmark federal funds rate from $4.25 \%-4.50 \%$ at the beginning of reporting period, to $5.25 \%-5.50 \%$ as of the end of 2023. Despite the increasing cost of capital and tighter lending environment that resulted from rising rates, economic growth remained surprisingly robust, bolstered by high levels of consumer spending, low levels of unemployment and better-than-expected corporate earnings. With the pace of rate increases slowing from the prior year, investors began hoping for an early shift to a looser monetary policy, with stock prices and bond yields reacting as economic data and statements from the Fed either reinforced or undercut those hopes. Following months of hawkish rhetoric, the Fed finally reversed its stance in December 2023, signaling a positive economic outlook with little chance of a recession and a likelihood of rate cuts in 2024.
The S\&P $500^{\circledR}$ Index, a widely regarded benchmark of U.S. market performance, produced strong gains during the reporting period-- recovering all its losses from 2022 and approached new record territory. A preponderance of the Index's gains were generated by a relatively small number of mega-cap stocks in the information technology, communication services and consumer discretionary sectors that stood to benefit from rapid developments in generative artificial intelligence ("Al"). Value-oriented, interest-rate sensitive and small-capitalization
shares lagged by significant margins, although market strength widened during the closing weeks of the reporting period. Most overseas equity markets trailed the U.S. market, as developed international economies experienced relatively low growth rates, and weak economic conditions in China undermined emerging markets.

Bonds produced generally positive returns, bolstered by attractive and relatively stable yields. The yield on the 10-year Treasury note hit a high of just under $5 \%$ in mid-October 2023, ranging between approximately $3.5 \%$ and $4.8 \%$ for most of the reporting period. The yield curve remained inverted throughout the year, with the 2 -year Treasury yield modestly above the 10-year yield. Corporate bond prices trended moderately higher, generally outperforming government securities. After years of low yields and tight credit spreads, the corporate sector benefited from more attractive valuations and income opportunities. Among corporates, markets generally rewarded longer duration and lower credit quality, although an uptick in default rates posed added risks for high-yield corporate bonds. International bond markets produced mixed returns, with emerging-markets issues advancing over their developed-markets counterparts.

The market volatility of recent years reminds us of the constant need for experienced and steadfast portfolio management in the face of uncertainty. New York Life Investments remains dedicated to providing you, as a valued MainStay VP investor, with the guidance, resources and investment solutions you need to pursue your financial goals.

Thank you for trusting us to help meet your investment needs.
Sincerely,

Kirk C. Lehneis
President

## Investment and Performance Comparison (Unaudited)

Performance data quoted represents past performance. Past performance is no guarantee of future results. Because of market volatility and other factors, current performance may be lower or higher than the figures shown. Investment return and principal value will fluctuate, and as a result, when shares are redeemed, they may be worth more or less than their original cost. The performance table and graph do not reflect any deduction of sales charges, mortality and expense charges, contract charges or administrative charges. Please refer to the Performance Summary appropriate for your policy. For performance information current to the most recent month-end, please call 800-598-2019 or visit www.newyorklife.com.

Performance figures may reflect certain fee waivers and/or expense limitations, without which total returns may have been different. For information on current fee waivers and/or expense limitations (if any), please refer to the Notes to Financial Statements.

## Average Annual Total Returns for the Year-Ended December 31, 2023

| Class | Inception <br> Date $^{1}$ | One <br> Year | Five <br> Years | Ten <br> Years | Gross <br> Expense <br> Ratio ${ }^{2}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Initial Class Shares | $5 / 1 / 2013$ | $10.26 \%$ | $2.78 \%$ | $-1.46 \%$ | $1.18 \%$ |
| Service Class Shares | $5 / 1 / 2013$ | 9.98 | 2.53 | -1.67 | 1.43 |

1. Effective November 30, 2018, the Portfolio's predecessor fund, MainStay VP Absolute Return Multi-Strategy Portfolio (the "VP ARMS Portfolio"), was reorganized into the Portfolio. The Portfolio assumed the VP ARMS Portfolio's historical performance and accounting information. Therefore, the performance information prior to November 30, 2018, shown in this report is that of the VP ARMS Portfolio, which had a different investment objective and different principal investment strategies and subadvisors. Past performance may have been different if the Portfolio's current subadvisor, investment objective or principal investment strategies had been in place during the periods.
2. The gross expense ratios presented reflect the Portfolio's "Total Annual Portfolio Operating Expenses" from the most recent Prospectus, as supplemented, and may differ from other expense ratios disclosed in this report.

| Benchmark Performance* | One Year | Five Years | Ten Years |
| :---: | :---: | :---: | :---: |
| S\&P Balanced Equity and Bond Conservative Index ${ }^{1}$ | 9.22\% | 4.15\% | 4.34\% |
| Barclay Hedge Fund Index ${ }^{2}$ | 9.28 | 6.33 | 4.50 |
| Barclay Fund of Funds Index ${ }^{3}$ | 5.85 | 4.03 | 2.31 |
| IQ Hedge Multi-Strategy Index ${ }^{4}$ | 10.80 | 3.50 | 2.63 |
| Morningstar Multistrategy Category Average ${ }^{5}$ | 6.24 | 4.13 | 2.25 |

* Returns for indices reflect no deductions for fees, expenses or taxes, except for foreign withholding taxes where applicable. Results assume reinvestment of all dividends and capital gains. An investment cannot be made directly in an index.

1. The Portfolio has selected the S\&P Balanced Equity and Bond Conservative Index as its primary benchmark. The S\&P Balanced Equity and Bond-Conservative Index consists of a position in S\&P 500 Total Return Index (25\%) and a position in the S\&P U.S. Treasury Bond 7-10 Year Index (75\%).
2. The Portfolio has selected the Barclay Hedge Fund Index as an additional benchmark. The Barclay Hedge Fund Index is a measure of the average return of all hedge funds (excepting Funds of Funds) in the Barclay database. The index is simply the arithmetic average of the net returns of all the funds that have reported that month.
3. The Portfolio has selected the Barclay Fund of Funds Index as its secondary benchmark. The Barclay Fund of Funds Index is a measure of the average return of all reporting funds in the Barclay database.
4. The IQ Hedge Multi-Strategy Index seeks to replicate the risk-adjusted return characteristics of the collective hedge funds using various hedge fund investment styles, including long/short equity, global macro, market neutral, event-driven, fixed income arbitrage and emerging markets.
5. The Morningstar Multistrategy Category Average is representative of funds that have a majority of their assets exposed to alternative strategies. Funds in this category include both funds with static allocations to alternative strategies and funds tactically allocating among alternative strategies and asset classes. Results are based on average total returns of similar funds with all dividends and capital gain distributions reinvested.

## Cost in Dollars of a $\$ 1,000$ Investment in MainStay VP IQ Hedge Multi-Strategy Portfolio (Unaudited)

The example below is intended to describe the fees and expenses borne by shareholders during the six-month period from July 1, 2023 to December 31, 2023, and the impact of those costs on your investment.

## Example

As a shareholder of the Portfolio you incur two types of costs: (1) transaction costs, including exchange fees and sales charges (loads) on purchases (as applicable), and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Portfolio expenses (as applicable). This example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of $\$ 1,000$ made at the beginning of the six-month period and held for the entire period from July 1, 2023 to December 31, 2023. Shares are only sold in connection with variable life and annuity contracts and the example does not reflect any contract level or transactional fees or expenses. If these costs had been included, your costs would have been higher.

This example illustrates your Portfolio's ongoing costs in two ways:

## Actual Expenses

The second and third data columns in the table below provide information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid during the six months ended

December 31, 2023. Simply divide your account value by $\$ 1,000$ (for example, an $\$ 8,600$ account value divided by $\$ 1,000=8.6$ ), then multiply the result by the number under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

## Hypothetical Example for Comparison Purposes

The fourth and fifth data columns in the table below provide information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of $5 \%$ per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balances or expenses you paid for the six-month period shown. You may use this information to compare the ongoing costs of investing in the Portfolio with the ongoing costs of investing in other mutual funds. To do so, compare this $5 \%$ hypothetical example with the $5 \%$ hypothetical examples that appear in the shareholder reports of the other mutual funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as exchange fees or sales charges (loads). Therefore, the fourth and fifth data columns of the table are useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

| Share Class | Beginning Account Value 7/1/23 | Ending Account Value (Based on Actual Returns and Expenses) 12/31/23 | Expenses Paid During Period ${ }^{1}$ | Ending Account Value (Based on Hypothetical 5\% Annualized Return and Actual Expenses) 12/31/23 | Expenses <br> Paid <br> During Period ${ }^{1}$ | Net Expense Ratio During Period ${ }^{2}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Initial Class Shares | \$1,000.00 | \$1,050.30 | \$3.62 | \$1,021.68 | \$3.57 | 0.70\% |
| Service Class Shares | \$1,000.00 | \$1,049.00 | \$4.91 | \$1,020.42 | \$4.84 | 0.95\% |

1. Expenses are equal to the Portfolio's annualized expense ratio of each class multiplied by the average account value over the period, divided by 365 and multiplied by 184 (to reflect the six-month period). The table above represents the actual expenses incurred during the six-month period. In addition to the fees and expenses which the Portfolio bears directly, it also indirectly bears a pro rata share of the fees and expenses of the underlying funds in which it invests. Such indirect expenses are not included in the above-reported expense figures.
2. Expenses are equal to the Portfolio's annualized expense ratio to reflect the six-month period.

Portfolio Composition as of December 31, 2023 (Unaudited)

| Bank Loan Funds | $23.4 \%$ | Merger Arbitrage Fund | $1.1 \%$ |
| :--- | :---: | :--- | :---: |

# Portfolio Management Discussion and Analysis (unaudited) 

Answers to the questions reflect the views of portfolio managers Francis Ok and Greg Barrato of IndexIO Advisors LLC, the Portfolio's Subadvisor.

## How did MainStay VP IO Hedge Multi-Strategy Portfolio perform relative to its benchmarks and peers during the 12 months ended December 31, 2023?

For the 12 months ended December 31, 2023, MainStay VP IQ Hedge Multi-Strategy Portfolio returned 10.26\% for Initial Class shares and $9.98 \%$ for Service Class shares. Over the same period, both share classes outperformed the $9.22 \%$ return for the S\&P Balanced Equity and Bond Conservative Index, which is the Portfolio's primary benchmark, and the $9.28 \%$ return for the Barclay Hedge Fund Index, which is the Portfolio's secondary benchmark. For the same period, both share classes outperformed the $5.85 \%$ return for the Barclay Fund of Funds Index, which is an additional benchmark for the Portfolio. For the 12 months ended December 31, 2023, both share classes underperformed the $10.80 \%$ return of the IQ Hedge Multi-Strategy Index (the "Underlying Index") and outperformed the $6.24 \%$ return of the Morningstar Multistrategy Category Average. ${ }^{1}$

## Were there any changes to the Portfolio during the reporting period?

At a meeting held on March 6-7, 2023, the Board of Trustees of MainStay VP Funds Trust considered and approved, among other related proposals: (i) modifying the Portfolio's investment objective; and (ii) modifying the Portfolio's principal investment strategies. See the Supplement dated May 1, 2023, for additional information.

## During the reporting period, were there any market events that materially impacted the Portfolio's performance or liquidity?

Several major events drove market activity during the reporting period. The most significant of these included the trajectory of inflation, the U.S. Federal Reserve's (the "Fed") rate decisions and forward guidance by the Fed, a U.S. regional banking crisis, significant advances in generative artificial intelligence ("Al"), the market dominance of the so-called 'Magnificent 7' group of companies leading developments in Al, oil market interventions by the OPEC group of oil-exporting nations and sharpening geopolitical tensions and conflicts in Ukraine and the Middle East. The Portfolio's diversified approach, with low correlation to traditional risk assets, helped soften the impact of these market-shaping events and provided a more stable return stream.
Investment markets underwent a seismic shift during the reporting period, as prevailing narratives and market sentiment started and ended the year at opposite extremes. The consensus
at the beginning of 2023 that a recession was imminent gave way to the broad belief that interest rate tightening by the Fed was likely to produce a soft landing, in which inflation would come under control without a significant economic downturn. Several key factors underpinned this bearish to bullish swing. Inflation trends and Fed policy decisions wielded an outsized influence over the markets and catalyzed sharp volatility in equity prices and fixed-income yields.

At the outset of the reporting period, rising interest rates and hawkish Fed guidance sparked recession concerns and market jitters. Restrictive rates produced chilling effects, demonstrated by several bouts of volatility, most notably related to the U.S. regional banking crisis in March and April. However, by the end of the reporting period, the prevailing risk attitude shifted, as economic growth remained solid. Cooling inflation, labor market resilience, unexpected consumer strength, continued normalization from pandemic-induced economic disruptions and ongoing growth helped catalyze a reconsideration of the Fed's economic outlook and a pause in its tightening campaign. By the end of the reporting period, belief that the Fed could pilot the economy to a soft-landing had gained widespread acceptance. With this attitude change, stocks soared to a banner year, ending the reporting period at or near record highs.

## What factors affected the Portfolio's relative performance during the reporting period?

The Portfolio outperformed the Index primarily due to asset allocation. Throughout the reporting period, the Portfolio held significantly overweight exposure to fixed-income securities and significantly underweight exposure to equities, with out-of-Index positions in alternatives, commodities, currencies, volatility and real estate. Out-of-Index positions in selected alternatives, commodities and currencies made positive contributions to the Portfolio's relative returns, while out-of-Index exposures to real estate and volatility detracted. (Contributions take weightings and total returns into account.) Within equities, underweight exposure detracted from relative performance, as did the Portfolio's diversified allocations across geographic regions, sectors and investment factors, in contrast to the Index's singular allocation to large-cap core U.S. equities, which were bolstered by the surging performance of Al-related U.S. mega-cap stocks. Within fixed-income, ${ }^{2}$ the Portfolio outperformed due to a relatively short duration profile and floating rate exposure. In the prevailing environment of rising interest rates and stable growth, exposure to floating rate investment-grade debt, bank loans, convertibles,

1. See "Investment and Performance Comparison" for more information on benchmark and peer group returns.
2. Duration is a measure of the price sensitivity of a fixed-income investment to changes in interest rates. Duration is expressed as a number of years and is considered a more accurate sensitivity gauge than average maturity.
short-duration Treasury and corporate investment-grade debt enhanced relative returns.

## During the reporting period, how did the Portfolio's performance correlate with traditional equity and fixed-income indices?

The Portfolio maintained a higher correlation to traditional equity indices and a lower correlation to investment-grade fixed-income indices. The Portfolio's correlation to the S\&P $500{ }^{\circledR}$ Index ${ }^{3}$ was $79.5 \%$. The Portfolio's correlation to the Bloomberg U.S. Aggregate Bond Index ${ }^{4}$ was 38.8\%.

## During the reporting period, how did the Portfolio's volatility compare to that of traditional fixed-income indices?

During the reporting period, the annualized daily volatility of the Portfolio was 6.83\%, compared to a volatility of $7.10 \%$ for the Bloomberg U.S. Aggregate Bond Index.

## How did you allocate the Portfolio's assets during the reporting period and why?

The Portfolio seeks to achieve performance similar to the overall hedge fund universe by replicating the "beta" 5 portion of the hedge fund return characteristics (i.e., that portion of the returns that are non-idiosyncratic, or unrelated to manager skill) over longer term periods and not on a daily basis. It does not seek to replicate the "alpha" ${ }^{6}$ portion of the return characteristics of the overall hedge fund universe.

Portfolio allocations are all rules-driven and made in accordance with the Underlying Index methodology. Prior to a methodology change that occurred on June 6, 2023, the Portfolio allocated its assets across six underlying hedge fund investment styles: emerging markets, market neutral, long/short equity, event-driven, fixed-income arbitrage, and global macro. Pursuant to the new index methodology, the Portfolio's allocations span hedge fund investment styles including, but not limited to, equity, fixed-income, emerging market, sector, specialized, and alternative strategies.

Prior to the methodology change, the Portfolio's allocations to the six underlying hedge fund investments styles were relatively
range-bound. The Portfolio's allocation to its event-driven investment style remained at its maximum weight of $33.33 \%$. The Portfolio's allocation to its long/short investment style ranged from $6.97 \%$ to $10.52 \%$. The Portfolio's allocation to the fixed-income arbitrage investment style ranged from 14.39\% to 20.39\%. The Portfolio maintained a short allocation to its market-neutral investment style with weights ranging from $-16.67 \%$ to $-6.96 \%$. The Portfolio's allocation to its emerging-markets investment style ranged from $18.10 \%$ to $23.56 \%$. The Portfolio's allocation to its global macro investment style ranged from $28.87 \%$ to its maximum weight of $33.33 \%$

As of the end of the reporting period (and inclusive of the methodology change), the Portfolio's allocations were $62.13 \%$ to fixed-income, 20.55\% to equity, 16.04\% to alternatives, $0.62 \%$ to commodities, $0.65 \%$ to volatility and $0 \%$ to real estate and currency.
 market performance. Results assume reinvestment of all dividends and capital gains. An investment cannot be made directly in an index.
4. The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable rate mortgage passthroughs), asset-backed securities and commercial mortgage-backed securities.
5. Beta is a measure of historical volatility relative to an appropriate index (benchmark) based on its investment objective. A beta greater than 1.00 indicates volatility greater than the benchmark's.
6. Alpha measures a fund's risk-adjusted performance and is expressed as an annualized percentage.

The opinions expressed are those of the portfolio managers as of the date of this report and are subject to change. There is no guarantee that any forecasts will come to pass. This material does not constitute investment advice and is not intended as an endorsement of any specific investment.

Not all MainStay VP Portfolios and/or share classes are available under all policies.

| (c) Total investment return may reflect adjustments to conform to generally accepted accounting principles. |  |  |  |  |  |  |  |  |  |  |
| (d) Without the custody fee reimbursement, net investment income (loss) would have been 3.73\%. |  |  |  |  |  |  |  |  |  |  |
| (e) In addition to the fees and expenses which the Portfolio bears directly, it also indirectly bears a pro-rata share of the fees and expenses of the underlying funds in which it invests. Such indirect expenses are not included in the above expense ratios. |  |  |  |  |  |  |  |  |  |  |

## Notes to Financial Statements

## Note 1-Organization and Business

MainStay VP Funds Trust (the "Fund") was organized as a Delaware statutory trust on February 1, 2011. The Fund is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. The Fund is comprised of thirty-one separate series (collectively referred to as the "Portfolios"). These financial statements and notes relate to the MainStay VP IQ Hedge Multi-Strategy Portfolio (the "Portfolio"), a "diversified" portfolio, as that term is defined in the 1940 Act, as interpreted or modified by regulatory authorities having jurisdiction, from time to time.
Shares of the Portfolio are currently offered to certain separate accounts to fund variable annuity policies and variable universal life insurance policies issued by New York Life Insurance and Annuity Corporation ("NYLIAC"), a wholly-owned subsidiary of New York Life Insurance Company ("New York Life") and may also be offered to fund variable annuity policies and variable universal life insurance policies issued by other insurance companies. NYLIAC allocates shares of the Portfolio to, among others, certain NYLIAC separate accounts. Shares of the Portfolio are also offered to the MainStay VP Conservative Allocation Portfolio, MainStay VP Moderate Allocation Portfolio, MainStay VP Growth Allocation Portfolio and MainStay VP Equity Allocation Portfolio, which operate as "funds-of-funds," and other variable insurance funds.

The following table lists the Portfolio's share classes that have been registered and commenced operations:

| Class | Commenced Operations |
| :--- | :--- |
| Initial Class | May 1, 2013 |
| Service Class | May 1, 2013 |

Shares of the Portfolio are offered and are redeemed at a price equal to their respective net asset value ("NAV") per share. No sales or redemption charge is applicable to the purchase or redemption of the Portfolio's shares. Under the terms of the Fund's multiple class plan, adopted pursuant to Rule 18f-3 under the 1940 Act, the classes differ in that, among other things, Service Class shares of the Portfolio pay a combined distribution and service fee of $0.25 \%$ of average daily net assets attributable to Service Class shares of the Portfolio to the Distributor (as defined in Note 3(B)) pursuant to a plan adopted in accordance with Rule 12b-1 under the 1940 Act. Contract owners of variable annuity contracts purchased after June 2, 2003, are permitted to invest only in the Service Class shares.

The Portfolio's investment objective is to seek investment returns that correspond (before fees and expenses) generally to the price and yield performance of its underlying index, the IQ Hedge Multi-Strategy Index. The IQ Hedge Multi-Strategy Index seeks to achieve performance similar to the overall hedge fund universe by replicating the "beta" portion of the hedge fund return characteristics (i.e., that portion of the returns that are non-idiosyncratic, or unrelated to manager skill) by using the following hedge fund investment styles: long/short equity; global macro; market neutral; event-driven; fixed-income arbitrage; and emerging markets.

The Portfolio is a "fund of funds" that seeks to achieve its investment objective by investing primarily in exchange-traded funds ("ETFs"), other exchange-traded vehicles issuing equity securities organized in the U.S., such as exchange-traded commodity pools ("ETVs"), and exchange-traded notes ("ETNs") (such ETFs, ETVs and ETNs are referred to collectively as "exchange-traded products" or "ETPs"), but may also invest in one or more financial instruments, including but not limited to, futures contracts, reverse repurchase agreements, options, and swap agreements (collectively, "Financial Instruments") in order to seek to achieve exposure to investment strategies and/or asset classes that are similar to those of the IQ Hedge Multi-Strategy Index.

## Note 2-Significant Accounting Policies

The Portfolio is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services-Investment Companies. The Portfolio prepares its financial statements in accordance with generally accepted accounting principles ("GAAP") in the United States of America and follows the significant accounting policies described below.
(A) Securities Valuation. Investments are usually valued as of the close of regular trading on the New York Stock Exchange (the "Exchange") (usually 4:00 p.m. Eastern time) on each day the Portfolio is open for business ("valuation date").

Pursuant to Rule 2a-5 under the 1940 Act, the Board of Trustees of the Fund (the "Board") has designated New York Life Investment Management LLC ("New York Life Investments" or the "Manager") as its Valuation Designee (the "Valuation Designee"). The Valuation Designee is responsible for performing fair valuations relating to all investments in the Portfolio's portfolio for which market quotations are not readily available; periodically assessing and managing material valuation risks; establishing and applying fair value methodologies; testing fair valuation methodologies; evaluating and overseeing pricing services; ensuring appropriate segregation of valuation and portfolio management functions; providing quarterly, annual and prompt reporting to the Board, as appropriate; identifying potential conflicts of interest; and maintaining appropriate records. The Valuation Designee has established a valuation committee ("Valuation Committee") to assist in carrying out the Valuation Designee's responsibilities and establish prices of securities for which market quotations are not readily available. The Portfolio's and the Valuation Designee's policies and procedures ("Valuation Procedures") govern the Valuation Designee's selection and application of methodologies for determining and calculating the fair value of Portfolio investments. The Valuation Designee may value the Portfolio's portfolio securities for which market quotations are not readily available and other Portfolio assets utilizing inputs from pricing services and other third-party sources. The Valuation Committee meets (in person, via electronic mail or via teleconference) on an ad-hoc basis to determine fair valuations and on a quarterly basis to review fair value events with respect to certain

## Notes to Financial Statements (continues)

securities for which market quotations are not readily available, including valuation risks and back-testing results, and to preview reports to the Board.

The Valuation Committee establishes prices of securities for which market quotations are not readily available based on such methodologies and measurements on a regular basis after considering information that is reasonably available and deemed relevant by the Valuation Committee. The Board shall oversee the Valuation Designee and review fair valuation materials on a prompt, quarterly and annual basis and approve proposed revisions to the Valuation Procedures.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to the Valuation Procedures. A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Portfolio can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. "Fair value" is defined as the price the Portfolio would reasonably expect to receive upon selling an asset or liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the asset or liability. Fair value measurements are determined within a framework that establishes a three-tier hierarchy that maximizes the use of observable market data and minimizes the use of unobservable inputs to establish a classification of fair value measurements for disclosure purposes. "Inputs" refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, such as the risk inherent in a particular valuation technique used to measure fair value using a pricing model and/or the risk inherent in the inputs for the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Portfolio. Unobservable inputs reflect the Portfolio's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the information available. The inputs or methodology used for valuing assets or liabilities may not be an indication of the risks associated with investing in those assets or liabilities. The three-tier hierarchy of inputs is summarized below.

- Level 1-quoted prices (unadjusted) in active markets for an identical asset or liability
- Level 2—other significant observable inputs (including quoted prices for a similar asset or liability in active markets, interest rates and yield curves, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Portfolio's own assumptions about the assumptions that market participants would use in measuring fair value of an asset or liability)

The level of an asset or liability within the fair value hierarchy is based on the lowest level of an input, both individually and in the aggregate, that is significant to the fair value measurement. The aggregate value by input
level of the Portfolio's assets and liabilities as of December 31, 2023, is included at the end of the Portfolio of Investments.

The Portfolio may use third-party vendor evaluations, whose prices may be derived from one or more of the following standard inputs, among others:

| - Benchmark yields | - Reported trades |
| :--- | :--- |
| - Broker/dealer quotes | - Issuer spreads |
| - Two-sided markets | - Benchmark securities |
| - Bids/offers | - Reference data (corporate actions or |
|  | material event notices) |
| - Industry and economic events | • Comparable bonds |
| - Monthly payment information |  |

An asset or liability for which a market quotation is not readily available is valued by methods deemed reasonable in good faith by the Valuation Committee, following the Valuation Procedures to represent fair value. Under these procedures, the Valuation Designee generally uses a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values and other relevant information. The Valuation Designee may also use an income-based valuation approach in which the anticipated future cash flows of the asset or liability are discounted to calculate fair value. Discounts may also be applied due to the nature and/or duration of any restrictions on the disposition of the asset or liability. Fair value represents a good faith approximation of the value of a security. Fair value determinations involve the consideration of a number of subjective factors, an analysis of applicable facts and circumstances and the exercise of judgment. As a result, it is possible that the fair value for a security determined in good faith in accordance with the Valuation Procedures may differ from valuations for the same security determined for other funds using their own valuation procedures. Although the Valuation Procedures are designed to value a security at the price the Portfolio may reasonably expect to receive upon the security's sale in an orderly transaction, there can be no assurance that any fair value determination thereunder would, in fact, approximate the amount that the Portfolio would actually realize upon the sale of the security or the price at which the security would trade if a reliable market price were readily available. During the year ended December 31, 2023, there were no material changes to the fair value methodologies.

Securities which may be valued in this manner include, but are not limited to: (i) a security for which trading has been halted or suspended or otherwise does not have a readily available market quotation on a given day; (ii) a debt security that has recently gone into default and for which there is not a current market quotation; (iii) a security of an issuer that has entered into a restructuring; (iv) a security that has been delisted from a national exchange; (v) a security subject to trading collars for which no or limited trading takes place; and (vi) a security whose principal market has been temporarily closed at a time when, under normal conditions, it would be open. Securities valued in this manner are generally categorized as Level 2 or 3 in the hierarchy.

Exchange-traded funds ("ETFs") are valued at the last quoted sales prices as of the close of regular trading on the relevant exchange on each valuation date. Securities that are not traded on the valuation date are valued at the mean of the last quoted bid and ask prices. Prices are normally taken from the principal market in which each security trades. These securities are generally categorized as Level 1 in the hierarchy.

Investments in mutual funds, including money market funds, are valued at their respective NAVs at the close of business each day on the valuation date. These securities are generally categorized as Level 1 in the hierarchy.

Swaps are marked to market daily based upon quotations from pricing agents, brokers or market makers. These securities are generally categorized as Level 2 in the hierarchy.

Total return swap contracts, which are arrangements to exchange a market-linked return for a periodic payment, are based on a notional principal amount. To the extent that the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Portfolio will receive a payment from or make a payment to the counterparty. Total return swap contracts are marked to market daily based upon quotations from market makers and these securities are generally categorized as Level 2 in the hierarchy.

Temporary cash investments acquired in excess of 60 days to maturity at the time of purchase are valued using the latest bid prices or using valuations based on a matrix system (which considers such factors as security prices, yields, maturities and ratings), both as furnished by independent pricing services. Temporary cash investments that mature in 60 days or less at the time of purchase ("Short-Term Investments") are valued using the amortized cost method of valuation, unless the use of such method would be inappropriate. The amortized cost method involves valuing a security at its cost on the date of purchase and thereafter assuming a constant amortization to maturity of the difference between such cost and the value on maturity date. Amortized cost approximates the current fair value of a security. Securities valued using the amortized cost method are not valued using quoted prices in an active market and are generally categorized as Level 2 in the hierarchy.

The information above is not intended to reflect an exhaustive list of the methodologies that may be used to value portfolio investments. The Valuation Procedures permit the use of a variety of valuation methodologies in connection with valuing portfolio investments. The methodology used for a specific type of investment may vary based on the market data available or other considerations. The methodologies summarized above may not represent the specific means by which portfolio investments are valued on any particular business day.
(B) Income Taxes. The Portfolio's policy is to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), applicable to regulated investment companies and to distribute all of its taxable income to the shareholders of the Portfolio within the allowable time limits.

The Manager evaluates the Portfolio's tax positions to determine if the tax positions taken meet the minimum recognition threshold in connection with accounting for uncertainties in income tax positions taken or expected to be taken for the purposes of measuring and recognizing tax liabilities in the financial statements. Recognition of tax benefits of an uncertain tax position is permitted only to the extent the position is "more likely than not" to be sustained assuming examination by taxing authorities. The Manager analyzed the Portfolio's tax positions taken on federal, state and local income tax returns for all open tax years (for up to three tax years) and has concluded that no provisions for federal, state and local income tax are required in the Portfolio's financial statements. The Portfolio's federal, state and local income tax and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state and local departments of revenue.
(C) Dividends and Distributions to Shareholders. Dividends and distributions are recorded on the ex-dividend date. The Portfolio intends to declare and pay dividends from net investment income and distributions from net realized capital and currency gains, if any, at least annually. All dividends and distributions are reinvested at NAV in the same class of shares of the Portfolio. Dividends and distributions to shareholders are determined in accordance with federal income tax regulations and may differ from determinations using GAAP.
(D) Security Transactions and Investment Income. The Portfolio records security transactions on the trade date. Realized gains and losses on security transactions are determined using the identified cost method. Dividend income is recognized on the ex-dividend date, net of any foreign tax withheld at the source, and interest income is accrued as earned using the effective interest rate method. Distributions received from real estate investment trusts and the underlying funds held by the Portfolio may be classified as dividends, capital gains and/or return of capital.

Investment income and realized and unrealized gains and losses on investments of the Portfolio are allocated pro rata to the separate classes of shares based upon their relative net assets on the date the income is earned or realized and unrealized gains and losses are incurred.
(E) Expenses. Expenses of the Fund are allocated to the individual Portfolios in proportion to the net assets of the respective Portfolios when the expenses are incurred, except where direct allocations of expenses can be made. Expenses (other than fees incurred under the distribution and service plans, further discussed in Note 3(B), which are charged directly to the Service Class shares) are allocated to separate classes of shares pro rata based upon their relative net assets on the date the expenses are incurred. The expenses borne by the Portfolio, including those of related parties to the Portfolio, are shown in the Statement of Operations.

Additionally, the Portfolio may invest in ETPs and mutual funds, which are subject to management fees and other fees that may cause the costs of investing in ETPs and mutual funds to be greater than the costs of owning the underlying securities directly. These indirect expenses of ETPs and

## Notes to Financial Statements (continues)

mutual funds are not included in the amounts shown as expenses in the Statement of Operations or in the expense ratios included in the Financial Highlights.

In addition, the Portfolio bears a pro rata share of the fees and expenses of the ETPs in which it invests. Because the ETPs have varied expense and fee levels and the Portfolio may own different proportions of the ETPS at different times, the amount of fees and expenses incurred indirectly by the Portfolio may vary.
(F) Use of Estimates. In preparing financial statements in conformity with GAAP, the Manager makes estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates and assumptions.
(G) Swap Contracts. The Portfolio may enter into credit default, interest rate, equity, index and currency exchange rate swap contracts ("swaps"). In a typical swap transaction, two parties agree to exchange the future returns (or differentials in rates of future returns) earned or realized at periodic intervals on a particular investment or instrument based on a notional principal amount. Generally, the Portfolio will enter into a swap on a net basis, which means that the two payment streams under the swap are netted, with the Portfolio receiving or paying (as the case may be) only the net amount of the two payment streams. Therefore, the Portfolio's current obligation under a swap generally will be equal to the net amount to be paid or received under the swap, based on the relative value of notional positions attributable to each counterparty to the swap. The payments may be adjusted for transaction costs, interest payments, the amount of interest paid on the investment or instrument or other factors. Collateral, in the form of cash or securities, may be required to be held in segregated accounts with the custodian bank or broker in accordance with the terms of the swap. Swap agreements are privately negotiated in the over the counter ("OTC") market and may be executed in a multilateral or other trade facilities platform, such as a registered commodities exchange ("centrally cleared swaps").

Certain standardized swaps, including certain credit default and interest rate swaps, are subject to mandatory clearing and exchange-trading, and more types of standardized swaps are expected to be subject to mandatory clearing and exchange-trading in the future. The counterparty risk for exchange-traded and cleared derivatives is expected to be generally lower than for uncleared derivatives, but cleared contracts are not risk-free. In a cleared derivative transaction, the Portfolio typically enters into the transaction with a financial institution counterparty, and performance of the transaction is effectively guaranteed by a central clearinghouse, thereby reducing or eliminating the Portfolio's exposure to the credit risk of its original counterparty. The Portfolio will be required to post specified levels of margin with the clearinghouse or at the instruction of the clearinghouse; the margin required by a clearinghouse may be greater than the margin the Portfolio would be required to post in an uncleared transaction.

Swaps are marked to market daily based upon quotations from pricing agents, brokers, or market makers and the change in value, if any, is
recorded as unrealized appreciation or depreciation. Any payments made or received upon entering into a swap would be amortized or accreted over the life of the swap and recorded as a realized gain or loss. Early termination of a swap is recorded as a realized gain or loss. Daily changes in valuation of centrally cleared swaps, if any, are recorded as a receivable or payable for the change in value as appropriate on the Statement of Assets and Liabilities.

The Portfolio bears the risk of loss of the amount expected to be received under a swap in the event of the default or bankruptcy of the swap counterparty. The Portfolio may be able to eliminate its exposure under a swap either by assignment or other disposition, or by entering into an offsetting swap with the same party or a similar credit-worthy party. Swaps are not actively traded on financial markets. Entering into swaps involves elements of credit, market, leverage, liquidity, operational, counterparty and legal/documentation risk in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibilities that there will be no liquid market for these swaps, that the counterparty to the swaps may default on its obligation to perform or disagree as to the meaning of the contractual terms in the swaps and that there may be unfavorable changes in interest rates, the price of the index or the security underlying these transactions, among other risks.

Equity Swaps (Total Return Swaps). Total return swap contracts are agreements between counterparties to exchange cash flow, one based on a market-linked return of an individual asset or group of assets (such as an index), and the other on a fixed or floating rate. As a total return swap, an equity swap may be structured in different ways. For example, when the Portfolio enters into a "long" equity swap, the counterparty may agree to pay the Portfolio the amount, if any, by which the notional amount of the equity swap would have increased in value had it been invested in a particular referenced security or securities, plus the dividends that would have been received on those securities. In return, the Portfolio will generally agree to pay the counterparty interest on the notional amount of the equity swap plus the amount, if any, by which that notional amount would have decreased in value had it been invested in such referenced security or securities, plus, in certain instances, commissions or trading spreads on the notional amounts. Therefore, the Portfolio's return on the equity swap generally should equal the gain or loss on the notional amount, plus dividends on the referenced security or securities less the interest paid by the Portfolio on the notional amount. Alternatively, when the Portfolio enters into a "short" equity swap, the counterparty will generally agree to pay the Portfolio the amount, if any, by which the notional amount of the equity swap would have decreased in value had the Portfolio sold a particular referenced security or securities short, less the dividend expense that the Portfolio would have incurred on the referenced security or securities, as adjusted for interest payments or other economic factors. In this situation, the Portfolio will generally be obligated to pay the amount, if any, by which the notional amount of the swap would have increased in value had it been invested directly in the referenced security or securities.

Equity swaps generally do not involve the delivery of securities or other referenced assets. Accordingly, the risk of loss with respect to equity
swaps is normally limited to the net amount of payments that the Portfolio is contractually obligated to make. If the other party to an equity swap defaults, the Portfolio's risk of loss consists of the net amount of payments that the Portfolio is contractually entitled to receive, if any. The Portfolio will segregate cash or liquid assets, enter into offsetting transactions or use other measures permitted by applicable law to "cover" the Portfolio's current obligations. The Portfolio and New York Life Investments, however, believe these transactions do not constitute senior securities under the 1940 Act and, accordingly, will not treat them as being subject to the Portfolio's borrowing restrictions.

Equity swaps are derivatives and their value can be very volatile. The Portfolio may engage in total return swaps to gain exposure to emerging markets securities, along with offsetting long total return swap positions to maintain appropriate currency balances and risk exposures across all swap positions. To the extent that the Manager, or the Subadvisor do not accurately analyze and predict future market trends, the values or assets or economic factors, the Portfolio may suffer a loss, which may be substantial.
(H) Foreign Currency Transactions. The Portfolio's books and records are maintained in U.S. dollars. Prices of securities denominated in foreign currency amounts are translated into U.S. dollars at the mean between the buying and selling rates last quoted by any major U.S. bank at the following dates:
(i) market value of investment securities, other assets and liabilities- at the valuation date; and
(ii) purchases and sales of investment securities, income and expenses-at the date of such transactions.

The assets and liabilities that are denominated in foreign currency amounts are presented at the exchange rates and market values at the close of the period. The realized and unrealized changes in net assets arising from fluctuations in exchange rates and market prices of securities are not separately presented.

Net realized gain (loss) on foreign currency transactions represents net currency gains or losses realized as a result of differences between the amounts of securities sale proceeds or purchase cost, dividends, interest and withholding taxes as recorded on the Portfolio's books, and the U.S. dollar equivalent amount actually received or paid. Net currency gains or losses from valuing such foreign currency denominated assets and liabilities, other than investments at valuation date exchange rates, are reflected in unrealized foreign exchange gains or losses.
(I) Securities Lending. In order to realize additional income, the Portfolio may engage in securities lending, subject to the limitations set forth in the 1940 Act and relevant guidance by the staff of the Securities and Exchange Commission ("SEC"). If the Portfolio engages in securities lending, the Portfolio will lend through its custodian, JPMorgan Chase Bank, N.A., ("JPMorgan"), acting as securities lending agent on behalf of the Portfolio. Under the current arrangement, JPMorgan will manage the Portfolio's collateral in accordance with the securities lending agency
agreement between the Portfolio and JPMorgan, and indemnify the Portfolio against counterparty risk. The loans will be collateralized by cash (which may be invested in a money market fund) and/or non-cash collateral (which may include U.S. Treasury securities and/or U.S. government agency securities issued or guaranteed by the United States government or its agencies or instrumentalities) at least equal at all times to the market value of the securities loaned. Non-cash collateral held at year end is segregated and cannot be transferred by the Portfolio. The Portfolio bears the risk of delay in recovery of, or loss of rights in, the securities loaned. The Portfolio may also record a realized gain or loss on securities deemed sold due to a borrower's inability to return securities on loan. The Portfolio bears the risk of any loss on investment of cash collateral. The Portfolio will receive compensation for lending its securities in the form of fees or it will retain a portion of interest earned on the investment of any cash collateral. The Portfolio will also continue to receive interest and dividends on the securities loaned and any gain or loss in the market price of the securities loaned that may occur during the term of the loan will be for the account of the Portfolio. Income earned from securities lending activities, if any, is reflected in the Statement of Operations.
(J) Foreign Securities Risk. The Portfolio may invest in foreign securities, which carry certain risks that are in addition to the usual risks inherent in domestic securities. Foreign regulatory regimes and securities markets can have less stringent investor protections and disclosure standards and less liquid trading markets than U.S. regulatory regimes and securities markets, and can experience political, social and economic developments that may affect the value of investments in foreign securities. These risks include those resulting from currency fluctuations, future adverse political or economic developments and possible imposition of currency exchange blockages or other foreign governmental laws or restrictions. Economic sanctions and other similar governmental actions or developments could, among other things, effectively restrict or eliminate the Portfolio's ability to purchase or sell certain foreign securities or groups of foreign securities, and thus may make the Portfolio's investments in such securities less liquid or more difficult to value. These risks are likely to be greater in emerging markets than in developed markets. The ability of issuers of debt securities held by the Portfolio to meet their obligations may be affected by, among other things, economic or political developments in a specific country, industry or region.
(K) Counterparty Credit Risk. In order to better define its contractual rights and to secure rights that will help the Portfolio mitigate its counterparty risk, the Portfolio may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement with its counterparties. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs certain OTC derivatives and typically contains collateral posting terms and netting provisions. Under an ISDA Master Agreement, the Portfolio may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and/ or receivables with collateral held and/or posted and create one single net

## Notes to Financial Statements (continues)

payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default including the bankruptcy or insolvency of the counterparty. Bankruptcy or insolvency laws of a particular jurisdiction may restrict or prohibit the right of offset in bankruptcy, insolvency or other events. In addition, certain ISDA Master Agreements may contain provisions for early termination of OTC derivative transactions in the event the net assets of the Portfolio decline below specific levels or if the Portfolio fails to meet the terms of its ISDA Master Agreements. The result would cause the Portfolio to accelerate payment of any net liability owed to the counterparty.

For financial reporting purposes, the Portfolio does not offset derivative assets and derivative liabilities that are subject to netting arrangements, if any, in the Statement of Assets and Liabilities.
(L) Indemnifications. Under the Fund's organizational documents, its officers and trustees are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Portfolio enters into contracts with third-party service providers that contain a variety of representations and warranties and that may provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio that have not yet occurred. The Manager believes that the risk of loss in connection with these potential indemnification obligations is remote. However, there can be no assurance that material liabilities related to such obligations will not arise in the future, which could adversely impact the Portfolio.
(M) Quantitative Disclosure of Derivative Holdings. The following tables show additional disclosures related to the Portfolio's derivative and hedging activities, including how such activities are accounted for and their effect on the Portfolio's financial positions, performance and cash flows.

The Portfolio utilizes a range of derivative instruments for a variety of different purposes. Total return swaps ("TRS") are one form of derivative that is used. In some cases, TRS contracts are entered into so as to affect long and short exposure to individual securities or indices within a particular strategy. In other cases, TRS are used to gain exposure to the strategy itself, which may also use derivatives. For example, a TRS contract is used to generate the return available from a customized index comprised of a diversified basket of exchange-traded futures. Other examples of derivative positions into which the Portfolio may enter include interest rate swaps, credit default swaps and option contracts. These instruments are frequently used to obtain a desired return at a lower cost to the Portfolio than is available when investing directly in the underlying instrument or to hedge against credit and interest rate risks. The Portfolio may also enter into foreign currency forward contracts to gain exposure to a particular currency or to hedge against the risk of loss due to changing currency exchange rates. These derivatives are not accounted for as hedging instruments.

The effect of derivative instruments on the Statement of Operations for the year ended December 31, 2023:

|  | Equity <br> Contracts <br> Risk | Total |
| :--- | ---: | ---: |
| Net Realized Gain (Loss) from: | $\$(1,006,017)$ | $\$(1,006,017)$ |
| Swap Transactions | $\$(1,006,017)$ | $\$(1,006,017)$ |
| Total Net Realized Gain (Loss) |  |  |

| Average Notional Amount | Total |
| :--- | ---: |
| Swap Contracts Long | $\$ 17,659,202$ |
| Swap Contracts Short | $\$(17,680,448)$ |

## Note 3-Fees and Related Party Transactions

(A) Manager and Subadvisor. New York Life Investments, a registered investment adviser and an indirect, wholly-owned subsidiary of New York Life, serves as the Portfolio's Manager, pursuant to an Amended and Restated Management Agreement ("Management Agreement"). The Manager provides offices, conducts clerical, recordkeeping and bookkeeping services, and keeps most of the financial and accounting records required to be maintained by the Portfolio. Except for the portion of salaries and expenses that are the responsibility of the Portfolio, the Manager pays the salaries and expenses of all personnel affiliated with the Portfolio and certain operational expenses of the Portfolio. The Portfolio reimburses New York Life Investments in an amount equal to the portion of the compensation of the Chief Compliance Officer attributable to the Portfolio. IndexIQ Advisors LLC ("IndexIQ Advisors" or "Subadvisor"), a registered investment adviser and an affiliate of New York Life Investments, serves as the Subadvisor to the Portfolio and is responsible for the day-to-day portfolio management of the Portfolio. Pursuant to the terms of a Subadvisory Agreement between New York Life Investments and IndexIQ Advisors, New York Life Investments pays for the services of the Subadvisor.

Pursuant to the Management Agreement, the Fund pays the Manager, on behalf of the Portfolio, a monthly fee for the services performed and the facilities furnished at an annual rate of $0.75 \%$ of the Portfolio's average daily net assets.

New York Life Investments has contractually agreed to waive fees and/or reimburse expenses so that the Total Annual Portfolio Operating Expenses (excluding taxes, interest, litigation, extraordinary expenses, brokerage and other transaction expenses relating to the purchase or sale of portfolio investments, and acquired (underlying) portfolio/fund fees and expenses) of Initial Class shares and Service Class shares do not exceed $0.70 \%$ and $0.95 \%$, respectively, of the Portfolio's average daily net assets. This agreement will remain in effect until May 1, 2024, and shall renew automatically for one-year terms unless New York Life Investments provides written notice of termination prior to the start of the next term or upon approval of the Board.

During the year ended December 31, 2023, New York Life Investments earned fees from the Portfolio in the amount of $\$ 2,061,715$ and waived
fees and/or reimbursed expenses in the amount of \$283,457 and paid the Subadvisor fees in the amount of $\$ 889,234$.

JPMorgan provides sub-administration and sub-accounting services to the Portfolio pursuant to an agreement with New York Life Investments. These services include calculating the daily NAVs of the Portfolio, maintaining the general ledger and sub-ledger accounts for the calculation of the Portfolio's NAVs, and assisting New York Life Investments in conducting various aspects of the Portfolio's administrative operations. For providing these services to the Portfolio, JPMorgan is compensated by New York Life Investments.

Pursuant to an agreement between the Fund and New York Life Investments, New York Life Investments is responsible for providing or procuring certain regulatory reporting services for the Portfolio. The Portfolio will reimburse New York Life Investments for the actual costs incurred by New York Life Investments in connection with providing or procuring these services for the Portfolio.
(B) Distribution and Service Fees. The Fund, on behalf of the Portfolio, has entered into a distribution agreement with NYLIFE Distributors LLC (the "Distributor"), an affiliate of New York Life Investments. The Portfolio has adopted a distribution plan (the "Plan") in accordance with the provisions of Rule 12b-1 under the 1940 Act. Under the Plan, the Distributor has agreed to provide, through its affiliates or independent third parties, various distribution-related, shareholder and administrative support services to the Service Class shareholders. For its services, the Distributor is entitled to a combined distribution and service fee accrued daily and paid monthly at an annual rate of $0.25 \%$ of the average daily net assets attributable to the Service Class shares of the Portfolio.

## Note 4-Federal Income Tax

As of December 31, 2023, the cost and unrealized appreciation (depreciation) of the Portfolio's investment portfolio, including applicable derivative contracts and other financial instruments, as determined on a federal income tax basis, were as follows:

|  |  | Gross | Net <br> Gederal Taxs <br> Cost | Unrealized <br> Unrealized |
| :---: | :---: | :---: | ---: | ---: |
|  |  |  | Unrealized <br> Appreciation/ |  |
| Investments in <br> Securities | $\$ 303,027,930$ | $\$ 5,860,745$ | $\$(1,513,018)$ | $\$ 4,347,727$ |

As of December 31, 2023, the components of accumulated gain (loss) on a tax basis were as follows:

|  | Accumulated <br> Capital <br> and Other | Other <br> Ordinary <br> Thain (Loss) | Unrealized <br> Differences <br> Inpreciation <br> (Depreciation) | Total <br> Accumulated <br> Gain (Loss) |
| ---: | ---: | ---: | ---: | ---: |
| $\$-$ | $\$(74,495,096)$ | $\$-$ | $\$ 4,354,883$ | $\$(70,140,213)$ |

The difference between book-basis and tax-basis unrealized appreciation (depreciation) is primarily due to wash sale adjustments. The other
temporary differences are primarily due to deferral of specified late year ordinary losses of $\$ 968,185$.

As of December 31, 2023, for federal income tax purposes, capital loss carryforwards of $\$ 73,521,468$, as shown in the table below, were available to the extent provided by the regulations to offset future realized gains of the Portfolio. Accordingly, no capital gains distributions are expected to be paid to shareholders until net gains have been realized in excess of such amounts.

| Capital Loss <br> Available Through | Short-Term <br> Capital Loss <br> Amounts (000's) | Long-Term <br> Capital Loss <br> Amounts (000's) |
| :---: | :---: | :---: |
| Unlimited | $\$ 57,771$ | $\$ 15,750$ |

During the years ended December 31, 2023 and December 31, 2022, the tax character of distributions paid as reflected in the Statements of Changes in Net Assets was as follows:

|  | $\mathbf{2 0 2 3}$ | $\mathbf{2 0 2 2}$ |
| :--- | ---: | ---: |
| Distributions paid from: <br> Ordinary Income | $\$ 11,751,645$ | $\$ 5,106,253$ |

## Note 5-Custodian

JPMorgan is the custodian of cash and securities held by the Portfolio. Custodial fees are charged to the Portfolio based on the Portfolio's net assets and/or the market value of securities held by the Portfolio and the number of certain transactions incurred by the Portfolio.

## Note 6-Line of Credit

The Portfolio and certain other funds managed by New York Life Investments maintain a line of credit with a syndicate of banks in order to secure a source of funds for temporary purposes to meet unanticipated or excessive redemption requests.

Effective July 25, 2023, under the credit agreement (the "Credit Agreement"), the aggregate commitment amount is $\$ 600,000,000$ with an additional uncommitted amount of $\$ 100,000,000$. The commitment fee is an annual rate of $0.15 \%$ of the average commitment amount payable quarterly, regardless of usage, to JPMorgan, who serves as the agent to the syndicate. The commitment fee is allocated among the Portfolio and certain other funds managed by New York Life Investments based upon their respective net assets and other factors. Interest on any revolving credit loan is charged based upon the Federal Funds Rate, Daily SOFR $+0.10 \%$, or the Overnight Bank Funding Rate, whichever is higher. The Credit Agreement expires on July 23, 2024, although the Portfolio, certain other funds managed by New York Life Investments and the syndicate of banks may renew the Credit Agreement for an additional year on the same or different terms or enter into a credit agreement with a different syndicate of banks. Prior to July 25,2023 , the aggregate commitment amount and the commitment fee were the same as those under the current Credit Agreement. During the year ended December 31,2023 , there were no borrowings made or outstanding with respect to the Portfolio under the Credit Agreement.

## Notes to Financial Statements

## Note 7-Interfund Lending Program

Pursuant to an exemptive order issued by the SEC, the Portfolio, along with certain other funds managed by New York Life Investments, may participate in an interfund lending program. The interfund lending program provides an alternative credit facility that permits the Portfolio and certain other funds managed by New York Life Investments to lend or borrow money for temporary purposes directly to or from one another, subject to the conditions of the exemptive order. During the year ended December 31, 2023, there were no interfund loans made or outstanding with respect to the Portfolio.

## Note 8-Purchases and Sales of Securities (in 000's)

During the year ended December 31, 2023, purchases and sales of securities, other than short-term securities, were \$293,966 and $\$ 336,197$, respectively.

## Note 9-Capital Share Transactions

Transactions in capital shares for the years ended December 31, 2023 and December 31, 2022, were as follows:

| Initial Class | Shares | Amount |  |
| :---: | :---: | :---: | :---: |
| Year ended December 31, 2023: |  |  |  |
| Shares sold | 92,848 | \$ | 783,651 |
| Shares issued to shareholders in reinvestment of distributions | 69,798 |  | 588,271 |
| Shares redeemed | $(253,924)$ |  | $(2,101,275)$ |
| Net increase (decrease) | $(91,278)$ | \$ | $(729,353)$ |
| Year ended December 31, 2022: |  |  |  |
| Shares sold | 56,268 | \$ | 474,155 |
| Shares issued to shareholders in reinvestment of distributions | 30,435 |  | 245,307 |
| Shares redeemed | $(90,997)$ |  | $(758,670)$ |
| Net increase (decrease) | $(4,294)$ | \$ | $(39,208)$ |
| Service Class | Shares |  | Amount |
| Year ended December 31, 2023: |  |  |  |
| Shares sold | 986,872 | \$ | 8,281,836 |
| Shares issued to shareholders in reinvestment of distributions | 1,325,351 |  | 11,163,374 |
| Shares redeemed | $(6,786,433)$ |  | 56,799,042) |
| Net increase (decrease) | (4,474,210) |  | 37,353,832) |
| Year ended December 31, 2022 : |  |  |  |
| Shares sold | 820,504 | ¢ | 6,841,290 |
| Shares issued to shareholders in reinvestment of distributions | 605,130 |  | 4,860,946 |
| Shares redeemed | $(7,550,160)$ |  | 62,743,199) |
| Net increase (decrease) | (6,124,526) |  | 51,040,963) |

## Note 10-0ther Matters

As of the date of this report, the Portfolio faces a heightened level of risk associated with current uncertainty, volatility and state of economies, financial markets, rising interest rates, and labor and health conditions around the world. Events such as war, acts of terrorism, recessions, rapid inflation, the imposition of international sanctions, earthquakes, hurricanes, epidemics and pandemics and other unforeseen natural or human disasters may have broad adverse social, political and economic effects on the global economy, which could negatively impact the value of the Portfolio's investments. Developments that disrupt global economies and financial markets may magnify factors that affect the Portfolio's performance.

## Note 11-Subsequent Events

In connection with the preparation of the financial statements of the Portfolio as of and for the year ended December 31, 2023, events and transactions subsequent to December 31, 2023, through the date the financial statements were issued, have been evaluated by the Manager for possible adjustment and/or disclosure. No subsequent events requiring financial statement adjustment or disclosure have been identified.

## Report of Independent Registered Public Accounting Firm

To the Board of Trustees of MainStay VP Funds Trust and Shareholders of MainStay VP IQ Hedge Multi-Strategy Portfolio

## Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of MainStay VP IQ Hedge Multi-Strategy Portfolio (one of the portfolios constituting MainStay VP Funds Trust, referred to hereafter as the "Portfolio") as of December 31, 2023, the related statement of operations for the year ended December 31, 2023, the statements of changes in net assets for each of the two years in the period ended December 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio as of December 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2023 and the financial highlights for each of the five years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

## Basis for Opinion

These financial statements are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on the Portfolio's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Portfolio in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2023 by correspondence with the custodian, transfer agents and brokers. We believe that our audits provide a reasonable basis for our opinion.

## /s/PricewaterhouseCoopers LLP

New York, New York
February 26, 2024
We have served as the auditor of one or more investment companies in the MainStay group of funds since 1984.

## Board Consideration and Approval of Management Agreement and Subadvisory Agreement (Unaudited)

The continuation of the Management Agreement with respect to the MainStay VP IQ Hedge Multi-Strategy Portfolio ("Portfolio") and New York Life Investment Management LLC ("New York Life Investments") and the Subadvisory Agreement between New York Life Investments and IndexIQ Advisors LLC ("IndexIQ") with respect to the Portfolio (together, "Advisory Agreements") is subject to annual review and approval by the Board of Trustees of MainStay VP Funds Trust ("Board" of the "Trust") in accordance with Section 15 of the Investment Company Act of 1940, as amended ("1940 Act"). At its December 6-7, 2023 meeting, the Board, including the Trustees who are not an "interested person" (as such term is defined in the 1940 Act) of the Trust ("Independent Trustees") voting separately, unanimously approved the continuation of each of the Advisory Agreements for a one-year period.

In reaching the decision to approve the continuation of each of the Advisory Agreements, the Board considered information and materials furnished by New York Life Investments and IndexIQ in connection with an annual contract review process undertaken by the Board that took place at meetings of the Board and its Contracts Committee from September 2023 through December 2023, including information and materials furnished by New York Life Investments and IndexIQ in response to requests prepared on behalf of the Board, and in consultation with the Independent Trustees, by independent legal counsel to the Independent Trustees, which encompassed a variety of topics, including those summarized below. Information and materials requested by and furnished to the Board for consideration in connection with the contract review process included, among other items, reports on the Portfolio and "peer funds" prepared by Institutional Shareholder Services Inc. ("ISS"), an independent third-party service provider engaged by the Board to report objectively on the Portfolio's investment performance, management fee and total expenses. The Board also considered information on the fees charged to other investment advisory clients of New York Life Investments and/or IndexIQ that follow investment strategies similar to those of the Portfolio, if any, and, when applicable, the rationale for differences in the Portfolio's management and subadvisory fees and the fees charged to those other investment advisory clients. In addition, the Board considered information regarding the legal standards and fiduciary obligations applicable to its consideration of the continuation of each of the Advisory Agreements. The contract review process, including the structure and format for information and materials provided to the Board, has been developed in consultation with the Board. The Independent Trustees also met in executive sessions with their independent legal counsel and, for portions thereof, with senior management of New York Life Investments.

The Board's deliberations with respect to the continuation of each of the Advisory Agreements reflect a year-long process, and the Board also took into account information furnished to the Board and its Committees throughout the year, as deemed relevant and appropriate by the Trustees, including, among other items, reports on investment performance of the Portfolio and investment-related matters for the Portfolio as well as presentations from New York Life Investments and, generally annually, IndexIQ personnel. In addition, the Board took into account
other information provided by New York Life Investments throughout the year, including, among other items, periodic reports on legal and compliance matters, risk management, portfolio turnover, brokerage commissions and non-advisory services provided to the Portfolio by New York Life Investments, as deemed relevant and appropriate by the Trustees.

In addition to information provided to the Board throughout the year, the Board received information in connection with its June 2023 meeting provided specifically in response to requests prepared on behalf of the Board, and in consultation with the Independent Trustees, by independent legal counsel to the Independent Trustees regarding the Portfolio's distribution arrangements. In addition, the Board received information regarding the Portfolio's asset levels, share purchase and redemption activity and the payment of Rule 12b-1 and/or certain other fees by the applicable share classes of the Portfolio, among other information.

In considering the continuation of each of the Advisory Agreements, the Trustees reviewed and evaluated the information and factors they believed to reasonably be necessary and appropriate in light of legal advice furnished to them by independent legal counsel to the Independent Trustees and through the exercise of their own business judgment. Although individual Trustees may have weighed certain factors or information differently and the Board did not consider any single factor or information controlling in reaching its decision, the factors that figured prominently in the Board's consideration of the continuation of each of the Advisory Agreements are summarized in more detail below and include, among other factors: (i) the nature, extent and quality of the services provided to the Portfolio by New York Life Investments and IndexIQ; (ii) the qualifications of the portfolio managers of the Portfolio and the historical investment performance of the Portfolio, New York Life Investments and IndexIQ; (iii) the costs of the services provided, and profits realized, by New York Life Investments and IndexIQ with respect to their relationships with the Portfolio; (iv) the extent to which economies of scale have been realized or may be realized if the Portfolio grows and the extent to which any economies of scale have been shared, have benefited or may benefit the Portfolio's shareholders; and (v) the reasonableness of the Portfolio's management and subadvisory fees and total ordinary operating expenses. Although the Board recognized that comparisons between the Portfolio's fees and expenses and those of other funds are imprecise given different terms of agreements, variations in fund strategies and other factors, the Board considered the reasonableness of the Portfolio's management fee and total ordinary operating expenses as compared to the peer funds identified by ISS. Throughout their considerations, the Trustees acknowledged the commitment of New York Life Investments and its affiliates to serve the MainStay Group of Funds, as well as their capacity, experience, resources, financial stability and reputations. The Trustees also acknowledged the entrepreneurial and other risks assumed by New York Life Investments in sponsoring and managing the Portfolio. With respect to the Subadvisory Agreement, the Board took into account New York Life Investments' recommendation to approve the continuation of the Subadvisory Agreement.

The Trustees noted that, throughout the year, the Trustees are afforded an opportunity to ask questions of, and request additional information or materials from, New York Life Investments and IndexIQ. The Board's decision with respect to each of the Advisory Agreements may have also been based, in part, on the Board's knowledge of New York Life Investments and IndexIQ resulting from, among other things, the Board's consideration of each of the Advisory Agreements in prior years, the advisory agreements for other funds in the MainStay Group of Funds, the Board's review throughout the year of the performance and operations of other funds in the MainStay Group of Funds and each Trustee's business judgment and industry experience. In addition to considering the above-referenced factors, the Board observed that in the marketplace, notably under variable life insurance policies and variable annuity contracts for which the Portfolio serves as an investment option, there are a range of investment options available to investors and that the Portfolio's shareholders, having had the opportunity to consider other investment options, have invested in the Portfolio.

The factors that figured prominently in the Board's decision to approve the continuation of each of the Advisory Agreements during the Board's December 6-7, 2023 meeting are summarized in more detail below.

## Nature, Extent and Quality of Services Provided by New York Life Investments and IndexIQ

The Board examined the nature, extent and quality of the services that New York Life Investments provides to the Portfolio. The Board evaluated New York Life Investments' experience and capabilities in serving as manager of the Portfolio and considered that the Portfolio operates in a "manager-of-managers" structure. The Board also considered New York Life Investments' responsibilities and services provided pursuant to this structure, including overseeing the services provided by IndexIQ, evaluating the performance of IndexIQ, making recommendations to the Board as to whether the Subadvisory Agreement should be renewed, modified or terminated and periodically reporting to the Board regarding the results of New York Life Investments' evaluation and monitoring functions. The Board noted that New York Life Investments manages other mutual funds, serves a variety of other investment advisory clients, including other pooled investment vehicles, and has experience overseeing mutual fund service providers, including subadvisors. The Board considered the experience of senior personnel at New York Life Investments providing management and administrative and other non-advisory services to the Portfolio. The Board observed that New York Life Investments devotes significant resources and time to providing management and administrative and other non-advisory services to the Portfolio, including New York Life Investments' oversight and due diligence reviews of IndexIQ and ongoing analysis of, and interactions with, IndexIQ with respect to, among other things, the Portfolio's investment performance and risks as well as IndexIQ's investment capabilities and subadvisory services with respect to the Portfolio.

The Board also considered the range of services that New York Life Investments provides to the Portfolio under the terms of the Management Agreement, including: (i) fund accounting and ongoing supervisory
services provided by New York Life Investments' Fund Administration and Accounting Group; (ii) investment supervisory and analytical services provided by New York Life Investments' Investment Consulting Group; (iii) compliance services provided by the Trust's Chief Compliance Officer as well as New York Life Investments' compliance department, including supervision and implementation of the Portfolio's compliance program; (iv) legal services provided by New York Life Investments' Office of the General Counsel; and (v) risk management monitoring and analysis by compliance and investment personnel. In addition, the Board considered New York Life Investments' willingness to invest in personnel and other resources, such as cyber security, information security and business continuity planning, that may benefit the Portfolio and noted that New York Life Investments is responsible for compensating the Trust's officers, except for a portion of the salary of the Trust's Chief Compliance Officer. The Board recognized that New York Life Investments provides certain other non-advisory services to the Portfolio and has over time provided an increasingly broad array of non-advisory services to the MainStay Group of Funds as a result of regulatory and other developments.

The Board also examined the range, and the nature, extent and quality, of the investment advisory services that IndexIQ provides to the Portfolio and considered the terms of each of the Advisory Agreements. The Board evaluated IndexIQ's experience and performance in serving as subadvisor to the Portfolio and advising other portfolios and IndexIQ's track record and experience in providing investment advisory services as well as the experience of investment advisory, senior management and administrative personnel at IndexIQ. The Board considered New York Life Investments' and IndexIQ's overall resources, legal and compliance environment, capabilities, reputation, financial condition and history. In addition to information provided in connection with quarterly meetings with the Trust's Chief Compliance Officer, the Board considered information regarding the compliance policies and procedures of New York Life Investments and IndexIQ and acknowledged their commitment to further developing and strengthening compliance programs that may relate to the Portfolio. The Board also considered IndexlQ's ability to recruit and retain qualified investment professionals and willingness to invest in personnel and other resources that may benefit the Portfolio. In this regard, the Board considered the qualifications and experience of the Portfolio's portfolio managers, the number of accounts managed by the portfolio managers and the method for compensating the portfolio managers.

In addition, the Board considered information provided by New York Life Investments and IndexIQ regarding their respective business continuity and disaster recovery plans.

Based on these considerations, among others, the Board concluded that the Portfolio would likely continue to benefit from the nature, extent and quality of these services.

## Investment Performance

In evaluating the Portfolio's investment performance, the Board considered investment performance results over various periods in light of the Portfolio's investment objective, strategies and risks. The Board

# Board Consideration and Approval of Management Agreement and Subadvisory Agreement (Unaudited) (continued) 

considered investment reports on, and analysis of, the Portfolio's performance provided to the Board throughout the year. These reports include, among other items, information on the Portfolio's gross and net returns, the Portfolio's investment performance compared to a relevant investment category and the Portfolio's benchmarks, the Portfolio's risk-adjusted investment performance and the Portfolio's investment performance as compared to peer funds, as appropriate, as well as portfolio attribution information and commentary on the effect of market conditions. The Board also considered information provided by ISS showing the investment performance of the Portfolio as compared to peer funds. In addition, the Board reviewed the methodology used by ISS to construct the group of peer funds for comparative purposes.

The Board also took into account its discussions with senior management at New York Life Investments concerning the Portfolio's investment performance over various periods as well as discussions between representatives of IndexIQ and the members of the Board's Investment Committee, which generally occur on an annual basis. In considering the investment performance of the Portfolio, the Board noted that the Portfolio underperformed its peer funds for the three- and five-year periods ended July 31, 2023, and performed favorably compared to its peer funds for the one-year period ended July 31, 2023. The Board considered its discussions with representatives from New York Life Investments and IndexIQ regarding the Portfolio's investment performance.

Based on these considerations, among others, the Board concluded that its review of the Portfolio's investment performance and related information supported a determination to approve the continuation of each of the Advisory Agreements.

## Costs of the Services Provided, and Profits and Other Benefits Realized, by New York Life Investments and IndexIQ

The Board considered the costs of the services provided under each of the Advisory Agreements. The Board also considered the profitability of New York Life Investments and its affiliates, including IndexIQ, due to their relationships with the Portfolio as well as by New York Life Investments and its affiliates due to their relationships with the MainStay Group of Funds. Because IndexIQ is an affiliate of New York Life Investments whose subadvisory fee is paid by New York Life Investments, not the Portfolio, the Board considered cost and profitability information for New York Life Investments and IndexIQ in the aggregate.

In addition, the Board acknowledged the difficulty in obtaining reliable comparative data about mutual fund managers' profitability because such information generally is not publicly available and may be impacted by numerous factors, including the structure of a fund manager's organization, the types of funds it manages, the methodology used to allocate certain fixed costs to specific funds and the manager's capital structure and costs of capital.

In evaluating the costs of the services provided by New York Life Investments and IndexIQ, and profitability of New York Life Investments and its affiliates, including IndexIQ due to their relationships with the

Portfolio, the Board considered, among other factors, New York Life Investments' and its affiliates', including IndexIQ's, continuing investments in, or willingness to invest in, personnel and other resources that may support and further enhance the management of the Portfolio, and that New York Life Investments is responsible for paying the subadvisory fee for the Portfolio. The Board also considered the financial resources of New York Life Investments and IndexIQ and acknowledged that New York Life Investments and IndexIQ must be in a position to recruit and retain experienced professional personnel and to maintain a strong financial position for New York Life Investments and IndexIQ to continue to provide high-quality services to the Portfolio. The Board recognized that the Portfolio benefits from the allocation of certain fixed costs among the funds in the MainStay Group of Funds, among other expected benefits resulting from its relationship with New York Life Investments.

The Board considered information regarding New York Life Investments' methodology for calculating profitability and allocating costs provided by New York Life Investments in connection with the fund profitability analysis presented to the Board. The Board concluded that New York Life Investments' methods for allocating costs and procedures for estimating overall profitability of the relationship with the funds in the MainStay Group of Funds were reasonable. The Board recognized the difficulty in calculating and evaluating a manager's profitability with respect to the Portfolio and considered that other profitability methodologies may also be reasonable.

The Board also considered certain fall-out benefits that may be realized by New York Life Investments and its affiliates, including IndexIQ, due to their relationships with the Portfolio, including reputational and other indirect benefits. The Board recognized, for example, the benefits to IndexIQ from legally permitted "soft-dollar" arrangements by which brokers provide research and other services to IndexIQ in exchange for commissions paid by the Portfolio with respect to trades in the Portfolio's portfolio securities. In addition, the Board considered its review of the management agreement for a money market fund advised by New York Life Investments and an affiliated subadvisor that serves as an investment option for the Portfolio, including the potential rationale for and costs associated with investments in this money market fund by the Portfolio, if any, and considered information from New York Life Investments that the nature and type of specific investment advisory services provided to this money market fund are distinct from, or in addition to, the investment advisory services provided to the Portfolio. In addition, the Board considered the potential dividend received tax deduction for insurance company affiliates of New York Life Investments from the Portfolio's securities lending activity.

The Board noted that the Portfolio serves as an investment option primarily under variable contracts issued by affiliates of New York Life Investments that would receive fees under those contracts. The Board observed that, in addition to fees earned by New York Life Investments under the Management Agreement for managing the Portfolio, New York Life Investments' affiliates also earn revenues from serving the Portfolio in various other capacities, including as the Portfolio's distributor, and
insurance companies affiliated with New York Life Investments would be entitled to receive fees from the Portfolio under a distribution and service plan adopted pursuant to Rule 12b-1 under the 1940 Act. The Board considered information about these other revenues and their impact on the profitability of the relationship with the Portfolio to New York Life Investments and its affiliates. The Board noted that, although it assessed the overall profitability of the relationship with the Portfolio to New York Life Investments and its affiliates as part of the contract review process, when considering the reasonableness of the fee paid to New York Life Investments under the Management Agreement, the Board considered the profitability of New York Life Investments' relationship with the Portfolio on a pre-tax basis and without regard to distribution expenses incurred by New York Life Investments from its own resources.

After evaluating the information deemed relevant by the Trustees, the Board concluded that any profits realized by New York Life Investments and its affiliates, including IndexIQ, due to their relationships with the Portfolio were not excessive and other expected benefits that may accrue to New York Life Investments and its affiliates, including IndexIQ, are reasonable.

## Management and Subadvisory Fees and Total Ordinary Operating Expenses

The Board evaluated the reasonableness of the fee paid under each of the Advisory Agreements and the Portfolio's total ordinary operating expenses. With respect to the management fee and subadvisory fee, the Board primarily considered the reasonableness of the management fee paid by the Portfolio to New York Life Investments because the subadvisory fee paid to IndexIQ is paid by New York Life Investments, not the Portfolio. The Board also considered the reasonableness of the subadvisory fee paid by New York Life Investments and the amount of the management fee retained by New York Life Investments.

In assessing the reasonableness of the Portfolio's fees and expenses, the Board primarily considered comparative data provided by ISS on the fees and expenses of similar mutual funds managed by other investment advisers. The Board reviewed the methodology used by ISS to construct the group of peer funds for comparative purposes. In addition, the Board considered information provided by New York Life Investments and IndexIQ on fees charged to other investment advisory clients, including institutional separate accounts and/or other funds, that follow investment strategies similar to those of the Portfolio, if any. The Board considered the contractual management fee schedule for the Portfolio as compared to those for such other investment advisory clients, taking into account the rationale for differences in fee schedules. The Board also took into account information provided by New York Life Investments about the more extensive scope of services provided to registered investment companies, such as the Portfolio, as compared with other investment advisory clients. Additionally, the Board considered the impact of voluntary waivers and expense limitation arrangements on the Portfolio's net management fee and expenses. The Board also considered that in proposing fees for the Portfolio, New York Life Investments considers the competitive marketplace for mutual funds.

Because the Portfolio invests primarily in ETFs, the Board also considered information provided by New York Life Investments regarding the fees and expenses associated with the Portfolio's investments in ETFs, including New York Life Investments' finding that the Portfolio's fees and expenses do not duplicate the fees and expenses of the corresponding acquired ETF (when required by Rule 12d1-4 under the 1940 Act).

Based on the factors outlined above, among other considerations, the Board concluded that the Portfolio's management fee and total ordinary operating expenses are within a range that is competitive and support a conclusion that these fees and expenses are reasonable.

## Economies of Scale

The Board considered information regarding economies of scale, including whether economies of scale may exist with respect to the Portfolio and whether the Portfolio's management fee and expense structure permits any economies of scale to be appropriately shared with the Portfolio's shareholders. The Board also considered a report from New York Life Investments, previously prepared at the request of the Board, that addressed economies of scale, including with respect to the mutual fund business generally, and the various ways in which the benefits of economies of scale may be shared with the funds in the MainStay Group of Funds. Although the Board recognized the difficulty of determining economies of scale with precision, the Board acknowledged that economies of scale may be shared with the Portfolio in a number of ways, including, for example, through the imposition of fee breakpoints, initially setting management fee rates at scale or making additional investments to enhance the services provided to the Portfolio. The Board reviewed information from New York Life Investments showing how the Portfolio's management fee schedule compared to fee schedules of other funds and accounts managed by New York Life Investments. The Board also reviewed information from ISS showing how the Portfolio's management fee schedule compared with fees paid for similar services by peer funds at varying asset levels.

Based on this information, the Board concluded that economies of scale are appropriately shared for the benefit of the Portfolio's shareholders through the Portfolio's management fee and expense structure and other methods to share benefits from economies of scale.

## Conclusion

On the basis of the information and factors summarized above, among other information and factors deemed relevant by the Trustees, and the evaluation thereof, the Board, including the Independent Trustees voting separately, unanimously voted to approve the continuation of each of the Advisory Agreements.

## Proxy Voting Policies and Procedures and Proxy Voting Record

The Portfolio is required to file with the SEC its proxy voting record for the 12-month period ending June 30 on Form N-PX. A description of the policies and procedures that are used to vote proxies relating to portfolio securities of the Portfolio is available free of charge upon request by calling 800-598-2019 or visiting the SEC's website at www.sec.gov. The most recent Form N-PX or proxy voting record is available free of charge upon request by calling 800-598-2019; visiting
https://www.newyorklifeinvestments.com/investment-products/vp; or visiting the SEC's website at www.sec.gov.

## Shareholder Reports and Quarterly Portfolio Disclosure

The Portfolio is required to file its complete schedule of portfolio holdings with the SEC 60 days after its first and third fiscal quarter on Form N-PORT. The Portfolio's holdings report is available free of charge upon request by calling 800-598-2019 or by visiting the SEC's website at www.sec.gov.

## Board of Trustees and Officers

The Trustees and officers of the Portfolio are listed below. The Board oversees the MainStay Group of Funds (which consists of MainStay Funds and MainStay Funds Trust), MainStay VP Funds Trust, MainStay MacKay DefinedTerm Municipal Opportunities Fund, MainStay CBRE Global Infrastructure Megatrends Term Fund, the Manager and the Subadvisors, and elects the officers of the Portfolios who are responsible for the day-to-day operations of the Portfolio. Information pertaining to the Trustees and officers is set forth below. Each Trustee serves until his or her successor is elected and qualified or until his or her resignation,
death or removal. Under the Board's retirement policy, unless an exception is made, a Trustee must tender his or her resignation by the end of the calendar year during which he or she reaches the age of 75 . Officers are elected annually by the Board. The business address of each Trustee and officer listed below is 51 Madison Avenue, New York, New York 10010. A majority of the Trustees are not "interested persons" (as defined by the 1940 Act and rules adopted by the SEC thereunder) of the Portfolio ("Independent Trustees").

|  | Name and Year of Birth | Term of Office, Position(s) Held and Length of Service | Principal Occupation(s) During Past Five Years | Number of Portfolios in Fund Complex Overseen by Trustee | Other Directorships Held by Trustee |
| :---: | :---: | :---: | :---: | :---: | :---: |

## 2023 Annual Report

This report is for the general information of New York Life Variable Annuities and NYLIAC Variable Universal Life Insurance Products policyowners. It must be preceded or accompanied by the appropriate product(s) and funds prospectuses if it is given to anyone who is not an owner of a New York Life variable annuity policy or a NYLIAC Variable Universal Life Insurance Product. This report does not offer for sale or solicit orders to purchase securities.

The performance data quoted in this report represents past performance. Past performance is no guarantee of future results. Due to market volatility and other factors, current performance may be lower or higher than the figures shown. The most recent month-end performance summary for your variable annuity or variable life policy is available by calling 800-598-2019 and is updated periodically on newyorklife.com.

The New York Life Variable Annuities and NYLIAC Variable Universal Life Insurance Products are issued by New York Life Insurance and Annuity Corporation (a Delaware Corporation) and distributed by NYLIFE Distributors LLC (Member FINRA/SIPC).
