Core Plus seeks to outperform the benchmark by eliminating or reducing uncompensated risk while opportunistically allocating investments across a range of core and off-benchmark sectors. The strategy strives to achieve an information ratio of greater than 1.

Representative Account Characteristics | As of December 31, 2023

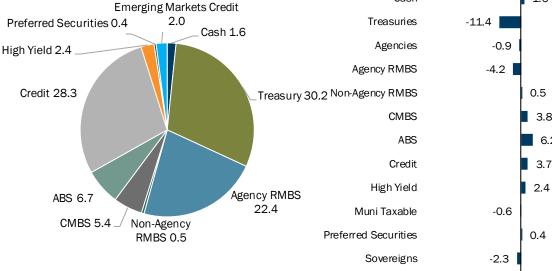

Statistics	MacKay Shields Representative Account	Bloomberg U.S. Aggregate Index		
Yield to Worst	5.2%	4.5%		
Duration	6.3 Years	6.1 Years		
Average Quality	AA-	AA2/AA3		
Average Dollar Price	\$96.79	N/A		
Number of Holdings	374	13,334		

Sector Breakdown | (% of Market Value)1

VS. INDEX Cash 1.6 -11.4 Agencies -0.9

0.8

CMBS = Commercial Mortgage-Backed Securities; ABS=Asset Backed Securities

Index = Bloomberg U.S. Aggregate Index. The duration of the benchmark's residential mortgage segment has been updated with FTSE Russell's Yield Book prepayment models to maintain consistency with our portfolio analytics.

1. The above is a relative comparison between the representative account and the Index; thus, representative account figures are absolute percentages and Index figures represent the difference between those percentages and the Index's absolute percentages.

Emerging Market Debt

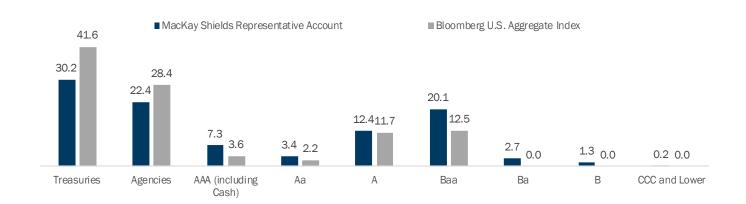

The representative account was selected because it is the largest account in the composite that is not a commingled vehicle, does not have Socially Responsible Investing (SRI) restrictions, has overall guidelines that are consistent with MacKay Shields' standard Core Plus investment guidelines, and not for performance reasons. Each client account is individually managed, actual holdings will vary for each client and there is no guarantee that a particular client's account will have the same characteristics. It may not precisely represent every portfolio in the composite. Portfolio holdings are subject to change without notice. Provided as supplemental information to the GIPS reports at the end of this presentation.

It is not possible to invest directly into an index. See last page for additional disclosures, including disclosures related to comparisons to an index and average credit quality. This document is for informational purposes only.

RELATIVE SECTOR EXPOSURE

RELATIVE QUALITY EXPOSURE

Index = Bloomberg U.S. Aggregate Index

It is not possible to invest directly into an index. See last page for additional disclosures, including disclosures related to comparisons to an index. This document is for informational purposes only.

^{1.} For rated securities, credit quality is assigned as the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used.

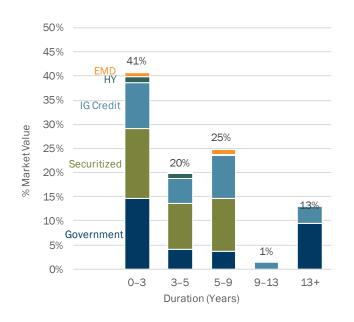

^{2.} Figures represent the net difference in duration dollars between the Representative Account exposures and Index exposures.

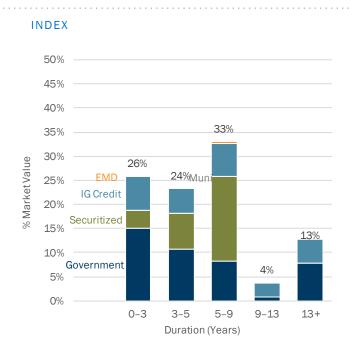

The representative account was selected because it is the largest account in the composite that is not a commingled vehicle, does not have Socially Responsible Investing (SRI) restrictions, has overall guidelines that are consistent with MacKay Shields' standard Core Plus investment guidelines, and not for performance reasons. Each client account is individually managed, actual holdings will vary for each client and there is no guarantee that a particular client's account will have the same characteristics. 1. Bloomberg U.S. Aggregate Index

The Core Plus Composite includes all discretionary core plus accounts managed with similar objectives for a full month, including those accounts no longer with the firm. This strategy follows the Core Investment Grade strategy but also invests a portion of assets in high yield bonds and foreign bonds of developed countries and emerging countries. The Core Investment Grade strategy invests a substantial portion of its assets in all types of debt securities, such as: debt or debt-related securities issued or guaranteed by the U.S. or foreign governments, their agencies or instrumentalities; obligations of international or supranational entities; debt securities issued by U.S. or foreign corporate entities; zero coupon bonds; municipal bonds; and mortgagerelated and other asset-backed securities. The strategy may also include derivatives, such as futures, to try to manage interest rate risk or reduce the risk of loss of (that is, hedge) certain of its holdings. Composite performance for the period of January 2016 to September 2019 was restated to reflect the removal of two accounts which had been included in error. As of 10/1/2019, the composite definition was changed to include similarly managed accounts that utilize alternative core plus benchmarks and to include similarly managed mutual funds. Gross-of-fees composite performance reflects reinvestment of income and is a market-weighted average of the time-weighted return, before advisory fees and related expenses, of each account for the period since inception. Net-of-fees composite performance is derived by reducing the monthly gross-of-fees composite returns by 0.0292%, our highest monthly fee. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Performance is expressed in US Dollars. The composite inception date is 1/1/99. The composite creation date is 1/1/01. All portfolios in the composite are fee-paying portfolios. There can be no assurance that the rate of return for any account within a composite will be the same as that of the composite presented. Past performance is not indicative of future results.

MacKay Shields LLC, an SEC-registered investment adviser, claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. The firm has been independently verified from January 1, 1988 through December 31, 2022. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. A list including composite descriptions, pooled fund descriptions for limited distribution pooled funds, and broad distribution funds is available upon request. Indices do not incur management fees, transaction costs or other operating expenses. Investments cannot be made directly into an index. The Bloomberg U.S. Aggregate Index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the MacKay Shields Composite. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns and the index returns over the preceding 36-month period.

Disclosures

Availability of this document and products and services provided by MacKay Shields LLC and/or MacKay Shields Europe Investment Management Limited (collectively, "MacKay Shields") may be limited by applicable laws and regulations in certain jurisdictions and this document is provided only for persons to whom this document and the products and services of MacKay Shields may otherwise lawfully be issued or made available. None of the products and services provided by MacKay Shields are offered to any person in any jurisdiction where such offering would be contrary to local law or regulation. This document is provided for information purposes only. It does not constitute investment advice and should not be construed as an offer to buy securities. The contents of this document have not been reviewed by any regulatory authority in any jurisdiction.

Comparisons to an Index

Comparisons to a financial index are provided for illustrative purposes only. Comparisons to an index are subject to limitations because portfolio holdings, volatility and other portfolio characteristics may differ materially from the index. Unlike an index, portfolios within the composite are actively managed and may also include derivatives. There is no guarantee that any of the securities in an index are contained in any managed portfolio. The performance of an index may assume reinvestment of dividends and income, or follow other index-specific methodologies and criteria, but does not reflect the impact of fees, applicable taxes or trading costs which, unlike an index, may reduce the returns of a managed portfolio. Investors cannot invest in an index. Because of these differences, the performance of an index should not be relied upon as an accurate measure of comparison.

Index Descriptions

BLOOMBERG U.S. AGGREGATE INDEX

An unmanaged broad-based flagship index that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass throughs), ABS and CMBS (agency and non-agency).

Average Credit Quality Disclosure

Average credit quality figures provided for information purposes only and are based on internal calculations by MacKay Shields using data obtained from independent third party rating agencies and internal ratings assigned to securities that are unrated by third party rating agencies. The average credit quality of a portfolio or fund is not obtained from, nor calculated by, third party rating agencies. No representation or warranty is made as to the accuracy of such calculations, or the accuracy of information provided by third parties.
